It can give you 100% confidence and make you feel at ease to take the exam.

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q52-Q57):

### NEW QUESTION # 52

What must you create when you build an integration scenario using the SAP Fiori Communication Management apps in SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Communication interface
- B. Communication system
- C. Communication arrangement
- D. Communication API

Answer: B,C

### NEW QUESTION # 53

To which partner role does the IT Contact first assign access permission for SAP Cloud ALM?

- A. LoB configuration expert
- B. Communication contact
- **C. Project manager**
- D. Lead configuration expert

**Answer: C**

Explanation:

The IT Contact is the person who receives the welcome email from SAP and is responsible for setting up the initial access to SAP Cloud ALM. The IT Contact needs to eventually provide all project team members access to SAP Cloud ALM, but it's most important the partner and customer project managers are given access first, because they are responsible for setting up the implementation project and assigning tasks to the other project team members<sup>1</sup>. The project manager is a partner role that has the authorization to create and manage projects in SAP Cloud ALM<sup>2</sup>. References = Setting up the Implementation Project in SAP Cloud ALM, Teams, Roles, and Access Restrictions | SAP Help Portal In the context of SAP Cloud ALM (Application Lifecycle Management), the IT Contact is typically responsible for the initial setup and assignment of roles within the project. The first role to which the IT Contact often assigns access permission is:

\* Project manager: The project manager plays a crucial role in overseeing the SAP project's planning, execution, and completion. By assigning access permission to the project manager first, the IT Contact ensures that the project manager has the necessary tools and insights to manage the project effectively within SAP Cloud ALM. This access allows the project manager to monitor project progress, manage resources, and make informed decisions, facilitating successful project execution and alignment with business goals.

Granting the project manager access to SAP Cloud ALM is a strategic decision that empowers them to lead the project efficiently, leveraging the platform's capabilities for project management, monitoring, and collaboration.

### NEW QUESTION # 54

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- A. When the project status is "Completed"
- **B. When the project status is "Finished"**
- C. When the project status is "In Progress"
- D. When the project status is "Not Started"

**Answer: B**

Explanation:

You specify the data retention period in the SAP S/4HANA Migration Cockpit when the project status is "Finished". The data retention period is the length of time (in days) that the project and all associated data is kept in the system after you have set the status of the project to Finished. To do this, set the option Data Retention Period to On. The data will be deleted from the SAP S/4HANA system when the data retention time expires. If you set the option Data Retention Period to Off, then the project and all associated data will be kept in the system indefinitely. You can also change the retention time for finished projects on the Technical Information tab of the project settings. References = The Migration Project Screen, Migrating Data to the SAP S/4HANA System

### NEW QUESTION # 55

You have assigned a business role to an end user who has been granted access to only one specific application. While you have a day off, it turns out that the app doesn't show up on the user's launchpad.

What can the user do?

- A. Assign a different business role that provides access.
- **B. Use the search function to find the app.**
- C. Assign a launchpad space to the business role.
- D. Create a page and assign it to the launchpad space.

**Answer: B**

### NEW QUESTION # 56

Through which applications can you launch the Cloud Integration Automation Service (CIAS)? Note: There are 2 correct answers to this question.

- A. SAP Business Accelerator Hub
- B. SAP Signavio Process Navigator
- C. SAP Cloud ALM
- D. SAP for Me

**Answer: C,D**

Explanation:

You can launch the Cloud Integration Automation Service (CIAS) through the following applications:

- \* SAP for Me: SAP for Me is your digital companion along your whole SAP customer journey. It provides you with full transparency into your SAP product portfolio, including your licenses, systems, users, orders, contracts, and invoices. You can also access the CIAS from the SAP for Me mobile app.
- \* SAP Cloud ALM: SAP Cloud ALM is a cloud-based application lifecycle management solution that helps you implement, operate, and optimize your cloud solutions. It offers various tools and services to support your end-to-end business processes, such as process management, task management, test management, and integration monitoring. You can access the CIAS from the SAP Cloud ALM launchpad.
