SAP Certified Associate - Design Thinking Sample Questions (Q36-Q41):

NEW QUESTION # 36
What tools or Design Thinking techniques do you use during the scoping phase? Note: There are 2 correct answers to this question.

- A. Customer journey map
- B. Low-fidelity prototyping
- C. Value maps.
- D. The reframing technique

Answer: C,D

Explanation:
The scoping phase is a critical step in the Design Thinking process, where the team defines and refines the challenge to ensure it is well-understood and actionable. Here's why the correct answers are A and B:
* Why this is correct:Reframing is a powerful tool used during the scoping phase to restate the problem in a way that opens up new

possibilities for innovation. By reframing the challenge, teams can shift their perspective and uncover hidden opportunities or constraints. This ensures the challenge is framed in a user-centric and actionable manner.

NEW QUESTION # 37
How would you integrate Design Thinking activities into a software development project? Note: There is 1 correct answer to this question.

- A. Initiate Design Thinking related activities at the beginning of the development project.
- B. Plan Design thinking workshops first for the business side and then for the IT side and repeat this throughout
