## SAP Certified Associate - Enterprise Architecture Consultant - SAP LeanIX

## Sample Questions (Q56-Q61):

### NEW QUESTION # 56

How can administrators access and manage automations in SAP LeanIX?

- A. By navigating to fact sheet
- B. By navigating to dashboard
- C. By navigating to collaboration + automations
- **D. By navigating to administration**

**Answer: D**

Explanation:

Administrators can access and manage automations in SAP LeanIX by navigating to the administration section. This section provides tools and settings for configuring and controlling various aspects of the LeanIX platform, including automations. Administrators can set up event-driven triggers, define automated actions, and monitor the performance and execution of these automations to streamline processes and improve efficiency.

### NEW QUESTION # 57

What are IT components?

- A. Users of the system
- **B. Building blocks of applications**
- C. Business processes
- D. Technical applications

**Answer: B**

Explanation:

In the context of SAP LeanIX, IT components are the building blocks of applications. These components include the various technologies, services, and infrastructure elements that make up an application.

Understanding these components is crucial for managing the IT landscape effectively.

### NEW QUESTION # 58

What are some attributes of an application fact sheet in SAP LeanIX? Note: There are 3 correct answers to this question.

- **A. Functional fit**
- **B. Business criticality**
- C. Information
- **D. Lifecycle**
- E. Objective

**Answer: A,B,D**

### NEW QUESTION # 59

How can the management and application owner functions use SAP LeanIX? Note: There are 2 correct answers to this question.

- A. Management: to enhance brand visibility and manage social media campaigns
- B. Application owners: to implement automated application data compliance
- **C. Application owners: to provide up-to-date data on the applications that they are responsible for**
- **D. Management: to gain a holistic view of the IT landscape to ensure alignment with business goals**

**Answer: C,D**

Explanation:  
SAP LeanIX Overview

#### NEW QUESTION # 60

What is the purpose of completion weights?

- A. To influence the contribution score
- **B. To indicate the importance of attributes**
- C. To define which attributes are mandatory
- D. To ensure all fact sheets attributes are filled

**Answer: B**

Explanation:

Completion weights in SAP LeanIX are used to indicate the importance of attributes within a fact sheet. By assigning different weights to attributes, organizations can highlight which pieces of information are more critical for the overall quality and completeness of the data. These weights help in prioritizing data entry and ensuring that the most important attributes are given due attention, thereby improving the overall data quality and utility.
