## Accurate C\_SIGDA\_2403 Study Material - C\_SIGDA\_2403 PDF VCE

C\_SIGDA\_2403 dumps at ValidDumps are always kept up to date. Every addition or subtraction of C\_SIGDA\_2403 exam questions in the exam syllabus is updated in our braindumps instantly. Practice on real C\_SIGDA\_2403 exam questions and we have provided their answers too for your convenience. If you put just a bit of extra effort, you can score the highest possible score in the real C\_SIGDA\_2403 exam because our C\_SIGDA\_2403 Exam Preparation dumps are designed for the best results. Start learning the futuristic way. C\_SIGDA\_2403 exam practice software allows you to practice on real C\_SIGDA\_2403 questions. The C\_SIGDA\_2403 Practice Exam consists of multiple practice modes, with practice history records and self-assessment reports. You can customize the practice environment to suit your learning objectives.

### SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q20-Q25):

#### NEW QUESTION # 20

What are some possible configurations for a task created in SAP Signavio Process Governance? Note: There are 3 correct answers to this question.

- A. Store attributes.
- B. Assign it to a specific user.
- C. Add subtasks.
- D. Assign it to dictionary categories.
- E. Set a due date.

**Answer: B,C,E**

Explanation:

In SAP Signavio Process Governance, tasks can be configured with specific settings to enhance management and tracking. Key configurations include assigning tasks to a specific user, setting a due date to ensure timely completion, and adding subtasks to break down the main task into more manageable components. These configurations help in detailed task management and accountability in process governance.

#### NEW QUESTION # 21

How can additional process information be accessed?

- A. Open the comments
- B. Click on a task in the process model
- C. Click on Legend on the right upper corner
- D. Access the dictionary

**Answer: B**

Explanation:

In the SAP Signavio Process Collaboration Hub, additional process information is accessed by interacting directly with process model elements to view details. The SAP Signavio Process Collaboration Hub Documentation provides clear guidance:

\* Exact Extract: "To access additional process information in the Collaboration Hub, users can click on a task or element in the process model to view detailed attributes, such as descriptions, responsibilities, or linked documentation." (SAP Signavio Process Collaboration Hub User Guide, section on "Accessing Process Details").

\* Explanation:

\* Option D (Click on a task in the process model): This is correct because clicking on a task or other element (e.g., a gateway or event) in a process model within the Collaboration Hub opens a panel with detailed information, such as task descriptions, roles, or associated documents, enhancing process understanding.

\* Option A (Open the comments) is incorrect as comments provide stakeholder feedback or discussions, not structured process information like task details.

\* Option B (Click on Legend on the right upper corner) is incorrect because the legend explains symbols or notation (e.g., BPMN elements), not specific process information.

\* Option C (Access the dictionary) is incorrect as the dictionary provides definitions of process terms or objects, not detailed information about specific tasks in a model.

Reference: SAP Signavio Process Collaboration Hub User Guide, section on "Accessing Process Details"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 3: Process Information Access.

### NEW QUESTION # 22

Which Process Performance Indicator categories are most relevant when striving to identify automation potential? Note: There are 2 correct answers to this question.

- A. Master data
- B. Backlog
- C. Exceptions
- D. Automation rate

**Answer: C,D**

### NEW QUESTION # 23

What are some goals of Process Implementation? Note: There are 2 correct answers to this question.

- A. To evaluate process KPI's
- B. To include the process into the company structure and architecture
- C. To publish the process internally
- D. To conduct process interviews to figure out relevant tasks

**Answer: A,B**

Explanation:

The goals of Process Implementation involve integrating the process into the organizational workflow and ensuring its performance meets the set objectives. The correct answers are:

\* Option A (To include the process into the company structure and architecture): One of the primary goals of Process Implementation is to seamlessly integrate the newly designed or updated process into the existing company structure and IT architecture, ensuring it aligns with organizational goals and operates efficiently within the current ecosystem.

\* Option C (To evaluate process KPI's): Another significant goal is to evaluate the process's performance against key performance indicators (KPIs). This involves monitoring and measuring the effectiveness, efficiency, and adaptability of the process post-implementation to ensure it meets or exceeds the predefined objectives.

### NEW QUESTION # 24

What is the Process Conformance Widget used for?

- A. Visualizing different variants against a BPMN model of a process
- B. Visualizing the way tasks are performed and backtracking the process flow
- C. Visualizing activities in processes over time
- D. Visualizing customer journeys and live insights

**Answer: A**

### NEW QUESTION # 25
