2025 Microsoft SC-200 –The Best Online Training

FreeCram Microsoft Security Operations Analyst (SC-200) exam dumps save your study and preparation time. Our experts have added hundreds of Microsoft Security Operations Analyst (SC-200) questions similar to the real exam. You can prepare for the Microsoft Security Operations Analyst (SC-200) exam dumps during your job. You don't need to visit the market or any store because FreeCram Microsoft SC-200 exam questions are easily accessible from the website.

Microsoft SC-200, also known as the Microsoft Security Operations Analyst certification exam, is a highly specialized exam that is designed to validate the skills and knowledge of security professionals who are responsible for detecting, investigating, and responding to security threats in their organization's IT environment. Microsoft Security Operations Analyst certification exam is intended for security operations center (SOC) analysts, security engineers, and security administrators who work with Microsoft security technologies.

Microsoft Security Operations Analyst Sample Questions (Q364-Q369):

NEW QUESTION # 364

You have an Azure subscription that has Azure Defender enabled for all supported resource types.

You create an Azure logic app named LA1.

You plan to use LA1 to automatically remediate security risks detected in Azure Security Center.

View the window

You need to test LA1 in Security Center.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Set the LA1 trigger to:

When an Azure Security Center Recommendation is created or triggered
When an Azure Security Center Alert is created or triggered
When a response to an Azure Security Center alert is triggered

Trigger the execution of LA1 from:

Recommendations
Workflow automation

Answer:

Explanation:

Answer Area

Set the LA1 trigger to:

When an Azure Security Center Recommendation is created or triggered
When an Azure Security Center Alert is created or triggered
When a response to an Azure Security Center alert is triggered

Trigger the execution of LA1 from:

Recommendations
Workflow automation

Explanation:

Answer Area

Set the LA1 trigger to:

When an Azure Security Center Recommendation is created or triggered
When an Azure Security Center Alert is created or triggered
When a response to an Azure Security Center alert is triggered

Trigger the execution of LA1 from:

Recommendations
Workflow automation

NEW QUESTION # 365

You have a Microsoft Sentinel workspace named SW1.

In SW1, you enable User and Entity Behavior Analytics (UEBA).

You need to use KQL to perform the following tasks:

* View the entity data that has fields for each type of entity.

* Assess the quality of rules by analyzing how well a rule performs.

Which table should you use in KQL for each task? To answer, drag the appropriate tables to the correct tasks.

Each table may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft Defender interface. On the left, under the heading "Tables", there is a list of five items: Anomalies, AuditLogs, AzureDiagnostics, BehaviorAnalytics, and CommonSecurityLog. Each item has a small icon to its left. On the right, under the heading "Answer Area", there are two input fields: "View entity data:" and "Assess rule quality:". The interface is watermarked with "freecram.com" and the Microsoft logo.

Answer:

Explanation:

The screenshot shows the same Microsoft Defender interface as before, but with the correct selections. In the "Tables" list, "BehaviorAnalytics" and "Anomalies" are highlighted with green dashed borders. In the "Answer Area", the "View entity data:" field contains "BehaviorAnalytics" and the "Assess rule quality:" field contains "Anomalies". The interface is watermarked with "freecram.com" and the Microsoft logo.

Explanation:

The screenshot shows the same Microsoft Defender interface as before, but with the correct selections. In the "Tables" list, "BehaviorAnalytics" and "Anomalies" are highlighted with green dashed borders. In the "Answer Area", the "View entity data:" field contains "BehaviorAnalytics" and the "Assess rule quality:" field contains "Anomalies". The interface is watermarked with "freecram.com" and the Microsoft logo.

NEW QUESTION # 366

You have resources in Azure and Google cloud.

You need to ingest Google Cloud Platform (GCP) data into Azure Defender.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Enable Security Health Analytics.

From Azure Security Center, add cloud connectors.

Configure the GCP Security Command Center.

Create a dedicated service account and a private key.

Enable the GCP Security Command Center API.

Answer Area

Answer:

Explanation:

Answer Area

Configure the GCP Security Command Center.

Enable Security Health Analytics.

Enable the GCP Security Command Center API.

Create a dedicated service account and a private key.

- 1 - Configure the GCP Security Command Center.
- 2 - Enable Security Health Analytics.
- 3 - Enable the GCP Security Command Center API.
- 4 - Create a dedicated service account and a private key.

NEW QUESTION # 367

You have an Azure subscription that uses Microsoft Defender for Cloud and contains a storage account named storage1. You receive an alert that there was an unusually high volume of delete operations on the blobs in storage1.

You need to identify which blobs were deleted.

What should you review?

- A. the alert details
- B. the Azure Storage Analytics logs
- C. the related entities of the alert
- **D. the activity logs of storage1**

Answer: D

NEW QUESTION # 368

You have a Microsoft 365 E5 subscription that contains 200 Windows 10 devices enrolled in Microsoft Defender for Endpoint. You need to ensure that users can access the devices by using a remote shell connection directly from the Microsoft 365 Defender portal. The solution must use the principle of least privilege.

What should you do in the Microsoft 365 Defender portal? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To configure Microsoft Defender for Endpoint:	▼ Turn on endpoint detection and response (EDR) in block mode Turn on Live Response Turn off Tamper Protection
To configure the devices:	▼ Add a network assessment job Create a device group that contains the devices and set Automation level to Full Create a device group that contains the devices and set Automation level to No automated response

Answer:

Explanation:

To configure Microsoft Defender for Endpoint:	▼ Turn on endpoint detection and response (EDR) in block mode Turn on Live Response Turn off Tamper Protection
To configure the devices:	▼ Add a network assessment job Create a device group that contains the devices and set Automation level to Full Create a device group that contains the devices and set Automation level to No automated response
