#### NEW QUESTION # 24

Which features can be overridden at child level when using site groups?

Note: There are 3 correct answers to this question.

- A. Web SDK configuration
- B. New User Welcome email template
- C. Default login and registration screen-set

- D. Data schema
- E. Login identifier

**Answer: A,B,C**

Explanation:

When using site groups, certain features can be overridden at the child level to customize behavior for individual sites. These include:

- \* Option A: Incorrect. The login identifier (e.g., email or username) is defined at the site group level and cannot be overridden at the child level.
- \* Option B: Correct. The default login and registration screen-set can be customized at the child level to provide a unique user experience for each site.
- \* Option C: Incorrect. The data schema is shared across the site group and cannot be overridden at the child level.
- \* Option D: Correct. The New User Welcome email template can be customized at the child level to tailor the messaging for each site.
- \* Option E: Correct. The Web SDK configuration can be overridden at the child level to adjust settings like API keys or custom domains for individual sites.
