C-THR92-2505 Study Materials & C-THR92-2505 Exam Preparatory & C-THR92-2505 Practice Test

Our SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting (C-THR92-2505) practice exam can be modified in terms of length of time and number of questions to help you prepare for the SAP real test. We're certain that our C-THR92-2505 Questions are quite similar to those on C-THR92-2505 real exam since we regularly update and refine the product based on the latest exam content.

SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q76-Q81):

NEW QUESTION # 76

What is a prerequisite for using the SuccessFactors standard canvas report templates?

- A. The customer must have licensed SuccessFactors Employee Central
- B. The templates must have been loaded within Report Center.
- C. The templates must have been downloaded from the Success Store.
- D. **The customer must have enabled the templates in Provisioning.**

Answer: D

Explanation:

* Enabling Templates in Provisioning:

* SuccessFactors standard canvas report templates must be enabled in Provisioning by an implementation partner or SAP administrator before they can be used.

NEW QUESTION # 77

You have a field in Job Information that stores the assignment of an employee to a Generic Object record for a Company Car. Company Car records include an Assignment Date of the Car. You want to create a query that includes the Employee Information, and also include the Assignment Date of the Car. You add the Job Information Table to Query Designer. What steps do you take to accomplish the query? Note; There are 2 correct answers to this question.

- A. In Related tables, add the Company Car table to the Query.
- B. **In the Company Car table, select the Assignment Date Field.**
- C. **In Job Information table, expand the Company Car Field.**
- D. In Job information table, select the Assignment Date field.

Answer: B,C

Explanation:

To include the Assignment Date of a Company Car in your query:

* In Job Information Table, Expand the Company Car Field (A):

* Open the Job Information table in Query Designer.

* Locate the Company Car field and expand it to access related fields and data.

* **In the Company Car Table, Select the Assignment Date Field (D):**

* Add the Company Car table from the related tables section to the query.

* Select the Assignment Date field from the Company Car table to include it in the query output.

NEW QUESTION # 78

You are using a pivot table in your canvas report but the report does NOT display the most recent data. What could be the reason?

- A. You are using a query with a static date filter.
- B. You are using a wrong People Scope.
- C. You are NOT using a template.
- D. You are using the percent of total option.

Answer: A

Explanation:

* Issue with Static Date Filters:

* If the query uses a static date filter (e.g., a specific range like "January 1, 2023, to March 31, 2023"), the report will not reflect the most recent data as the filter restricts results to the defined date range.

* Resolution:

* Update the query to use dynamic date filters (e.g., "Last 30 Days" or "Current Year") to ensure the pivot table includes the latest data.

NEW QUESTION # 79

Why is it important to consider the People step of the report definition when you share a table report with another user?

- A. The user may NOT have access to the fields in the report.
- B. The user may NOT have access to run reports.
- C. The user may NOT have access to the relevant report domain.
- D. The user may NOT have the same line of sight.

Answer: D

Explanation:

* People Step in Report Definition:

* The People step in a report determines the population (target group) of employees included in the report.

* When you share the report, the recipient's line of sight (determined by their Role-Based Permissions) will affect their ability to view the data.

* Example Scenario:

* If the report is configured to include data for a specific department, but the user does not have permission to view data for that department, they may see limited or no data.

NEW QUESTION # 80

You need to create a chart of type Indicator: Numeric Point that displays the following output:

count of employees with the gender male divided by the count of employee with the gender female.

The chart can then be filtered for different departments. What calculation is required to create the metric?

- A. In Chart Builder, use a calculation of type: Calculated Measure.
- B. In Chart Builder, use a calculation of type: Aggregation.
- C. In Chart Builder, use a calculation of type: Restricted Measure.
- D. In Query Builder, use a calculated column.

Answer: A

Explanation:

* Understanding the Chart Type

* Indicator: Numeric Point charts display a single numeric value based on a calculated metric.

* The desired output requires dividing the count of male employees by the count of female employees.

* Solution

* A Calculated Measure in Chart Builder is the appropriate method to perform this calculation within the context of the chart.

* Why Other Options are Incorrect

* A (Aggregation): Aggregation alone cannot handle the required calculation.

* B (Calculated Column): Calculated columns are created at the query level and are not specific to the chart.

* D (Restricted Measure): Restricted measures limit data based on conditions but do not perform calculations across dimensions.
