Only 20-30 hours are needed for you to learn and prepare our C_ACDET_2506 test questions for the exam and you will save your time and energy. No matter you are the students or the in-service staff you are busy in your school learning, your jobs or other important things and can't spare much time to learn. But you buy our C_ACDET_2506 exam materials you will save your time and energy and focus your attention mainly on your most important thing. You only need several hours to learn and prepare for the exam every day. We choose the most typical questions and answers which seize the focus and important information and the questions and answers are based on the real exam. So you can master the most important C_ACDET_2506 Exam Torrent in the shortest time and finally pass the exam successfully.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Topic 2	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

During review, you can contact with our after-sales if there are any problems with our C_ACDET_2506 exam torrent. They will help you 24/7 all the time. These services assure you avoid any loss. Besides, our passing rate of C_ACDET_2506 practice materials has reached up to 98 to 100 percent up to now, so you cannot miss this opportunity. Besides, free updates of C_ACDET_2506 Exam Torrent will be sent to your mailbox freely for one year, hope you can have a great experience during usage of our practice materials.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q40-Q45):

NEW QUESTION # 40

A French translation of a custom field label needs to be updated.
Where do you update it?

- A. Field Configuration Label
- B. Customization Manager → Views
- C. Layout tab
- **D. AML & Translations Upload**

Answer: D

NEW QUESTION # 41

Which of the following considerations are important when creating custom fields? Note: There are 2 correct answers to this question.

- A. The data type of a field can be dynamically changed, depending on data type availability
- B. Published field changes can be reverted via Un-publish to free up memory
- **C. When a field has been created and published, that field type has been consumed from the number of available fields on the class**
- **D. There's a limit to the number of fields, by data type, that can be added to a class**

Answer: C,D

NEW QUESTION # 42

During which SAP Activate Methodology phase do you define the customer requirements?

- A. Design
- B. Discover
- C. Define
- D. Explore

Answer: D

NEW QUESTION # 43

The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations. What should be used to hold the valid storage locations?

- A. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.
- B. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.
- C. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.
- D. You should create a new Flex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location.

Answer: D

Explanation:

For managing searchable lists of storage locations with associated attributes like addresses, the best SAP Ariba practice is to use a Flex Master Data (FMD) Template. This allows you to model the storage locations and related information dynamically. After creating the FMD template and loading the data (e.g., from CSV imports), you can create a custom field referencing the FMD type. This approach enables users to search, filter, and select valid locations efficiently, while also allowing the underlying data to be maintained separately and updated independently of the configuration.

Using text fields with validation or enumerations is insufficient for large or dynamic datasets and doesn't scale well. Date fields are unrelated to this scenario.

FMD provides a scalable and flexible solution for complex master data requirements like storage locations.

NEW QUESTION # 44

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? Note: There are 3 correct answers to this question.

- A. Discard any other packages that appear in My Action Items.
- B. Publish the form template within the test site in order to add the form fields in the package.
- C. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.
- D. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- E. Make sure you update the string resource files in the production site before migrating the corresponding field configurations from test to production site.

Answer: C,D,E

NEW QUESTION # 45

.....

Our C_ACDET_2506 exam braindumps are set high standards for your experience. That is the reason why our C_ACDET_2506 training questions gain well brand recognition and get attached with customers all these years around the world.
