Overall obtaining 1Z1-591 certificate can be a valuable investment in your professional career. As it can help you to stand out in a competitive market, more career opportunities, and advancement of your career. To gain all these advantages you just need to enroll in the Oracle 1Z1-591 Certification Exam and put all your efforts to pass this challenging 1Z1-591 exam with flying colors.

How to study the 1Z0-591 Exam

There are two main types of resources for preparation of certification exams first there are the study guides and the books that are detailed and suitable for building knowledge from ground up then there are video tutorial and lectures that can somehow ease the pain of through study and are comparatively less boring for some candidates yet these demand time and concentration from the learner. Smart Candidates who want to build a solid foundation in all exam topics and related technologies usually combine video lectures with study guides to reap the benefits of both but there is one crucial preparation tool as often overlooked by most candidates the practice exams. Practice exams are built to make students comfortable with the real exam environment. Statistics have shown that most students fail not due to that preparation but due to exam anxiety the fear of the unknown. Actual4Cert expert team recommends you to prepare some notes on these topics along with it don't forget to practice **Oracle 1Z0-591 exam dumps** which have been written by our expert team, Both these will help you a lot to clear this exam with good marks.

1Z1-591 Exam Torrents: Oracle Business Intelligence Foundation Suite 11g Essentials Prepare Torrents & 1Z1-591 Test Braindumps

The 1Z1-591 exam materials is a dump, maybe many candidates will worry about how to payment and whether it is safe when pay for it. Some people may think that online shopping is not safe. Now I will tell you responsibly that our payment method of 1Z1-591 exam materials is very secure. The payment method we use is credit card payment, not only can we guarantee your security of the payment, but also we can protect your right and interests. As for the safety issue of 1Z1-591 Exam Materials you are concerned about is completely unnecessary. You can rest assured to buy and use it.

Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q15-Q20):

NEW QUESTION # 15

Which of the following characteristics pertain to a "ragged" hierarchy?

- A. All values can have a maximum of six levels.
- B. It creates multiple levels of hierarchy in the database table.
- C. It can only be stored in an XML structure.

- D. A branch of the hierarchy may have a different number of levels than other branches.

Answer: D

Explanation:

Ragged Hierarchies are hierarchies where some routes down the hierarchy are longer than others; for example, you may have an organizational hierarchy for salespeople where the overall boss has two assistant managers, one of them works on their own and another has three sales managers under them; some of those sales manager may have sales staff under them, and some sales staff may have trainees under them.

NEW QUESTION # 16

When designing a Star Schema, which option does not apply?

- A. The fact has several foreign keys that are primary keys in the dimensional table
- B. The facts are quantifiable.
- C. Dimensional tables are normalized.
- D. Fact table is joined to the related dimensional tables.
- E. Dimensional tables have one attribute primary key as Product_ID for products.

Answer: C

Explanation:

Explanation/Reference:

In a Star Schema the dimensional tables does not need to be normalized.

A Snowflake Schema is a modified Star Schema that has normalized the dimensional tables.

Incorrect answers:

B: A star schema is a dimensional schema with a single fact table that has foreign key relationships with several dimension tables.

C, E: A star join is a primary key to foreign key join :

* of the dimension tables

* to a fact_table.

See picture below:

NEW QUESTION # 17

Which are the three types of tables available to physical tables in the physical layer?

- A. Physical Table
- B. Stored Proc
- C. View
- D. Table
- E. Select

Answer: A,B,E

Explanation:

Explanation/Reference:

Pull the table and column definition into the physical layer

Use the OBIEE "import metadata" wizard to pull the table and column definition into the physical layer. The wizard is used so that all of the column definitions do not need to be manually added into the physical layer.

Figure:

Note: The physical layer is the layer of the Logical Business Model where you define the physical data model of your data source. It contains information about the physical data sources.

NEW QUESTION # 18

What are the two types of Session Variables?

- A. Static
- B. Non System
- C. Dynamic
- D. System

Answer: B,D

Explanation:

Explanation

There are two types of session variables:

System - A session variable that the Oracle BI Server and Oracle BI Presentation Services use for specific purposes.

System session variables have reserved names that cannot be used for other kinds of variables (such as static or dynamic repository variables and non-system session variables).

Non-system - A system variable that the administrator creates and names. For example, the administrator might create a SalesRegion non-system variable that initializes the name of a user's sales region.

The administrator creates non-system session variables using the Oracle BI Administration Tool.

Note: Session Variables

A session variable is a variable that is initialized at login time for each user. When a user begins a session, the Oracle BI Server creates a new instance of a session variable and initializes it.

There are as many instances of a session variable as there are active sessions on the Oracle BI Server. Each instance of a session variable could be initialized to a different value.

NEW QUESTION # 19

One of the most common uses of Dynamic Repository Variables is to setup filters for use in reporting. Which variable below is a valid example of a Dynamic Repository Variable?

- A. Month
- B. CurrentMonth
- C. Quarter
- D. Year

Answer: B

Explanation:

CurrentMonth can be calculated by a sql statement.

Note:

REPOSITORY VARIABLE(DYNAMIC)

- * Initialized when BI server is started

- * Assigned value dynamically based on the result of a query

- * Value is dependent of the sql provided in Initialization Block

Create a dynamic variable and provide a Name and Default Initializer. Create a new initialization block by clicking on the New button in the above screen.

Dynamic Repository Variable - Datawarehouse...

Name: Datawarehouse Name

Type:

☐ Static

☒ Dynamic

Initialization Block:

not assigned New...

Default Initializer:

'DW name not round'

Description

OK Cancel Help

Provide Initialization Block variable Name

Repository Variable Initialization Block - DWH Name Initialization Block

Name: DWH Name Initialization Block

☐ Disabled

Schedule

Start on: Sunday , August 01, 2010 12:00:00 AM

Refresh interval: 1 (hours)

Data Source

Connection Pool: "ord"."Connection Pool" [Edit Data Source...](#)

Database: Oracle 11g/Exadata (Initialization string inherited from Default)

```
select lower(sys_context('USERENV','SESSION_USER'))||
'@'||
lower(sys_context('USERENV','DB_NAME'))
from dual;
```
