

SAP C-TS422-2023 passing score, C-TS422-2023 exam review

DOWNLOAD the newest Actual4dump C-TS422-2023 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1MwmfKGD9LDzqBzP0Mx_NiWK6E1cRMLS

Using actual SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C-TS422-2023) dumps PDF is the best way to make your spare time useful for the C-TS422-2023 test preparation. We also provide you with customizable desktop SAP C-TS422-2023 practice test software and web-based SAP C-TS422-2023 Practice Exam. You can adjust timings and C-TS422-2023 questions number of our C-TS422-2023 practice exams according to your training needs.

Even if you have received a lot of services, you will still be surprised by the service of our C-TS422-2023 simulating exam. Our company takes great care in every aspect from the selection of staff, training, and system setup. No matter what problems of the C-TS422-2023 Practice Questions you encounter, our staff can solve them for you right away and give you the most professional guide. And our service can help you 24/7 on the the C-TS422-2023 exam materials.

Here's The Proven And Quick Way To Get Success In C-TS422-2023 Exam

Once you decide to pass the C-TS422-2023 exam and get the certification, you may encounter many handicaps that you don't know how to deal with, so, you may think that it is difficult to pass the C-TS422-2023 exam and get the certification. In order to help you solve these problem and help you pass the exam easy, we compiled such a C-TS422-2023 Exam Torrent. We can promise that you will have no regret buying our C-TS422-2023 exam dumps. Our C-TS422-2023 exam questions have a high pass rate as 99% to 100%, you will pass with it for sure.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q26-Q31):

NEW QUESTION # 26

Under what circumstances can you change the material type for a material if stocks, reservations, or purchasing documents exist?

Note: There are 2 correct answers to this question.

- A. The same base unit of measure is used.
- B. The quantity and value updates are the same.
- C. The same account category is used.
- D. The same batch management level is used.

Answer: A,B

Explanation:

In SAP S/4HANA, changing the material type (transaction MMAM) is restricted if stocks, reservations, or purchasing documents exist, but it's allowed under specific conditions:

* The quantity and value updates are the same(A): The old and new material types must have identical quantity and value update settings in their valuation areas (configured in OMS2, Material Type Customizing). For example, both must update quantity and value (e.g., "FERT" to "HALB"), or neither (e.g., "NLAG" to "DIEN"). If these differ, the change is blocked due to inconsistencies in stock valuation.

* The same base unit of measure is used(C): The base unit (material master, Basic Data 1 view) must remain unchanged between material types. Changing it (e.g., from "PC" to "KG") would invalidate existing stock or document quantities, so the system requires consistency to allow the type change.

The same batch management level(B) (e.g., plant or material level, configured in OMCT) is not a strict requirement-batch settings can differ as long as other conditions are met. The same account category(D) (e.g., General Ledger account determination) influences posting but isn't a prerequisite-account assignment can be adjusted post-change. This is per SAP's material type change rules.

NEW QUESTION # 27

How are dependent requirements for assemblies created?

Note: There are 2 correct answers to this question.

- A. They are only created for multilevel bill of material (BOM) structures.
- B. They are created with exact times in Advanced Planning.
- C. They are created together with the independent requirement for the finished product.
- D. They are created on assembly level during the planning run.

Answer: B,D

NEW QUESTION # 28

What are the options if the Dispatched operation status is set for a production order operation?

Note: There are 2 correct answers to this question.

- A. You can reschedule the operation using infinite scheduling in a planning table
- B. You can reschedule the operation in the Manage Production Operations app.
- C. You can reschedule the operation using finite scheduling in a planning table.
- D. You can reschedule the operation using midpoint scheduling in a planning table.

Answer: B,C

Explanation:

If the operation of a production order is dispatched, the DSPT Dispatched status is set for the operation. This means that the operation has been assigned to a resource and scheduled with a start and end date and time. The options to reschedule the operation are as follows:

You can reschedule the operation using finite scheduling in a planning table. Finite scheduling considers the capacity availability of the resources and the dependencies between the operations. You can use the planning table to manually drag and drop the operation to a different time slot or resource, or use the automatic dispatching function to optimize the scheduling of the operation. Finite

scheduling updates the DSPT status and the dates and times of the operation.

You can reschedule the operation in the Manage Production Operations app. This app allows you to view and edit the production orders and operations in SAP S/4HANA. You can change the start and end date and time of the operation, as well as the resource, in the app. However, the app does not check the capacity availability of the resources or the dependencies between the operations. Therefore, you need to ensure that the changes are feasible and consistent. The app updates the DSPT status and the dates and times of the operation. NEW QUESTION # 29

Where does the system check master data selection settings during the creation of planned orders or production orders? Note: There are 3 correct answers to this question.

- A. In the bill of material (BOM)
- B. In the work centers
- C. In the production version
- D. In the MRP controller
- E. In the routing

Answer: A,D,E

Explanation:

In SAP S/4HANA, during the creation of planned orders or production orders, the system relies on specific master data to determine the production process, components, and operations. The system checks the following:

* In the bill of material (BOM)(C): The BOM (maintained in transaction CS01/CS02) defines the components required for production. MRP explodes the BOM to generate dependent requirements for planned orders, and production orders inherit this structure. The BOM's validity (e.g., date, lot size) and usage (e.g., production) are verified during order creation.

* In the MRP controller(D): The MRP controller (material master, MRP 1 view, field: MRP Controller) influences master data selection indirectly through its configuration in Customizing (e.g., Production > Material Requirements Planning > Master Data > Define MRP Controllers). It can determine planning parameters and production versions, affecting order creation.

* In the routing(E): The routing (maintained in transaction CA01/CA02) specifies the operations, sequence, and work centers for production. During order creation, the system selects the routing to define the production process, ensuring the correct operations are assigned to the order.

In the production version(A) is critical for linking BOMs and routings, but the system checks within the BOM and routing directly once the version is selected, not the version itself as a "check location." In the work centers (B) provides capacity and scheduling data, but the system does not check master data selection settings there- it uses the routing to reference work centers. This aligns with SAP's production planning master data integration.

NEW QUESTION # 30

Which of the following are possible configuration steps when setting up the alert monitor in Advanced Planning? Note: There are 2 correct answers to this question.

- A. Create an object selection variant for production planning related alerts.
- B. Assign the overall profile to the authorization profile.
- C. Assign the alert profile to the overall profile.
- D. Create an object selection variant for alerts according to the priority of ATP categories.

Answer: A,C

NEW QUESTION # 31

.....

The Actual4dump is committed to helping you crack the SAP C-TS422-2023 certification exam on the first attempt. To get this objective we offer the most probable, real, and updated SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing exam dumps in three user-friendly formats. These formats of SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing in Procurement and Supply SAP updated practice material are, SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing C-TS422-2023 in Procurement and Supply SAP PDF file, desktop SAP C-TS422-2023 practice test software, and SAP C-TS422-2023 web-based practice test.

Pass Leader C-TS422-2023 Dumps: <https://www.actual4dump.com/SAP/C-TS422-2023-actualtests-dumps.html>

There is a bunch of considerate help we are willing to offer on our C-TS422-2023 learning questions, SAP C-TS422-2023 Actual Tests The salary scale will differ for a professional degree holder, Doing them again and again, you enrich your knowledge and maximize chances of an outstanding C-TS422-2023 exam success, In contemporary society, information is very important to the development of the individual and of society C-TS422-2023 practice test.

And failing to do so can have disastrous consequences, These products are best C-TS422-2023 available on the world of internet and these products will facilitate you greatly in your study for the SAP Certified Application Specialist Implementation updated video lectures.

Simplified C-TS422-2023 Guide Torrent Easy to Be Mastered for your exam

There is a bunch of considerate help we are willing to offer on our C-TS422-2023 learning questions, The salary scale will differ for a professional degree holder.

Doing them again and again, you enrich your knowledge and maximize chances of an outstanding C-TS422-2023 exam success, In contemporary society, information is very important to the development of the individual and of society C-TS422-2023 practice test.

Give you benefits & help you pass.
