SAP Certified Associate - Solution Transformation Consultant with SAP Cloud ALM Sample Questions (Q13-Q18):

NEW QUESTION # 13

After onboarding users in the Identity Authentication service, where can you add the users to SAP Cloud ALM and assign roles?
Note: There are 2 correct answers to this question.

- A. Projects and Setup App
- B. Landscape Management App
- C. SAP BTP cockpit
- D. User Management App

Answer: A,D

Explanation:

Once users are onboarded via the Identity Authentication Service, they can be added to SAP Cloud ALM and assigned roles using: Projects and Setup App: This app allows project-level user assignment and role management.

User Management App: This is the primary tool for managing user access and roles across the entire SAP Cloud ALM environment.

NEW QUESTION # 14

A project-specific deliverable is not part of the SAP Activate roadmap. How can you manage all tasks that are related to that deliverable?

- A. By creating a custom deliverable
- B. By creating a custom release
- C. By creating a custom team

Answer: A

Explanation:

When a project-specific deliverable is not included in the standard SAP Activate roadmap, you can manage it by creating a custom deliverable in SAP Cloud ALM. This allows for tracking tasks and milestones specific to that deliverable within the project.

NEW QUESTION # 15

How can SAP Cloud ALM help make business processes clean core compliant?

Note: There are 2 correct answers to this question.

- A. By managing documentation
- B. By monitoring SAP Job Scheduling Service-based jobs
- C. By managing changes through SAP Cloud Transport Management
- D. By managing the SAP Activate quality gates

Answer: C,D

Explanation:

SAP Cloud ALM supports clean core compliance by:

Managing SAP Activate quality gates: Ensuring proper validation steps during implementation.

Managing changes through SAP Cloud Transport Management: Controlling and monitoring changes to ensure clean core compliance by keeping the core system stable.

NEW QUESTION # 16

To run a test case with a test plan in the Test Execution app, which statuses must the test case and test plan have?

- A. Test Case status: Prepared
Test Plan status: In Testing
- B. Test Case status: Prepared
Test Plan status: In Preparation
- C. Test Case status: In Preparation
Test Plan status: In Testing

Answer: A

Explanation:

For a test case to be executed as part of a test plan in SAP Cloud ALM, the Test Case must have the status Prepared, and the Test Plan must have the status In Testing.

Reference:

SAP Cloud ALM Test Execution Guide

SAP Help Portal on Test Case and Test Plan Statuses in SAP Cloud ALM

NEW QUESTION # 17

How can SAP Cloud ALM support you in making data clean core compliant?

Note: There are 2 correct answers to this question.

- A. By running manual and automated testing with test management
- B. By integrating the SAP Readiness Check
- C. By monitoring technical KPIs with health monitoring
- D. By monitoring the status of business objects with integration monitoring

Answer: C,D

Explanation:

SAP Cloud ALM can help maintain data clean core compliance by:

Monitoring technical KPIs with health monitoring: This ensures that the system remains performant and aligned with compliance.

Monitoring the status of business objects with integration monitoring: Ensures that data flows and processes are correctly managed, contributing to a clean core.
