VerifiedDumps serves as a most important source of IT certification information. You can find learning materials and study guides. If you are interesting in our VerifiedDumps ServiceNow CAD exam dumps, you can depend on our VerifiedDumps to make a sound choice. VerifiedDumps ServiceNow CAD test packed so much with the latest information about the certification training. By using our VerifiedDumps ServiceNow CAD practice test, you have made preparations for the exam.

Target Audience

The ServiceNow CAD Certification Exam is targeted to ServiceNow customers, Partners, sales engineers, and others interested in creating applications over the ServiceNow platform. This exam certifies the candidates are skilled enough for creating and modifying the application on the ServiceNow platform.

ServiceNow CAD certification exam is designed to test a developer's abilities to design, develop, and implement ServiceNow applications based on the best practices and standards of ServiceNow. CAD exam covers various aspects of ServiceNow application development, including ServiceNow scripting, UI development, workflows, and integration with other applications. Certified Application Developer-ServiceNow certification exam is conducted in a proctored environment to ensure that the candidate's skills are tested fairly and accurately.

The CAD Certification program is divided into two levels: the CAD Foundation level and the CAD Professional level. The Foundation level is designed for IT professionals who are new to ServiceNow and provides an introduction to the platform and its capabilities. The Professional level is aimed at more experienced developers who are looking to build more complex applications and integrate them with other systems.

Vce ServiceNow CAD Test Simulator - New CAD Practice Materials

To add all these changes in the CAD exam questions we have hired a team of exam experts. They regularly update the Certified Application Developer-ServiceNow (CAD) exam questions as per the latest CAD Exam Syllabus. So you have the option to get free CAD exam questions update for up to 1 year from the date of CAD exam questions purchase.

ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q151-Q156):

NEW QUESTION # 151

Which of the following are configured in an Email Notification?

- a) Who will receive the notification.
- b) What content will be in the notification.
- c) When to send the notification.
- d) How to send the notification.

- A. a, b, and d
- B. a, c and d
- C. a, b and c
- D. b, c and d

Answer: C

Explanation:

Explanation/Reference: https://hi.service-now.com/kb_view.do?sysparm_article=KB0712569

NEW QUESTION # 152

Access Control debug information identifies whether each element of an Access Control granted or denied access. The elements appear in the debug information in the order of evaluation. In which order are the elements of an Access Control evaluated?

- A. Conditions, Script, Roles
- B. Conditions, Roles, Script
- **C. Roles, Conditions, Script**
- D. Script, Conditions, Roles

Answer: C

Explanation:

"The sequence is ROLES first, then condition, then script." - Chuck Tomasi says so at this link: <https://www.servicenow.com/community/grc-forum/order-of-execution-of-an-acl/m-p/1311962/highlight/true#M6538>

NEW QUESTION # 153

Which methods can be used to install an application on a ServiceNow instance?

Choose 3 answers

- A. Use the 'Install' button on the application record
- B. Install from the Google Play Store
- **C. Install an application from the Application Repository**
- **D. Download and install a third-party application from the ServiceNow Store**
- E. Download from Stack Overflow
- **F. Import an application from an XML file**

Answer: C,D,F

Explanation:

ServiceNow provides several methods to install applications onto an instance, each suited to different scenarios:

* Import an Application from an XML File (Option A):

* Description: Developers can export an application as an XML file and then import it into another ServiceNow instance.

* Use Case: This method is commonly used for moving applications between instances, such as from development to production.

* Procedure:

* Navigate to "System Applications" > "Applications."

* Click on the "Import" button.

* Upload the XML file of the application.

NEW QUESTION # 154

Can inherited fields be deleted from a table?

- A. Yes, but only if they are text fields.
- B. Yes, select the red X in the left-most column in the table definition.
- C. Yes, but only if there has never been any saved field data.
- **D. No, inherited fields cannot be deleted from a child table.**

Answer: D

Explanation:

Inherited fields in ServiceNow are fields that are part of a parent table and automatically become part of child tables through inheritance. This structure is foundational in the ServiceNow data model, ensuring that child tables maintain a consistent relationship with their parent tables.

Here's why inherited fields cannot be deleted from a child table:

System Design:

ServiceNow employs a table inheritance model where child tables derive fields and properties from parent tables. Deleting inherited fields from a child table would break the integrity of the data model, as those fields are shared across multiple tables.

Impact on Functionality:

Many inherited fields, such as `sys_created_on` or `sys_updated_by`, are integral to the functionality of the platform. Removing them could disrupt workflows, reporting, and auditing capabilities.

Alternative Approach:

If you want to hide or restrict access to inherited fields in a child table, you can use ACLs (Access Control Lists) to prevent users from viewing or modifying these fields.

Another option is to use UI Policies or Client Scripts to control their visibility on forms.

Developer Note:

Attempting to delete inherited fields violates ServiceNow's core principles of maintaining a robust and unified data structure. The platform enforces these rules to ensure consistent behavior across all tables in the hierarchy.

ServiceNow Developer Documentation on Table Inheritance.

Best practices outlined on SN Pro Tips regarding scoped application development and table structures.

NEW QUESTION # 155

When configuring the content of an Email Notification, which syntax should be used to reference the properties of an event triggering the Notification?

- A. \${current. <property name>}
- B. \${property name}.getDisplayValue()
- C. \${gs. <property name>}
- D. \${event. <property name>}

Answer: D

Explanation:

<https://www.servicenow.com/community/it-service-management-forum/email-notification/m-p/695221> Reference:

When configuring the content of an Email Notification, the following syntax should be used to reference the properties of an event triggering the Notification:

event.
<propertyname>. This is the correct syntax to access the properties of the event record that triggered the Email Notification, such as event.name, event.parm1, or event.parm2. For example, {event.parm1} will display the value of the first parameter of the event.

The following syntaxes are not correct for referencing the properties of an event triggering the Notification:

current.<propertyname>. This is the syntax to access the properties of the current record that is associated with the event, such as current.number, current.short_description, or current.state. For example, {current.short_description} will display the short description of the current record.

\${property name}.getDisplayValue(). This is the syntax to access the display value of a property of the current record, such as current.state.getDisplayValue(), current.assigned_to.getDisplayValue(), or current.category.getDisplayValue(). For example, current.state.getDisplayValue() will display the state of the current record in a human-readable format, such as New, In Progress, or Closed.

\${gs.<property name>}. This is the syntax to access the properties of the GlideSystem (gs) object, which provides methods for performing system operations, such as gs.now(), gs.getUserID(), or gs.getProperty(). For example, gs.now() will display the current date and time of the system. Reference: Email Notifications, Email Notification Variables

NEW QUESTION # 156

.....

The exam questions and answers of general ServiceNow certification exams are produced by the ServiceNow specialist professional experience. VerifiedDumps just have these ServiceNow experts to provide you with practice questions and answers of the exam to help you pass the exam successfully. Our VerifiedDumps's practice questions and answers have 100% accuracy. Purchasing products of VerifiedDumps you can easily obtain ServiceNow certification and so that you will have a very great improvement in CAD area.
