**NEW QUESTION # 288**
Hotspot Question
You have three Microsoft Entra tenants named Tenant1, Tenant2, and Tenant3.
You have three Azure subscriptions named Sub1, Sub2, and Sub3. Each tenant is associated with multiple Azure subscriptions.
Each subscription contains a single Microsoft Sentinel workspace as shown in the following table.

| Name | Subscription | Associated tenant |
|---|---|---|
| Sentinel1 | Sub1 | Tenant1 |
| Sentinel2 | Sub2 | Tenant2 |
| Sentinel3 | Sub3 | Tenant3 |

You need to recommend a solution that meets the following requirements:
- Ensures that the users in Tenant1 can manage the resources in Sub2
and Sub3 without having to switch subscriptions or sign in to a
different tenant.
- Implements multiple workspace view for Sentinel2 and Sentinel3.
What should you use to delegate permissions, and which Microsoft Sentinel feature will users be able to manage in multiple workspace view? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

## Answer Area

**Delegate permissions by using:**

| Azure Blueprints |
| Azure Lighthouse |
| Azure Sphere |

**Microsoft Sentinel feature:**

| Analytics rules |
| Incidents |
| Workbooks |

**Answer:**

## Answer Area

**Delegate permissions by using:**

| Azure Blueprints |
| **Azure Lighthouse** |
| Azure Sphere |

**Microsoft Sentinel feature:**

| Analytics rules |
| Incidents |
| **Workbooks** |

Explanation:
Box 1: Azure Lighthouse
Delegate permissions by using
You can manage workspaces across tenants using Azure Lighthouse.
In many scenarios, the different Microsoft Sentinel workspaces can be located in different Microsoft Entra tenants. You can use Azure Lighthouse to extend all cross-workspace activities across tenant boundaries, allowing users in your managing tenant to work on Microsoft Sentinel workspaces across all tenants.
Once Azure Lighthouse is onboarded, use the directory + subscription selector on the Azure portal to select all the subscriptions containing workspaces you want to manage, in order to ensure that they'll all be available in the different workspace selectors in the portal.
When using Azure Lighthouse, it's recommended to create a group for each Microsoft Sentinel role and delegate permissions from each tenant to those groups.
Box 2: Workbooks
Microsoft Sentinel feature
Use cross-workspace workbooks
Workbooks provide dashboards and apps to Microsoft Sentinel. When working with multiple workspaces, workbooks provide monitoring and actions across workspaces.
Note: Extend Microsoft Sentinel across workspaces and tenants

When you onboard Microsoft Sentinel, your first step is to select your Log Analytics workspace.

While you can get the full benefit of the Microsoft Sentinel experience with a single workspace, in some cases, you might want to extend your workspace to query and analyze your data across workspaces and tenants.
