Sample ISA-IEC-62443 Questions Pdf & Reliable ISA-IEC-62443 Exam Test

ISA 62443 IC34 2 CONCEPTUAL DESIGN QUESTIONS WITH CORRECT ANSWERS 2025

A thorough risk assessment should deliver insights on system-wide, zone-specific, and conduit-specific levels and generate: - CORRECT ANSWER --Risk profile

-Highest severity consequences

-Threats / vulnerabilities leading to the highest risks

-Target Security Levels

-Recommendations

What is the output of a Risk Assessment called? - CORRECT ANSWER - Cybersecurity Requirement Specification (CRS)

The CRS must include at least the following: - CORRECT ANSWER -SUC description

Zone and conduit drawings

Zone and conduit characteristics

Operating environment assumptions

Threat environment

Organizational security policies

Tolerable risk

Regulatory requirements

What documents are required per zone/conduit? - CORRECT ANSWER -•Name and/or unique identifier

•Accountable organization(s)

•Definition of logical boundary

•Definition of physical boundary, if applicable

•Safety designation

•List of all logical access points

•List of all physical access points

•List of data flows associated with each access point

For consolidation of your learning, our PDF，Software and APP online versions of the ISA-IEC-62443 exam questions also provide you with different sets of practice questions and answers. Doing all these sets of the ISA-IEC-62443 study materials again and again, you enrich your knowledge and maximize chances of an outstanding exam success. And the content of the three version is the same, but the displays are totally differnt. If you want to know them before the payment, you can free download the demos of our ISA-IEC-62443 leaning braindumps.

The website pages list the important information about our ISA-IEC-62443 real quiz, the exam name and code, the updated time, the total quantity of the questions and answers, the characteristics and merits of the product, the price, the discounts to the client, the details and the guarantee of our ISA-IEC-62443 Training Materials, the contact methods, the evaluations of the client on our product and the related exams. You can analyze the information the website pages provide carefully before you decide to buy our ISA-IEC-62443 real quiz

Trust the best-selling ISA-IEC-62443 Cert Guide Sample Questions Pdf

The ISA-IEC-62443 exam questions are the perfect form of a complete set of teaching material, teaching outline will outline all the knowledge points covered, comprehensive and no dead angle for the ISA-IEC-62443 candidates presents the proposition scope and trend of each year, truly enemy and know yourself, and fight. Only know the outline of the ISA-IEC-62443 Exam, can better comprehensive review, in the encounter with the new and novel examination questions will not be confused, interrupt the thinking of users.

ISA/IEC 62443 Cybersecurity Fundamentals Specialist Sample Questions (Q172-Q177):

NEW QUESTION # 172
What is the FIRST step required in implementing ISO 27001?
Available Choices (select all choices that are correct)

- A. Define an information security policy.
- B. Perform a security risk assessment.
- C. Create a security management organization.
- D. Implement strict security controls.

Answer: C

NEW QUESTION # 173
If a U.S. federal agency must comply with mandatory cybersecurity requirements under law, which document would they be required to follow?

- A. ISA/IEC 62443
- B. EU Cyber Resilience Act
- C. NIST Special Publication 800-171
- D. NIST FIPS

Answer: D

Explanation:
For U.S. federal agencies, compliance with cybersecurity requirements is mandated under the Federal Information Security Modernization Act (FISMA). Under this act, agencies are required by law to adhere to NIST Federal Information Processing Standards (FIPS).
From NIST documentation and FISMA:
"Federal agencies must comply with the standards and guidelines developed by NIST, including FIPS 199 and FIPS 200, to ensure appropriate levels of information security." NIST FIPS documents are mandatory for federal agencies, while NIST Special Publications (e.g., SP 800-
171) are recommended or apply to non-federal entities (like contractors).
Incorrect Options:
B). ISA/IEC 62443 - While globally recognized, ISA/IEC 62443 is not mandated by U.S. federal law.
C). EU Cyber Resilience Act - Applies only to European Union entities.
D). NIST SP 800-171 - Applies to defense contractors, not directly to federal agencies.

NEW QUESTION # 174
How many security levels are in the ISASecure certification program?
Available Choices (select all choices that are correct)

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

NEW QUESTION # 175

What are the connections between security zones called?
Available Choices (select all choices that are correct)

- A. Firewalls
- B. Tunnels
- C. Conduits
- D. Pathways

Answer: C

Explanation:
According to the ISA/IEC 62443 standard, the connections between security zones are called conduits. A conduit is defined as a logical or physical grouping of communication channels connecting two or more zones that share common security requirements. A conduit can be used to control and monitor the data flow between zones, and to apply security measures such as encryption, authentication, filtering, or logging. A conduit can also be used to isolate zones from each other in case of a security breach or incident. A conduit can be implemented using various technologies, such as firewalls, routers, switches, cables, or wireless links. However, these technologies are not synonymous with conduits, as they are only components of a conduit. A firewall, for example, can be used to create multiple conduits between different zones, or to protect a single zone from external threats. Therefore, the other options (firewalls, tunnels, and pathways) are not correct names for the connections between security zones. References:

NEW QUESTION # 176

Which of the following is an example of separation of duties as a part of system development and maintenance?
Available Choices (select all choices that are correct)

- A. Changes are approved by one party and implemented by another.
- B. Configuration settings are made by one party and self-reviewed using a checklist.
- C. Design and implementation are performed by the same team.
- D. Developers write and then test their own code.

Answer: A

NEW QUESTION # 177

......

As you may see the data on the website, our sales volumes of our ISA-IEC-62443 exam questions are the highest in the market. You can browse our official websites to check our sales volumes. At the same time, many people pass the exam for the first time under the guidance of our ISA-IEC-62443 Practice Exam. And there is no exaggeration that our pass rate for our ISA-IEC-62443 study guide is 98% to 100% which is proved and tested by our loyal customers.

Reliable ISA-IEC-62443 Exam Test: https://www.freecram.com/ISA-certification/ISA-IEC-62443-exam-dumps.html

No matter which country or region you are in, our ISA-IEC-62443 exam questions can provide you with thoughtful services to help you pass exam successfully for our ISA-IEC-62443 study materials are global and warmly praised by the loyal customers all over the world, To gain all these ISA ISA-IEC-62443 certification benefits you just need to pass the ISA/IEC 62443 Cybersecurity Fundamentals Specialist (ISA-IEC-62443) exam which is quite challenging and not easy to crack, ISA Sample ISA-IEC-62443 Questions Pdf If you do, just choose us.
