Dumps C-TS470-2412 Torrent - Exam C-TS470-2412 Objectives

You may think choosing C-TS470-2412 practice materials at the first time is a little bit like taking gambles. However, you can be assured by our C-TS470-2412 learning quiz with free demos to take reference, and professional elites as your backup. They are a

bunch of censorious elites who do not compromise on any errors happened on our C-TS470-2412 Training Materials. So their accuracy rate is unbelievably high and helped over 98 percent of exam candidates pass the C-TS470-2412 exam.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q65-Q70):

NEW QUESTION # 65
What can you display in the app Find Technical Object? Note: There are 3 correct answers to this question.

- A. Installation information of the technical objects
- B. Planned and call dates for recurring service activities
- C. Service costs of the technical objects
- D. Measurement documents and measuring points of the technical objects
- E. System and user statuses of the technical objects

Answer: A,D,E

Explanation:
TheFind Technical Objectapp in SAP S/4HANA Cloud Private Edition, Service provides details about technical objects (e.g., equipment, functional locations). The correct answers areA, B, C. Let's explore.
App Functionality:
This Fiori app allows users to search and view technical object data.
* Installation information (A):Shows where the object is installed (e.g., functional location hierarchy).
* Measurement documents and measuring points (B):Displays recorded measurements (e.g., temperature) and their points.
* System and user statuses (C):Lists statuses (e.g., "INST" for installed, user status "In Repair").
Why Not the Others?
* D:Service costs are in financial apps (e.g., Service Actuals), not this app.
* E:Planned/call dates are in maintenance plan apps, not here.
Example:
Search equipment "E001" # See installation (FL-001), measuring point (Temp), status (INST).
"The Find Technical Object app displays installation information, measurement documents and points, and system/user statuses."

NEW QUESTION # 66
Which of the following is the correct sequence when creating a hierarchical structure in organizational management?

- A. Position # User # Organizational unit # Holder
- B. Organizational unit # Position # Holder # User
- C. Organizational unit # Holder # User # Position
- D. Position # Holder # User # Organizational unit

Answer: B

Explanation:
In SAP S/4HANA Organizational Management (integrated with HCM or service structures):
* Organizational unit # Position # Holder # User: The sequence starts with defining an organizational unit (e.g., department), then positions within it (e.g., service technician), followed by assigning holders (employees) to positions, and finally linking users (system logins) to holders. This hierarchy is built using transaction PPOME or similar tools.
* Other sequences disrupt the logical top-down structure required for organizational management.This aligns with SAP's standard organizational setup process."Create organizational units, then positions, assign holders, and link users in that order for a hierarchical structure." (SAP Help Portal, Organizational Management).

NEW QUESTION # 67
Which of the following can you assign to a service item category? Note: There are 2 correct answers to this question.

- A. Rejection profile
- B. Date profile
- C. Status object profile
- D. Text determination procedure

Answer: B,D

Explanation:
Service item categories in SAP S/4HANA Service (e.g., SRVI for service items) control the behavior of items in service documents. Assignable objects include:
* Text determination procedure: Defines how texts (e.g., descriptions, notes) are automatically populated or managed for the item, configured in Customizing.
* Date profile: Specifies date rules and milestones (e.g., start/end dates) for the service item, critical for scheduling and execution.
* Rejection profile: Not a standard assignment; rejection is managed via status or reasoncodes, not profiles at the item category level.
* Status object profile: Status profiles are typically assigned to transaction types or item categories for lifecycle management, but not as "status object profiles" in this context. These settings are part of service transaction Customizing. "Assign text determination procedures and date profiles to service item categories to control item behavior." (SAP Help Portal, Service Item Category Configuration).

NEW QUESTION # 68
What are steps included in the planning and execution of a recurring inspection? Note: There are 2 correct answers to this question.

- A. A service order is automatically generated by scheduling the maintenance plan for the inspection.
- B. A service order is automatically generated when activating the maintenance plan for the inspection.
- C. When accepting a service order quotation, the system automatically creates a maintenance plan.
- D. A completion marks a service order and its corresponding planned date in the maintenance plan as finished.

Answer: A,D

Explanation:
A recurring inspection in SAP S/4HANA Cloud Private Edition, Service uses a maintenance plan to schedule periodic checks. The correct steps are A and B. Let's explore this in detail.
Recurring Inspection Overview:
This process involves scheduling inspections via a maintenance plan, generating service orders, and completing them to update the plan.
* A completion marks a service order and its corresponding planned date in the maintenance plan as finished (A): When a service order (the call object) is completed (e.g., status "Technically Completed"), the system updates the maintenance plan, marking the corresponding planned date as finished. This shifts the scheduling to the next cycle (e.g., via transaction IP10).
* A service order is automatically generated by scheduling the maintenance plan for the inspection (B): Scheduling the maintenance plan (e.g., via IP10 or a background job) generates a service order based on the plan's cycle and call horizon. This order contains the inspection tasks.
Why Not the Others?
* C: Accepting a quotation creates a contract or order, not a maintenance plan, which is a separate planning object.
* D: Activating a maintenance plan sets it up but doesn't generate orders; scheduling does that.
Detailed Flow:
* Maintenance plan created with inspection cycle (e.g., every 6 months).
* Scheduling (IP10) generates a service order when the call date is reached.
* Order completed # Plan updated, next call scheduled.
"Recurring inspections involve scheduling a maintenance plan to automatically generate service orders, with completion updating the plan's planned dates."

NEW QUESTION # 69
How do you ensure that product-specific prices are applied in a service order based on its assigned service contract?

- A. Maintain price lists
- B. Maintain price agreements
- C. Maintain billing plan
- D. Maintain contract price

Answer: B

Explanation:
To apply product-specific prices from a service contract to a service order:

* Maintain price agreements: Price agreements in the contract (e.g., condition type PR00) define product-specific prices, which are copied to linked service orders during creation or item entry.
* Maintain billing plan: Controls billing timing, not pricing.
* Maintain contract price: A general term, not a specific mechanism.
* Maintain price lists: Used in sales, not contract-specific pricing in service.This is part of pricing condition configuration in scope item 3MO."Price agreements in the service contract ensure product- specific prices are applied to service orders." (SAP Help Portal, Service Pricing).

NEW QUESTION # 70

......

Since our company's establishment, we have devoted mass manpower, materials and financial resources into C-TS470-2412 exam materials and until now, we have a bold idea that we will definitely introduce our C-TS470-2412 study materials to the whole world and make all people that seek fortune and better opportunities have access to realize their life value. Our C-TS470-2412 Practice Questions, therefore, is bound to help you pass though the C-TS470-2412 exam and win a better future.

Dumps C-TS470-2412 Torrent: https://www.dumpsfree.com/C-TS470-2412-valid-exam.html

It means choosing our Dumps C-TS470-2412 Torrent - SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service valid answers is just a beginning to your success, But passing SAP certification C-TS470-2412 exam is not so simple, Many people may complain that we have to prepare for the C-TS470-2412 test but on the other side they have to spend most of their time on their most important things such as their jobs, learning and families, Our C-TS470-2412 practice materials are really reliable.

A Current and Comprehensive Introduction to Visual Basic Programming, C-TS470-2412 This preserves the spacing between tiles if the bounding box has changed due to editing the base tile.
