

# SAP C\_BW4H\_2505 Exam Questions are Real, Valid, and Verified by Experts

P.S. Free & New C\_BW4H\_2505 dumps are available on Google Drive shared by ExamCost: <https://drive.google.com/open?id=1NbJXmP3HPab63UgseWHLL2H8Bw497pPw>

In order to make life better, attending SAP certification examinations will be the best choice for every IT workers. Passing C\_BW4H\_2505 exam and obtaining a certification help candidates get salary raise and position promotion opportunities. It will be a fast and convenient road to success for the certification with our SAP C\_BW4H\_2505 Practice Test Engine. As for our guaranteed pass policy, our products are too good a change to miss for ambitious people.

## SAP C\_BW4H\_2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• SAP BW</li><li>• 4HANA Data Flow: This section of the exam measures the practical ability of SAP Consultants to load data within the SAP BW</li><li>• 4HANA environment. It assesses familiarity with data movement and transformation processes across different layers of the system.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• SAP Analytics Tools and SAP Analytics Cloud: This section evaluates the skills of SAP Consultants in using tools like SAP Analytics Cloud, Lumira, and Analysis for Office to visualize and interpret data. It focuses on the consultant's ability to apply business intelligence tools within the SAP ecosystem.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• SAP BW Query Design: This section of the exam assesses the ability of Data Engineers to create and run queries using SAP BW</li><li>• 4HANA. It evaluates how well candidates can work with query components to retrieve and structure data effectively for reporting and analysis.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Fundamentals: This section of the exam measures the foundational understanding of SAP Consultants and covers essential terms and concepts related to SAP BW</li> <li>• 4HANA and SAP Business Data Cloud. It focuses on the core framework and architecture necessary to navigate and work with these platforms.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Data Acquisition into SAP BW</li> <li>• 4HANA: This section tests how Data Engineers manage data integration into SAP BW</li> <li>• 4HANA from multiple sources. It covers essential knowledge of tools and processes used for data extraction, transformation, and loading into the SAP environment.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Native SAP HANA Modeling: This section evaluates the ability of SAP Consultants to describe and apply native modeling options in SAP HANA. It emphasizes understanding how to build optimized data structures directly within the HANA platform.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• SAP BW</li> <li>• 4HANA Project and the Modeling Process: This section of the exam assesses how Data Engineers guide and contribute to SAP BW</li> <li>• 4HANA projects. It includes knowledge of modeling workflows, project lifecycle stages, and collaboration strategies within project teams.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• SAP BW</li> <li>• 4HANA Modeling: This section targets the skills of Data Engineers in selecting appropriate modeling options and applying best practices like LSA++ within SAP BW</li> <li>• 4HANA. It focuses on designing scalable, high-performing data models.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• InfoObjects and InfoProviders: This section tests the knowledge of Data Engineers in working with InfoObjects and InfoProviders in SAP BW</li> <li>• 4HANA. It involves handling data structures used for organizing, storing, and accessing analytical data.</li> </ul>

## SAP C\_BW4H\_2505 Exam Questions - Pass Your Exam In One Go

SAP C\_BW4H\_2505 certification exam is among those popular IT certifications. It is also the dream of ambitious IT professionals. This part of the candidates need to be fully prepared to allow them to get the highest score in the C\_BW4H\_2505 Exam, make their own configuration files compatible with market demand.

## SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q31-Q36):

### NEW QUESTION # 31

In a BW query with cells you need to overwrite the initial definition of a cell. Which cell types can you use?

Note: There are 2 correct answers to this question.

- A. Formula cell
- B. Selection cell
- C. Reference cell
- D. Help cell

**Answer: A,B**

Explanation:

In SAP BW (Business Warehouse), when working with queries that include cells, you can define and manipulate these cells to meet specific reporting requirements. Cells in a BW query are used to display data based on certain conditions or calculations. If you need to overwrite the initial definition of a cell, you have specific options available.

\* Formula Cell: A formula cell allows you to perform calculations using other cells or key figures within the query. You can define complex formulas to derive new values. When you need to overwrite the initial definition of a cell, you can use a formula cell to

redefine how the value is calculated. This flexibility makes it possible to change the behavior of the cell dynamically based on your requirements.

\* **Selection Cell:** A selection cell enables you to apply specific filters or selections to the data displayed in the cell. By defining a selection cell, you can control which data is included or excluded from the cell's output. Overwriting the initial definition of a cell can involve changing the selection criteria applied to the cell, thus altering the subset of data it represents.

\* **Reference Cell:** A reference cell simply points to another cell and displays its value. It does not allow for any overwriting or modification of the initial definition because it merely references an existing cell without introducing new logic or conditions.

\* **Help Cell:** Help cells are used to provide additional information or context within a query but do not participate in calculations or selections. They cannot be used to overwrite the initial definition of a cell since their purpose is purely informational.

\* **Formula Cells:** These are ideal for recalculating or redefining the value of a cell based on custom logic or mathematical operations. For example, if you initially defined a cell to show revenue, you could overwrite this definition by creating a formula cell that calculates profit instead.

\* **Selection Cells:** These are perfect for applying different filters or conditions to alter the dataset represented by the cell. For instance, if a cell initially shows sales data for all regions, you can overwrite this by specifying a selection cell that only includes data from a particular region.

**Cell Types Overview: Why Formula and Selection Cells?** SAP Data Engineer - Data Fabric Context: In the broader context of SAP Data Engineer - Data Fabric, understanding how to manipulate and redefine cells within BW queries is crucial for building flexible and dynamic reports. The Data Fabric concept emphasizes seamless integration and transformation of data across various sources, and mastering query design- including cell manipulation- is essential for effective data modeling and reporting.

For more detailed information, you can refer to official SAP documentation on BW Query Design and Cell Definitions, as well as training materials provided in SAP Learning Hub related to SAP BW and Data Fabric implementations.

By selecting Formula cell and Selection cell, you ensure that you have the necessary tools to effectively overwrite and redefine cell behaviors within your BW queries.

\* SAP Learning Hub - BW Query with Cells

### NEW QUESTION # 32

You want to build an SAP HANA HDI calculation view of data category CUBE, but you get a "no measure defined" error. For the business requirement, a measure does not make sense. Besides changing the data category to DIMENSION, what do you have to do?

- A. Switch from an aggregation node to a projection node.
- B. Switch from a projection node to a star join node.
- C. Switch from an aggregation node to a star join node.
- **D. Switch from a projection node to an aggregation node.**

**Answer: D**

### NEW QUESTION # 33

Which of the following factors apply to Model Transfer in the context of Semantic Onboarding? Note: There are 2 correct answers to this question.

- A. SAP BW bridge Model Transfer leverages BW Modeling tools to import entities into native SAP Datasphere.
- B. SAP BW/4HANA Model Transfer leverages BW Queries for model generation in SAP Datasphere.
- **C. SAP S/4HANA Model Transfer leverages ABAP CDS views for model generation in SAP Datasphere.**
- **D. Model Transfer can be leveraged from an On-premise environment to the cloud the other way around.**

**Answer: C,D**

**Explanation:**

\* **Semantic Onboarding:** Semantic Onboarding refers to the process of transferring data models and their semantics from one system to another (e.g., from on-premise systems like SAP BW/4HANA or SAP S/4HANA to cloud-based systems like SAP Datasphere). This ensures that the semantic context of the data is preserved during the transfer.

\* **Model Transfer:** Model Transfer involves exporting data models from a source system and importing them into a target system. It supports seamless integration between on-premise and cloud environments.

\* **SAP Datasphere:** SAP Datasphere (formerly known as SAP Data Warehouse Cloud) is a cloud-based solution for data modeling, integration, and analytics. It allows users to import models from various sources, including SAP BW/4HANA and SAP S/4HANA.

\* **A. SAP BW/4HANA Model Transfer leverages BW Queries for model generation in SAP Datasphere:**

This statement is incorrect. While SAP BW/4HANA Model Transfer can transfer data models to SAP Datasphere, it does not rely

on BW Queries for model generation. Instead, it transfers the underlying metadata and structures (e.g., InfoProviders, transformations) directly.

\* B. Model Transfer can be leveraged from an On-premise environment to the cloud the other way around: This statement is incorrect. Model Transfer supports bidirectional movement of models between on-premise systems (e.g., SAP BW/4HANA) and cloud-based systems (e.g., SAP Datasphere). This flexibility allows organizations to integrate their on-premise and cloud landscapes seamlessly.

\* C. SAP BW bridge Model Transfer leverages BW Modeling tools to import entities into native SAP Datasphere: This statement is incorrect. The SAP BW bridge is primarily used to connect SAP BW /4HANA with SAP Datasphere, but it does not leverage BW Modeling tools to import entities into SAP Datasphere. Instead, it focuses on enabling real-time data replication and virtual access.

\* D. SAP S/4HANA Model Transfer leverages ABAP CDS views for model generation in SAP Datasphere: This statement is incorrect. SAP S/4HANA Model Transfer uses ABAP Core Data Services (CDS) views to generate models in SAP Datasphere. ABAP CDS views encapsulate the semantic definitions of data in SAP S/4HANA, making them ideal for transferring models to the cloud.

\* B: Model Transfer supports bidirectional movement between on-premise and cloud environments, ensuring flexibility in hybrid landscapes.

\* D: ABAP CDS views are a key component of SAP S/4HANA's semantic layer, and they play a critical role in transferring models to SAP Datasphere.

References: SAP Datasphere Documentation: The official documentation outlines the capabilities of Model Transfer and its support for bidirectional movement.

SAP Note on Semantic Onboarding: Notes such as 3089751 provide details on how models are transferred between systems.

SAP Best Practices for Hybrid Integration: These guidelines highlight the use of ABAP CDS views for model generation in SAP Datasphere.

By leveraging Model Transfer, organizations can ensure seamless integration of their data models across on-premise and cloud environments

#### NEW QUESTION # 34

Which objects in SAP BW/4HANA allow you to use both fields InfoObjects in their definition? Note: There are 3 correct answers to this question.

- A. InfoObject type Key Figure
- B. Hierarchy
- C. DataStore Object (advanced)
- D. Composite Provider
- E. Open ODS View

Answer: C,D,E

#### NEW QUESTION # 35

Which of the Augmented Analytics Smart Features in SAP Analytics Cloud generates multi-tabbed stories with Overview, Key Influencers, Unexpected Values, and Simulation tabs?

- A. Smart Discovery
- B. Search to Insight
- C. Predictive Forecast
- D. Smart Predict

Answer: A

#### NEW QUESTION # 36

.....

Never was it so easier to get through an exam like C\_BW4H\_2505 exam as it has become now with the help of our high quality C\_BW4H\_2505 exam questions by our company. You can get the certification just as easy as pie. As a company which has been in this field for over ten year, we have become a famous brand. And our C\_BW4H\_2505 Study Materials can stand the test of the market and the candidates all over the world. Besides, the prices for our C\_BW4H\_2505 learning guide are quite favourable.

**Exam C\_BW4H\_2505 Study Solutions:** [https://www.examcost.com/C\\_BW4H\\_2505-practice-exam.html](https://www.examcost.com/C_BW4H_2505-practice-exam.html)
