Have similar features to the desktop-based exam simulator contains actual SAP C-S4PM-2504 Practice Test that will help you grasp every topic Compatible with every operating system such as Mac, Linus, iOS, Windows, and Android Works properly on

Google chrome, Internet explorer, Microsoft Edge, Opera, etc. Does not require any special plugins to operate creates an exam atmosphere making candidates more confident. Keep track of your progress with self-analysis Points out mistakes at the end of every attempt.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q60-Q65):

NEW QUESTION # 60

Why does SAP recommend to perform regression testing during the upgrade window for SAP S/4HANA Cloud Public Edition?

- A. To ensure that new features of the upgrade are working as specified in the requirements
- B. To validate that all user permissions have been properly migrated to the new version
- C. To confirm that the database schema changes have been implemented successfully
- **D. To verify existing functionality still works correctly after the upgrade**

Answer: D

Explanation:

Regression testing is a critical activity during the upgrade window for SAP S/4HANA Cloud Public Edition to ensure system stability and continuity of operations post-upgrade.

* Option A: To ensure that new features of the upgrade are working as specified in the requirements Incorrect. Testing new features is part of functional or exploratory testing, not regression testing, which focuses on existing functionality. The SAP S/4HANA Cloud Testing Guide states,

"Regression testing verifies existing functionality, while new features are tested separately during functional or user acceptance testing."

* Option B: To validate that all user permissions have been properly migrated to the new version Incorrect. User permissions are validated through security testing, not regression testing. The SAP S/4HANA Cloud Security Guide notes, "Permission validation is handled through security and role-based testing, not regression testing, which focuses on business processes."

* Option C: To confirm that the database schema changes have been implemented successfully Incorrect. Database schema changes are validated through technical or integration testing, not regression testing. The SAP S/4HANA Cloud Implementation Guide clarifies, "Database schema validation is a technical task, whereas regression testing focuses on business process continuity."

* Option D: To verify existing functionality still works correctly after the upgrade Correct.

Regression testing ensures that existing business processes and functionalities remain operational after an upgrade. The SAP S/4HANA Cloud Testing Guide explains, "SAP recommends regression testing during the upgrade window to verify that existing functionality in SAP S/4HANA Cloud Public Edition continues to work correctly, preventing disruptions to business operations." Extract from Official Documentation:

* SAP S/4HANA Cloud Testing Guide (SAP Help Portal, <https://help.sap.com>): "Regression testing is performed during the upgrade window to verify that existing functionality in SAP S/4HANA Cloud Public Edition remains intact, ensuring business continuity after the introduction of new releases."

* SAP S/4HANA Cloud Implementation Guide (SAP Community, <https://community.sap.com>): "During upgrades, regression testing is critical to confirm that core business processes and existing functionalities are unaffected by the new release, safeguarding system reliability." Additional Context:

SAP S/4HANA Cloud Public Edition's semi-annual upgrades introduce new features and updates, making regression testing essential to mitigate risks of unintended impacts on existing processes. This aligns with SAP's cloud strategy of maintaining stability while delivering continuous innovation.

:

SAP Help Portal: SAP S/4HANA Cloud Testing Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP Activate Methodology Guide: Includes testing strategies for upgrades.

SAP S/4HANA Cloud Study Guide: Explains regression testing purpose.

NEW QUESTION # 61

Which activities can you complete in the Maintain Business Roles SAP Fiori app?

Note: There are 2 correct answers to this question.

- **A. Maintain restrictions**
- B. Maintain technical catalogs
- **C. Assign business catalogs to a business role**

- D. Assign PFCG profiles to a business role

Answer: A,C

NEW QUESTION # 62

What can you do with the SAP for Me mobile app? Note: There are 2 correct answers to this question.

- A. Get full transparency into your SAP product portfolio
- B. Download learning content from SAP Learning Hub
- C. Interact with SAP easily
- D. Access the SAP ONE Support Launchpad

Answer: A,C

Explanation:

The SAP for Me mobile app is a customer portal that provides access to SAP products, services, and support resources, enhancing user interaction and transparency.

* Option A: Get full transparency into your SAP product portfolio Correct. SAP for Me provides a comprehensive view of a customer's SAP product portfolio, including licenses, subscriptions, and system details. The SAP for Me User Guide states, "SAP for Me offers full transparency into your SAP product portfolio, enabling you to monitor usage, licenses, and system status."

* Option B: Download learning content from SAP Learning Hub Incorrect. The SAP Learning Hub provides learning content, but downloading it is not a feature of the SAP for Me mobile app. The SAP Learning Hub Guide notes, "Learning content is accessed and downloaded directly through the SAP Learning Hub platform"

* Option C: Interact with SAP easily Correct. SAP for Me is designed to simplify customer interactions with SAP, including support, updates, and account management. The SAP for Me User Guide explains, "The SAP for Me mobile app enables easy interaction with SAP services, providing a user-friendly interface for support and portfolio management."

* Option D: Access the SAP ONE Support Launchpad Incorrect. The SAP ONE Support Launchpad is a separate portal for support services, not directly accessible via the SAP for Me mobile app. The SAP Support Guide clarifies, "The SAP ONE Support Launchpad is accessed through a dedicated web interface, not the SAP for Me app." Extract from Official Documentation:

* SAP for Me User Guide (<https://me.sap.com>): "SAP for Me provides customers with full transparency into their SAP product portfolio and a seamless way to interact with SAP services, including support, system monitoring, and account management."

* SAP S/4HANA Cloud Implementation Guide: "SAP for Me is a key tool for customers to manage their SAP relationship, offering portfolio insights and easy access to SAP resources." Additional Context:

SAP for Me enhances customer engagement by consolidating critical information and interactions into a single mobile app, aligning with SAP's focus on user-centric solutions.

:

SAP Help Portal: SAP for Me User Guide (<https://me.sap.com>).

SAP S/4HANA Cloud Implementation Guide: Mentions SAP for Me for customer interaction.

SAP Support Guide: Clarifies support portal access.

NEW QUESTION # 63

Which of the following is part of the Explore phase in the "New Implementation of SAP S/4HANA Cloud, public edition" transition path?

- A. Develop and document Enablement Strategy
- B. Fit-to-standard
- C. Request SAP S/4HANA Cloud Development System
- D. Solution Validation and Delta Design

Answer: B

NEW QUESTION # 64

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. Target customer go-live date

- B. Business role permission requirements
- **C. Known integration requirements**
- D. SAP Fiori application extensions

Answer: A,C

Explanation:

The Digital Discovery Assessment (DDA) is a tool used during the Discover phase of the SAP Activate methodology to evaluate a customer's requirements and align them with SAP S/4HANA Cloud Public Edition capabilities. It captures critical information to plan the implementation.

* Option A: Business role permission requirements Incorrect. Business role permission requirements are typically defined during the Explore phase, particularly in Fit-to-Standard workshops, where roles are mapped to business processes. The DDA focuses on high-level requirements, not granular permissions. The SAP Activate Methodology Guide states, "The Digital Discovery Assessment captures strategic and functional requirements, not detailed role-based permissions."

* Option B: Target customer go-live date Correct. The DDA includes the target go-live date as part of the project planning and timeline establishment. According to the SAP S/4HANA Cloud Implementation Guide, "The Digital Discovery Assessment collects key project parameters, including the planned go-live date, to align implementation activities with customer expectations."

* Option C: SAP Fiori application extensions Incorrect. SAP Fiori application extensions are identified during the Explore or Realize phases when customization and extensibility needs are analyzed. The DDA does not focus on specific extensions. The SAP Activate Methodology notes, "Extensibility requirements are documented post-DDA, during Fit-to-Standard or configuration phases."

* Option D: Known integration requirements Correct. The DDA captures known integration requirements to identify systems and processes that need to connect with SAP S/4HANA Cloud. The SAP S/4HANA Cloud Public Edition Study Guide explains, "The Digital Discovery Assessment includes a section for integration requirements to ensure that all necessary interfaces are planned for in the implementation roadmap." Extract from Official Documentation:

* SAP S/4HANA Cloud Implementation Guide (<https://help.sap.com>): "The Digital Discovery Assessment is a structured questionnaire that gathers information on business processes, integration needs, and project timelines, including the target go-live date."

* SAP Activate Methodology Guide: "During the Discover phase, the Digital Discovery Assessment helps customers articulate their integration requirements and establish key milestones, such as the go-live date, to guide the implementation." Additional Context: The DDA is a critical accelerator in the SAP Activate methodology, ensuring that the implementation is aligned with the customer's strategic goals. By capturing the go-live date and integration requirements, it sets the foundation for scoping and planning in subsequent phases.

:

SAP Help Portal: SAP S/4HANA Cloud Implementation Guide (<https://help.sap.com>).

SAP Activate Methodology Guide: Details the role of DDA in the Discover phase.

SAP S/4HANA Cloud Public Edition Study Guide: Explains DDA content and purpose.
