C_S4CPB_2508 Reliable Test Forum, Reliable C_S4CPB_2508 Exam Materials

Pass4training C_S4CPB_2508 exam dumps are audited by our certified subject matter experts and published authors for development. C_S4CPB_2508 exam dumps are one of the highest quality C_S4CPB_2508 Q&AS in the world. It covers nearly 96% real questions and answers, including the entire testing scope. Pass4training guarantees you Pass C_S4CPB_2508 Exam at first attempt.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which solution is designed to help customers understand their environmental, social, and governance (ESG) data?

- A. SAP Sustainability Footprint Management

- B. SAP Sustainability Control Tower
- C. SAP Green Token
- D. SAP Responsible Design and Production

Answer: B

NEW QUESTION # 12

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- A. Extensibility using the Legacy System Migration Workbench
- B. Combining the local and remote schema approaches into one migration project
- C. Mapping source values to SAP S/4HANA target values
- D. Guidance and simulation of the migration process

Answer: C,D

Explanation:

The SAP S/4HANA Migration Cockpit is a tool that facilitates the transfer of business data from a source system to SAP S/4HANA. It uses migration objects to identify and transfer the relevant data for a specific business object. The SAP S/4HANA Migration Cockpit has the following characteristics1:

- * It allows mapping source values to SAP S/4HANA target values, as well as converting values that are migrated from source fields to target fields. This ensures data consistency and quality in the target system.
 - * It provides guidance and simulation of the migration process, as well as error handling and monitoring. This helps to reduce the complexity and risk of data migration, and to ensure a smooth and successful data transfer.
 - * It does not support extensibility using the Legacy System Migration Workbench (LSMW), which is a tool for data migration from legacy systems to SAP systems. The SAP S/4HANA Migration Cockpit has its own extensibility framework, the SAP S/4HANA Migration Object Modeler, which allows creating and enhancing migration objects2.
 - * It does not combine the local and remote schema approaches into one migration project. The SAP S/4HANA Migration Cockpit offers three options for transferring data to SAP S/4HANA: using files, using staging tables, or using direct transfer from an SAP system1. Each option requires a separate migration project and has its own advantages and limitations3.

NEW QUESTION # 13

You want to restrict end user activities for an application.

Where would you look up the business catalog(s) that grant access to the app?

- A. In the SAP Fiori Apps Reference Library
- B. In the Configure Your Solution app
- C. In the App Finder app
- D. In the Define Your Scope app

Answer: A

Explanation:

The SAP Fiori Apps Reference Library is a comprehensive online library of all available SAP Fiori apps. It provides information about the app features, technical data, configuration, and implementation. You can use the SAP Fiori Apps Reference Library to look up the business catalog(s) that grant access to an app by following these steps:

- * Go to the SAP Fiori Apps Reference Library website and log in with your SAP credentials.
- * In the search bar, enter the name or ID of the app you want to restrict access to, and click the search icon.
- * In the search results, click on the app tile to open the app details page.
- * On the app details page, scroll down to the Implementation Information section and expand the Configuration tab.
- * Under the Configuration tab, you will see the Business Catalog field, which lists the business catalog(s) that contain the app. You can click on the business catalog ID to view more details about it, such as the business roles, business groups, and other apps that are assigned to it.

NEW QUESTION # 14

Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note: There are 2 correct answers to this question.

- A. Conduct the Digital Discovery Assessment to identify extension requirements.
- **B. Use the Test system to demonstrate SAP Best Practice processes.**
- C. Define the organizational structure and chart of accounts.
- **D. Conduct the Fit-to-Standard analysis to gather configuration values.**

Answer: B,D

NEW QUESTION # 15

Which activities does the consultant do before the first Fit-to-Standard workshop? Note: There are 2 correct answers to this question.

- **A. Review the integration requirements collected from the Digital Discovery Assessment.**
- **B. Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment.**
- C. Evaluate the L2 Business-Driven Configuration Questionnaire responses.
- D. Upload customer master data in the Starter system using migration templates.

Answer: A,B

Explanation:

Before the first Fit-to-Standard workshop, the consultant should do the following activities:

* Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment. This is to ensure that the Starter system reflects the agreed scope of the project and does not include any unnecessary or out-of-scope items. The consultant can use the Scope Item Management app to deactivate scope items¹.

* Review the integration requirements collected from the Digital Discovery Assessment. This is to understand the customer's integration needs and prepare for the integration topics that will be discussed in the Fit-to-Standard workshop. The consultant can use the Integration Solution Advisor tool to review the integration requirements and the recommended integration scenarios².

The consultant should NOT do the following activities before the first Fit-to-Standard workshop:

* Upload customer master data in the Starter system using migration templates. This is not required before the first Fit-to-Standard workshop, as the customer master data is not relevant for the process validation. The consultant should upload the customer master data in the Quality system after the Fit-to-Standard workshop, using the SAP S/4HANA Migration Cockpit³.

* Evaluate the L2 Business-Driven Configuration Questionnaire responses. This is not required before the first Fit-to-Standard workshop, as the L2 Business-Driven Configuration Questionnaire is not available at this stage. The consultant should evaluate the L2 Business-Driven Configuration Questionnaire responses after the Fit-to-Standard workshop, using the SAP Activate Methodology.
