Answer: A,B

Explanation:

During Fit-to-Standard workshops, implementation consultants play a critical role in guiding customer experts through the evaluation of SAP Best Practices and identifying gaps between standard processes and customer-specific requirements. Below are the two correct answers:

- * Highlight areas that require configuration or customization decisions (Option B): Consultants help customers identify areas where standard SAP processes may need adjustments to meet specific business needs. This includes highlighting configuration options and discussing potential customizations. The SAP S/4HANA Cloud Fit-to-Standard Workshop Guide emphasizes this responsibility.
- * Demonstrate SAP Best Practice business processes in the starter system (Option D): Consultants demonstrate how SAP Best Practices are implemented in the starter system, providing customers with a clear understanding of standard processes. This helps customers evaluate whether these processes align with their requirements. The same SAP S/4HANA Cloud Fit-to-Standard Workshop Guide documents this activity.
- * A. Conduct end-user training on active scope items: End-user training is typically conducted during the realization phase, not during Fit-to-Standard workshops. These workshops focus on process alignment rather than training.
