SAP Certified Associate - Implementation Consultant - SAP SuccessFactors Learning Sample Questions (Q37-Q42):

NEW QUESTION # 37

How can the Administrator ensure that a custom certificate is applied to a specific course without altering the default certificate used by other items and programs?

- A. Remove the default certificate from the global settings and manually assign certificates to each individual learning entity.
- B. Edit the global default certificate to include the custom branding and criteria, ensuring consistency across all courses.
- C. Create and assign the custom certificate directly to the specific course, leaving the global default certificate unchanged for other items and programs.
- D. Copy the default certificate, edit it with the custom requirements, and make it the new global default certificate for all courses.

Answer: C

Explanation:

Step by Step Explanation with exact Extract from SAP SuccessFactors Learning documents:

* Understanding Certificates in SAP SuccessFactors Learning:

* Certificates are awarded to learners upon course completion. Administrators can use a global default certificate or assign custom certificates to specific courses.

* Custom Certificate Assignment (B):

* To apply a custom certificate to a specific course without affecting others, administrators create and assign it directly to the course, preserving the global default.

* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Certificate Management):

"To assign a custom certificate to a specific course, create the certificate in System Administration > Content

> Certificates, then assign it to the course in Learning Activities > Items > [Item] > Certificate tab. This leaves the global default certificate unchanged for other items and programs."

* This confirms option B, as it allows targeted certificate assignment.

* How to Configure a Custom Certificate:

* Create the certificate with custom branding, then link it to the course via the item's Certificate tab, ensuring the global default remains intact.

* Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Certificate Configuration):

"Custom certificates can be assigned to specific items by selecting the certificate in the item's Certificate tab.

The global default certificate, set in System Administration > Configuration > Global Application Settings, remains unaffected."

* Why Other Options are Incorrect:

* Option A (Remove default certificate): Removing the global default disrupts other courses.

"Removing the global default certificate affects all courses without a specific certificate" (SAP SuccessFactors Learning Admin Guide).

* Option C (Copy and edit default): Making a copy the new global default affects all courses.

"Editing the global default certificate applies changes to all courses using it" (SAP SuccessFactors Learning Admin Guide).

* Option D (Edit global default): Editing the global default changes certificates system-wide.

"Changes to the global default certificate impact all items and programs without custom certificates" (SAP SuccessFactors Learning Admin Guide).

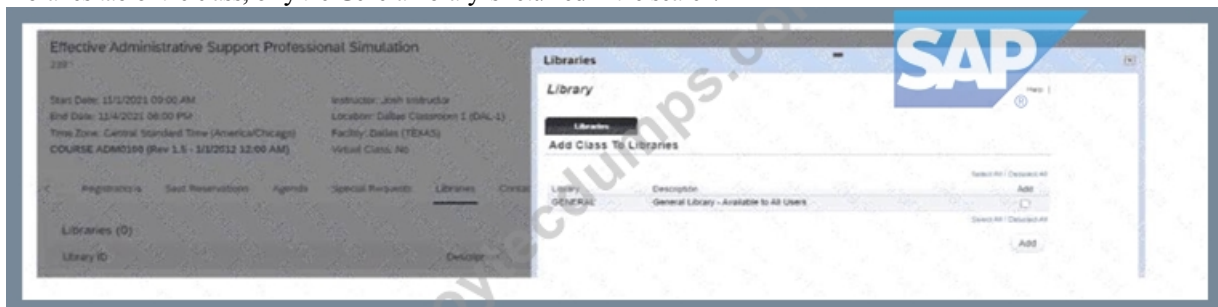

* Conclusion:

* The Administrator should create and assign a custom certificate to the specific course, leaving the global default unchanged, as specified in option B.

NEW QUESTION # 38

A customer has a General library for courses and classes that all users can see, and regional libraries that are restricted to only the users in each region.

There is an item that will have different classes in each of the regions. However, when an administrator searches for libraries from the Libraries tab of the class, only the General library is returned in the search.

What must you do in order to permit the administrator to add this class to a regional library so that users in that region are the only ones who can see this class?

Note: There are 3 correct answers to this question.

- A. Ensure the administrator has the appropriate permissions to search for libraries.
- B. Add the class to the same security domain as the users in the region.
- C. Remove the item from the General library.
- D. Add the item to the regional library.
- E. Remove the class from the General library.

Answer: B,D,E

NEW QUESTION # 39

A SuccessFactors Learning customer requires an approval process to be completed successfully whenever users record completion of an existing item for themselves where can this be configured? Note: There are 2 correct answers to this question.

- A. In System Admin -> Configuration-
