With our C-TS414-2023 learning materials, you can spend less time but learn more knowledge than others. C-TS414-2023 exam questions will help you reach the peak of your career. Just think of that after you get the C-TS414-2023 Certification, you will have a lot of opportunities of going to bigger and better company and getting higher incomes! what a brighter future!

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q65-Q70):

NEW QUESTION # 65

You want to create a quality notification for the Customer Complaint notification origin. Which of the following documents are available as standard in SAP S/4HANA to use as reference documents? Note: There are 2 correct answers to this question.

- A. Quotation
- B. Sales order
- C. Material document
- D. Delivery

Answer: B,D

Explanation:

For a customer complaint notification (type Q1, transaction QM01), standard reference documents include:

* Delivery (A): Outbound delivery documents (e.g., from VL01N) are commonly referenced, linking the complaint to a shipped item (SPRO > QM > Quality Notifications > Notification Creation).
* Sales Order (D): Sales orders (e.g., from VA01) can be referenced to trace the complaint back to the original customer order.
* Quotation (B): Quotations are pre-sales documents and not standard references for QM notifications.
* Material Document (C): Material documents (e.g., GR) are procurement-related, not typical for customer complaints.
Thus, "Delivery" and "Sales order" are the correct answers. References: SAP Help Portal - "Reference Documents in QM Notifications"; SAP S/4HANA QM User Guide - "Customer Complaints".

NEW QUESTION # 66

What must you do in configuration to enable defects recording during an inspection with inspection lots? Note : 2 correct answer

- A. Assign the notification type to the inspection type.
- B. Activate reference to Existing notifications.
- C. Activate the work flow template
- D. Define the defect report type

Answer: A,D

NEW QUESTION # 67

Which Status allows you to make a usage decision without using the force inspection competition function for all mandatory characteristic results.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION # 68

What are some SAP recommended guiding principles to achieve clean core operations? Note: There are 3 correct answers to this question.

- A. Establish regular housekeeping tasks and procedures
- B. Establish an organizational structure, technical foundation, and transformation methodology for clean core
- C. Integrate clean core practices in the end-to-end value process chain
- D. Establish release management
- E. Define roles and responsibilities as part of a process transformation office

Answer: A,B,C

Explanation:

SAP's clean core principles (as per S/4HANA Cloud strategy) aim for a standardized, upgrade-friendly system:

* Establish an Organizational Structure, Technical Foundation, and Transformation Methodology for Clean Core (A): This foundational principle ensures governance and methodology (e.g., SAP Activate) for clean core adoption.

* Integrate Clean Core Practices in the End-to-End Value Process Chain (B): Embedding clean core into business processes ensures minimal customization and maximum standard use.

* Establish Regular Housekeeping Tasks and Procedures (C): Ongoing maintenance (e.g., data cleanup) keeps the system lean and standard-compliant.

* Establish Release Management (D): While important, it's a broader IT practice, not a core clean core principle.

* Define Roles and Responsibilities as Part of a Process Transformation Office (E): Useful but not a primary SAP-defined clean core principle.

Thus, "A, B, C" are the correct answers. References: SAP Help Portal - "Clean Core Strategy"; SAP S/4HANA Cloud Best Practices - "Clean Core".

NEW QUESTION # 69

In the material master, at which organizational level do you create Quality management (QM) data for inspection type.

- A. Company code level
- B. Client level
- C. Business area level
- D. Plant level

Answer: D

NEW QUESTION # 70

.....
