

SAP C_AIG_2412 New Dumps Ppt & C_AIG_2412 Reliable Test Sample

P.S. Free & New C_AIG_2412 dumps are available on Google Drive shared by VCE4Plus: <https://drive.google.com/open?id=1khvC2PdvM4-OQMmHX7C0BaXfw6bhA9s>

Market is a dynamic place because a number of variables keep changing, so is the practice materials field of the C_AIG_2412 practice exam. Our C_AIG_2412 exam dumps are indispensable tool to pass it with high quality and low price. Once you decide to buy, you will have many benefits like free update lasting one-year and convenient payment mode. We will inform you immediately once there are latest versions of C_AIG_2412 Test Question released. And if you get any questions, please get contact with us, our staff will be online 24/7 to solve your problems all the way.

Believe in yourself, choosing the C_AIG_2412 study guide is the wisest decision. So far, the C_AIG_2412 practice materials have almost covered all the official test of useful C_AIG_2412 exam materials, before our products on the Internet, all the C_AIG_2412 study materials are subject to rigorous expert review, so you do not have to worry about quality problems of our latest C_AIG_2412 Exam Torrent, focus on the review pass the C_AIG_2412 qualification exam. I believe that through these careful preparation, you will be able to pass the exam.

SAP Certified Associate - SAP Generative AI Developer Verified Practice Cram & C_AIG_2412 Study Pdf Dumps & SAP Certified Associate - SAP Generative AI Developer Exam Training Dumps

The passing rate of our C_AIG_2412 study materials is the issue the client mostly care about and we can promise to the client that the passing rate of our product is 99% and the hit rate is also high. Our study materials are selected strictly based on the real C_AIG_2412 exam and refer to the exam papers in the past years. Our expert team devotes a lot of efforts on them. We also update frequently to guarantee that the client can get more learning C_AIG_2412 resources and follow the trend of the times. So if you use our C_AIG_2412 study materials you will pass the C_AIG_2412 test with high success probability.

SAP C_AIG_2412 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.

Topic 2	<ul style="list-style-type: none"> SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.
Topic 3	<ul style="list-style-type: none"> Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.
Topic 4	<ul style="list-style-type: none"> SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q38-Q43):

NEW QUESTION # 38

Which of the following are features of the SAP AI Foundation? Note: There are 2 correct answers to this question.

- A. Joule integration in SAP SuccessFactors
- B. AI runtimes and lifecycle management**
- C. Ready-to-use AI services**
- D. Open source AI model repository

Answer: B,C

NEW QUESTION # 39

How do resource groups in SAP AI Core improve the management of machine learning workloads?

Note: There are 2 correct answers to this question.

- A. They provide isolation for datasets and AI artifacts.**
- B. They enhance pipeline execution speeds through workload distribution.
- C. They ensure workload separation for different tenants or departments.**
- D. They enable simultaneous orchestration of Kubernetes clusters.

Answer: A,C

NEW QUESTION # 40

You want to extract useful information from customer emails to augment existing applications in your company.

How can you use generative-ai-hub-sdk in this context?

- A. Train custom models based on the mail data.
- B. Generate JSON strings based on extracted information**
- C. Generate random email content and send them to customers.
- D. Generate a new SAP application based on the mail data.

Answer: B

Explanation:

The generative-ai-hub-sdk in SAP's Generative AI Hub enables developers to interact with large language models (LLMs) for various tasks, including information extraction and data formatting.

1. Extracting Information from Customer Emails:

* Natural Language Processing (NLP): By leveraging LLMs, the SDK can process unstructured email content to identify and extract pertinent information, such as customer inquiries, sentiments, or intents.

2. Generating JSON Strings:

* Structured Data Output: After extracting the necessary information, the SDK can format the data into JSON strings. This structured format is essential for integrating the extracted information into existing applications, facilitating seamless data exchange and processing.

3. Integration into Existing Applications:

* Application Enhancement: The JSON-formatted data can be utilized to augment existing applications, such as customer relationship management (CRM) systems, by providing insights derived from customer emails, thereby improving decision-making and customer interactions.

NEW QUESTION # 41

Which of the following sequence of steps does SAP recommend you use to solve a business problem using generative AI hub?

- A. Create a basic prompt in SAP AI Launchpad
- B. Create a basic prompt in SAP AI Launchpad
- C. Create a basic prompt in SAP AI Launchpad

Answer: C

NEW QUESTION # 42

What are some functionalities provided by SAP AI Core? Note: There are 3 correct answers to this question.

- A. Integration of AI services with business applications using a standardized API
- B. Monitoring and retraining models in SAP AI Core
- C. Continuous delivery and tenant isolation for scalability
- D. Orchestration of AI workflows such as model training and inference
- E. Management of SAP S/4HANA cloud infrastructure

Answer: A,C,D

Explanation:

You're asking about the key functionalities of SAP AI Core. Here's a breakdown of the correct answers:

* A. Integration of AI services with business applications using a standardized API: SAP AI Core provides a standardized way to connect AI models and services to your existing business applications.

This means you can easily integrate AI capabilities into your core business processes, regardless of the specific AI technology you're using. This is done through APIs (Application Programming Interfaces), which allow different software systems to communicate with each other.

* B. Continuous delivery and tenant isolation for scalability:

* Continuous delivery: AI Core supports continuous delivery, which means you can quickly and easily deploy and update your AI models. This allows you to adapt to changing business needs and keep your AI solutions up-to-date.

* Tenant isolation: AI Core provides tenant isolation, which is important for security and scalability. This means that different users or departments within your organization can have their own separate AI environments, preventing interference and ensuring data privacy.

* C. Orchestration of AI workflows such as model training and inference: AI Core helps you manage the entire lifecycle of your AI models, including:

* Training: Automating the process of training your AI models on large datasets.

* Inference: Deploying your trained models and using them to make predictions or generate insights.

* Monitoring: Tracking the performance of your AI models over time.

Why the other options are incorrect:

* D. Management of SAP S/4HANA cloud infrastructure: While AI Core can be used with S/4HANA, it's not specifically designed to manage the cloud infrastructure of S/4HANA. That's handled by other SAP services.

* E. Monitoring and retraining models in SAP AI Core: While AI Core supports monitoring, the retraining of models is typically done using other tools and services within the SAP AI ecosystem.

NEW QUESTION # 43

VCE4Plus's SAP C_AIG_2412 exam training material is the best training materials on the Internet. It is the leader in all training materials. It not only can help you to pass the exam, you can also improve your knowledge and skills. Help you in your career in your advantage successfully. As long as you have the SAP C_AIG_2412 Certification, you will be treated equally by all countries.
