

# SAP C-TS422-2023 Examcollection | C-TS422-2023 Valid Dumps Ebook

BONUS!!! Download part of DumpExam C-TS422-2023 dumps for free: [https://drive.google.com/open?id=1GsNjTrcJy3u4RI4hFUuLlwEq0OhEn\\_rx](https://drive.google.com/open?id=1GsNjTrcJy3u4RI4hFUuLlwEq0OhEn_rx)

A certificate may be important for someone who wants to get a good job through it, we have the C-TS422-2023 Learning Materials for you to practice, so that you can pass. C-TS422-2023 Learning materials of our company is pass rate guarantee and money back guarantee if you fail the exam. Free update is also available, you will have the latest version if you want after the purchasing. Our service staff is also very glad to help you if you have any questions.

## SAP C-TS422-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Lean Manufacturing in SAP S</li><li>• 4HANA: This section covers repetitive manufacturing master data, line load planning, and Kanban systems.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Master Data in SAP S</li><li>• 4HANA: This section covers the exploration of crucial production-related master data elements, with emphasis on bill of material, routing, and production version.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Managing Clean Core: This section covers the application of clean core principles to enhance business process agility, reduce adaptation efforts, and drive innovation in ERP systems.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>Introduction to SAP S</li> <li>4HANA Production Planning: This section covers an overview of production planning components, functions, and planning approaches. Exploration of emerging trends.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Introduction to SAP S</li> <li>4HANA Supply Chain Planning: This part covers the background and motivation for SAP S</li> <li>4HANA, its main components, business applications, and user experience strategy.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Demand Management in SAP S</li> <li>4HANA: This section covers a comparison of production methods in various manufacturing environments.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Production Orders in SAP S</li> <li>4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Process Orders in SAP S</li> <li>4HANA: This section covers an introduction to process order components, processing, and relevant master data objects. Overview of Good Manufacturing Practices (GMP) features.</li> </ul>

## Quiz 2026 SAP C-TS422-2023: SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing – Professional Examcollection

Different from other similar education platforms, the C-TS422-2023 study materials will allocate materials for multi-plate distribution, rather than random accumulation without classification. How users improve their learning efficiency is greatly influenced by the scientific and rational design and layout of the learning platform. The C-TS422-2023 study materials are absorbed in the advantages of the traditional learning platform and realize their shortcomings, so as to develop the C-TS422-2023 Study Materials more suitable for users of various cultural levels. If just only one or two plates, the user will inevitably be tired in the process of learning on the memory and visual fatigue, and the C-TS422-2023 study materials provided many study parts of the plates is good enough to arouse the enthusiasm of the user, allow the user to keep attention of highly concentrated.

### SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q19-Q24):

#### NEW QUESTION # 19

In your plant MRP is activated. Which options do you have to exclude a material from the MRP run? Note: There are 2 correct answers to this question.

- A. Use a specific MRP list.
- B. Use a specific material group.
- C. Use a specific material status.
- D. Use a specific MRP type.

**Answer: C,D**

Explanation:

In SAP S/4HANA, MRP can be configured to exclude certain materials from planning runs to optimize processing or reflect specific business needs. One method is to use a specific material status (B), maintained in the material master (e.g., under the MRP view). A status such as "Blocked for Procurement/Production" (configured in Customizing under Logistics - General > Material Master > Settings for Key Fields > Define Material Statuses) prevents the material from being planned in MRP, effectively excluding it from the run.

Another method is to assign a specific MRP type (D), such as "ND" (No Planning), in the material master (MRP 1 view). This MRP type instructs the system not to generate requirements or planned orders for the material, excluding it from MRP processing. Using a specific MRP list (A) is not a valid exclusion method, as the MRP list is an output of the MRP run, not a control mechanism. Similarly, using a specific material group (C) does not inherently exclude materials from MRP, as material groups are for classification and reporting, not MRP control. These options align with SAP's standard MRP configuration settings.

### NEW QUESTION # 20

During production order creation, several valid production versions are found. How does the system choose the production version?

- A. Alphanumeric or quota arrangement
- B. Lot size or material cost
- C. **Validity period or sales order**
- D. Planned order or material number

**Answer: C**

Explanation:

The system chooses the production version based on the validity period and the sales order. The validity period determines whether the production version is valid for the planned start date of the production order. The sales order determines whether the production version is assigned to a specific sales order item or not. If there are multiple production versions that meet these criteria, the system chooses the one with the lowest alphanumeric value. Reference: [SAP S/4HANA Production Planning and Manufacturing Certification Guide], page 113; [SAP Help Portal: Production Version]

### NEW QUESTION # 21

Which of the following automation options can you use for production orders? Note: There are 2 correct answers to this question.

- A. You can use trigger points to automatically create rework orders via confirmations.
- B. You can use mass processing to set production orders to technically complete.
- C. You can use the production scheduling profile to automatically set orders to technically complete.
- D. You can use mass processing to read PP master data for production orders.

**Answer: A,B**

### NEW QUESTION # 22

Where do you maintain the work center that represents the production line for repetitive manufacturing? Note: There are 2 correct answers to this question.

- A. Repetitive manufacturing profile
- B. **Routing**
- C. Production cost collector
- D. Production version

**Answer: B,D**

Explanation:

In SAP S/4HANA repetitive manufacturing, the production line is represented by a work center, and this is maintained in:

\* Production version(B): The production version (material master, MRP 4 view, transaction C223) links a material to a specific production line by referencing a work center (via the routing or rate routing).

The "Production Line" field explicitly identifies the work center used for repetitive production, tying it to the planning table (MF50).

\* Routing(D): In repetitive manufacturing, a rate routing (transaction CA21) or standard routing (CA01) defines the operations and assigns the work center (field: Work Center) that represents the production line. This work center is then referenced in the production version for planning and execution.

Production cost collector(A) (transaction KKF6N) collects costs for repetitive production but doesn't define the work center-it uses the production version's data. Repetitive manufacturing profile(C) (Customizing, transaction OSP2) controls REM settings (e.g., backflushing), not the specific work center assignment. This is per SAP's REM master data setup.

### NEW QUESTION # 23

In your plant MRP is activated.

Which options do you have to exclude a material from the MRP run? Note: There are 2 correct answers to this question.

- A. Use a specific MRP list.
- B. Use a specific material group.

- C. Use a specific material status.
- D. Use a specific MRP type.

Answer: C,D

## NEW QUESTION # 24

The dynamic society prods us to make better. Our services on our C-TS422-2023 exam questions are also dependable in after-sales part with employees full of favor and genial attitude towards job. So our services around the C-TS422-2023 training materials are perfect considering the needs of exam candidates all-out. They bravely undertake the duties. Our staff knows our C-TS422-2023 study quiz play the role of panacea in the exam market which aim to bring desirable outcomes to you.
