## 100% Pass-Rate Valid Study E\_S4CPE\_2405 Questions - Find Shortcut to Pass E\_S4CPE\_2405 Exam

At RealExamFree, we are proud to offer you actual E\_S4CPE\_2405 exam questions in our SAP E\_S4CPE\_2405 practice exam material. This actual study material has been checked and approved by leading professionals in the field. A team of over 90,000 experts and professionals have collaborated to design the SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition (E\_S4CPE\_2405) exam material, ensuring that you receive both theoretical knowledge and practical insights to excel in the SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition exam.

### SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q45-Q50):

#### NEW QUESTION # 45

In which tool can you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- A. Runtime Authoring mode (Adapt UI)
- B. Extensibility Inventory app
- C. Custom CDS Views app
- D. **Custom Fields app**

**Answer: D**

#### NEW QUESTION # 46

Which of the following systems is provided to you only via the SUM tool in a system conversion?

- A. SAP Business Technology Platform
- B. **SAP S/4HANA Cloud Private Edition**
- C. SAP Signavio Process Manager
- D. SAP Signavio Process Collaboration Hub

**Answer: B**

#### NEW QUESTION # 47

In which system do you carry out business process testing before any changes or extensions are transported to the production system?

- A. **Quality system**
- B. Development system
- C. Trial system
- D. Sandbox system

**Answer: A**

Explanation:

Business process testing in SAP S/4HANA Cloud Private Edition ensures that changes or extensions function correctly before deployment to the production system. The system landscape typically includes multiple systems, and testing occurs in a specific environment. Let's evaluate:

- \* A. Sandbox system: This is incorrect. The sandbox system is used for early exploration (e.g., during Fit-to-Standard workshops in the Explore phase) to test standard processes or prototypes. It's not the primary system for formal business process testing before production deployment.
- \* B. Development system: This is incorrect. The development system is where configuration, customizations, and extensions are initially built and unit-tested. However, it's not the environment for comprehensive business process testing, which requires a more stable setup.
- \* C. Quality system: This is correct. In the SAP S/4HANA Cloud Private Edition system landscape under RISE with SAP, the quality system (QAS) is used for formal business process testing (e.g., string tests, integration tests) before transporting changes or extensions to production (PRD). It mirrors the production environment closely, ensuring thorough validation.
- \* D. Trial system: This is incorrect. A trial system is not a standard part of the SAP landscape for Private Edition. It might refer to temporary demo systems, but it's not used for formal testing prior to production.

In summary, business process testing before changes or extensions are transported to production is carried out in the C (Quality system).

#### NEW QUESTION # 48

Which of the following systems is provided to you only via the SUM tool in a system conversion?

- A. SAP Business Technology Platform
- B. SAP S/4HANA Cloud Private Edition
- C. SAP Signavio Process Manager
- D. SAP Signavio Process Collaboration Hub

**Answer: B**

Explanation:

In a system conversion scenario, the Software Update Manager (SUM) tool is employed to transition existing systems to SAP S/4HANA Cloud, private edition. This process involves upgrading the current system to the SAP S/4HANA Cloud, private edition environment.

Option A: SAP Signavio Process Collaboration Hub

This option is incorrect. The SAP Signavio Process Collaboration Hub is a tool for process collaboration and management, not directly involved in system conversion.

Option B: SAP Business Technology Platform

This option is incorrect. SAP Business Technology Platform serves as a platform for integrating and extending SAP applications but is not the tool used for system conversion.

Option C: SAP Signavio Process Manager

This option is incorrect. The SAP Signavio Process Manager is used for process modeling and analysis, not for system conversion.

Option D: SAP S/4HANA Cloud Private Edition

This option is correct. The SUM tool facilitates the conversion of existing systems to SAP S/4HANA Cloud, private edition, ensuring a smooth transition to the new environment.

Therefore, in a system conversion, the SUM tool is utilized to migrate the system to SAP S/4HANA Cloud Private Edition.

#### NEW QUESTION # 49

What are the most important tasks in the Fit-to-Standard analysis and design workshops for a system conversion? Note: There are 2 correct answers to this question.

- A. Capturing configuration requirements for the predefined solution
- B. Validating new functionality in the sandbox system
- C. Validating the predefined solution in the sandbox system
- D. Capturing configuration requirements for new functionality

**Answer: A,C**

Explanation:

In a system conversion to SAP S/4HANA Cloud Private Edition, Fit-to-Standard analysis and design workshops focus on aligning existing business processes with the new system capabilities. Key tasks include:

Option A: Validating new functionality in the sandbox system

This option is incorrect. The primary focus is on existing processes rather than new functionalities.

Option B: Validating the predefined solution in the sandbox system

This option is correct. Workshops involve demonstrating current business processes in the sandbox system to ensure they function as expected post-conversion.

SAP Learning

Option C: Capturing configuration requirements for the predefined solution This option is correct. Identifying necessary configurations to align the system with existing business processes is essential during these workshops.

SAP Learning

Option D: Capturing configuration requirements for new functionality

This option is incorrect. The focus is on existing processes, not new functionalities.

In summary, during system conversion Fit-to-Standard workshops, validating the predefined solution in the sandbox system and capturing configuration requirements for existing processes are critical tasks to ensure a smooth transition.

## NEW QUESTION # 50

We can say that how many the E\_S4CPE\_2405 certifications you get and obtain qualification certificates, to some extent determines your future employment and development, as a result, the E\_S4CPE\_2405 exam guide is committed to helping you become a competitive workforce, let you have no trouble back at home. Actually, just think of our E\_S4CPE\_2405 Test Prep as the best way to pass the E\_S4CPE\_2405 exam is myopic. They can not only achieve this, but ingeniously help you remember more content at the same time.
