As long as you have a try on our products you will find that both the language and the content of our C-S4EWM-2023 practice braindumps are simple. The language of our C-S4EWM-2023 study materials is easy to be understood and suitable for any learners. The content emphasizes the focus and seizes the key to use refined C-S4EWM-2023 Exam Questions And Answers to let the learners master the most important information by using the least amount of them.

SAP C-S4EWM-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.
Topic 2	Inbound Processes (Value Added Services, Cross-docking, Quality Management): This topic includes executing inbound processes with value added services (VAS) or deconsolidation, and setting up deliveries for cross-docking (CD) or quality inspection (QIE).
Topic 3	Internal processing (Physical Inventory, Replenishment): This topic involves defining physical inventory processes and setting up and executing replenishment.
Topic 4	Warehouse Management (Monitor - Cockpit): This topic involves monitoring warehouse activities using the Warehouse Management Monitor, Warehouse Cockpit, and analytical apps.
Topic 5	System Integration, Master Data and Delivery Document Customizing: This focuses on setting up system integration, distributing master data, and customizing delivery documents.

Marvelous C-S4EWM-2023 Relevant Answers by Actualtests4sure

Our accurate, reliable, and top-ranked SAP C-S4EWM-2023 exam questions will help you qualify for your SAP C-S4EWM-2023 certification on the first try. Do not hesitate and check out Actualtests4sure excellent SAP C-S4EWM-2023 Practice Exam to stand out from the rest of the others.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q72-Q77):

NEW QUESTION # 72

For a picking task, the system must determine the storage types from which to remove the stock. How does the system find the storage type search sequence?

- A. The system attempts to read the combination of warehouse number, stock removal indicator, stock type, and warehouse process type, then it only uses the warehouse number.
- B. The system attempts to read a completely qualified entry, with all parameters and indicators, then it uses the defined access strategy.
- C. The system attempts to use the defined access strategy, then it uses the combination of warehouse number, stock removal indicator, and warehouse process type.
- D. The system attempts to read the combination of warehouse number and stock removal indicator, then it uses the combination of warehouse number and warehouse process type.

Answer: A

Explanation:

Storage Type Search Sequence for Picking Tasks

* The system evaluates parameters in a hierarchical order:

* Combination of warehouse number, stock removal indicator, stock type, and warehouse process type.

* If no matching entry is found, the system defaults to using only the warehouse number.

Excluded Options

* A & C: These lack the complete set of parameters required for a fully qualified search.

* B: Does not consider stock type in the determination process.

SAP S/4HANA Cloud Private Edition Reference

* Check Storage Type Search Sequence for Stock Removal in SAP EWM documentation.

NEW QUESTION # 73

How do you control the physical inventory procedures which can be done in a specific part of the warehouse?

- A. You define an activity area and assign this to the physical inventory area
- B. You define a queue and assign this to the physical inventory area
- C. You assign bins directly to the physical inventory area
- D. You define a storage section and assign this to the physical inventory area.

Answer: A

NEW QUESTION # 74

Which of the following are storage type roles? Note: There are 3 correct answers to this question.

- A. Conveyor System
- B. Identification Point
- C. Production Supply
- D. Work Center in Staging Area Group
- E. Deconsolidation

Answer: C,D,E

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Storage type roles in SAP EWM define their function. Option B ("Deconsolidation") is correct for breaking down HUs, option C ("Work Center in Staging Area Group") is correct for staging, and option E ("Production Supply") is correct for production areas, all set in SPRO: SCM Extended Warehouse Management > Master Data > Define Storage Type. Option A (Conveyor) is an MFS object, and option D (Identification Point) is a bin type role.

NEW QUESTION # 75

What are characteristics of the early capacity check? Note: There are 2 correct answers to this question.

- A. It is done during the actual putaway process
- B. It is only available when working with mobile devices
- C. It is based on capacities of bin types
- D. It happens during the warehouse task creation

Answer: C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The early capacity check in SAP EWM ensures bins can accommodate stock before task execution. Option C ("It happens during the warehouse task creation") is correct as it occurs when tasks are generated, and option D ("It is based on capacities of bin types") is correct because it uses bin type capacity data, both configured in SPRO: SCM Extended Warehouse Management > Goods Receipt Process > Capacity Check. Option A (mobile devices) is incorrect as it's not device-specific, and option B (during putaway) is too late for an "early" check.

NEW QUESTION # 76

Where do you enable opportunistic cross-docking in a decentralized EWM? (Repeated question from batch 1, included for completeness)

- A. In the warehouse and the product
- B. In the warehouse and the document type
- C. In the product and the document type
- D. In the product and the warehouse process type

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Opportunistic cross-docking in decentralized EWM is enabled at the product level and linked to the warehouse process type. Option B ("In the product and the warehouse process type") is correct, configured in the product master (Warehouse tab) and SPRO: SCM Extended Warehouse Management > Cross-Docking > Opportunistic Cross-Docking. Options A, C, and D miss the critical process type linkage. (See Question 1 for full details.)

NEW QUESTION # 77

.....

We are a comprehensive service platform aiming at help you to pass C-S4EWM-2023 exams in the shortest time and with the least amount of effort. As the saying goes, an inch of gold is an inch of time. The more efficient the C-S4EWM-2023 study guide is, the more our candidates will love and benefit from it. It is no exaggeration to say that you can successfully pass your exams with the help our C-S4EWM-2023 learning torrent just for 20 to 30 hours even by your first attempt.
