And their degree of customer's satisfaction is escalating.

## Microsoft Identity and Access Administrator Sample Questions (Q239-Q244):

**NEW QUESTION # 239**
You have an Azure subscription.
Azure AD logs are sent to a Log Analytics workspace.
You need to query the logs and graphically display the number of sign-ins per user.
How should you complete the query? To answer, select the appropriate options in the answer area.

```
SigninLogs

| where ResultType == 0

|  [            ▼]  login_count = count() by Identity

        extend
        print
        project
        render
        summarize

|  [            ▼]  columnchart

        extend
        print
        project
        render
        summarize
```

Microsoft

**Answer:**

Explanation:

```
SigninLogs

| where ResultType == 0

|  [          ▼]  login_count = count() by Identity

        extend
        print
        project
        render
        summarize
```

Microsoft

```
                    columnchart

        extend
        print
        project
        render
        summarize
```

Explanation:
Box 1 =

SigninLogs
| where ResultType == 0
| summarize login_count = count() by identity
| render piechart
This query retrieves the sign-in logs, filters the successful sign-ins,summarizesthe count of sign-ins per user, and renders the result as a pie chart.
Box 2 = Render

**NEW QUESTION # 240**
You have an Azure Active Directory (Azure AD) tenant that has Security defaults disabled.
You are creating a conditional access policy as shown in the following exhibit.

Use the drop -down means to select the answer choice that completes each stamen based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

**NEW QUESTION # 241**
You have an Azure subscription named Sub1 that uses Microsoft Entra Permissions Management. Sub1 contains a user named User1. User1 is granted multiple permissions across Sub1.

You need to replace all the permissions granted to User1 with read-only permissions. The solution must minimize administrative effort.
What should you do on the Remediation tab in Permissions Management?

- A. From the Roles/Policies subtab, create a role.
- B. From the Permissions subtab, use a quick action.
- C. From the My Requests subtab, create a new request.
- D. From the Role/Policy Template subtab, create a template.

**Answer: B**

Explanation:
There are four quick actions that can be used to manage users:
Revoke Unused Tasks
Revoke High-Risk Tasks
Revoke Delete Tasks
Assign Read-Only Status
https://learn.microsoft.com/en-us/training/permissions-management/explore-features-of- permissions-management/9-act-on-your-findings-with-remediation-tab

**NEW QUESTION # 242**
You need to meet the technical requirements for license management by the helpdesk administrators.
What should you create first, and which tool should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Topic 3,
Overview
A Datum Environment
The on-premises network of A Datum contains an Active Directory Domain Services (AD DS) forest named adatum.com.
The tenant contains the users shown in the following table.
Problem Statements
* Multiple users in the sales department have up to five devices. The sales department users report that sometimes they must contact the support department to join their devices to the Azure AD tenant because they have reached their device limit.
* A recent security incident reveals that several users leaked their credentials, a suspicious browser was used for a sign-in, and resources were accessed from an anonymous IP address,
* When you attempt to assign the Device Administrators role To IT_Group1, the group does NOT appear in the selection list.
* Anyone in the organization can invite guest users, including other guests and non-administrators.
* The helpdesk spends too much time resetting user passwords.
* Users currently use only passwords for authentication.
Requirements
A Datum plans to implement the following changes;
* Configure self-service password reset {SSPR}.

* Configure multi-factor authentication (MFA) for all users.

* Configure an access review for an access package named Package1.

* Require admin approval for application access to organizational data.

* Sync the AD DS users and groupsoflitware.com with the Azure AD tenant.

* Ensure that only users that are assigned specific admin roles can invite guest users.

* Increase the maximum number of devices that can be joined or registered to Azure AD to 10.

Technical Requirements

* Users assigned the User administrator role must be able to request permission to use the role when needed for up to one year.

* Users must be prompted to register for MFA and provided with an option to bypass the registration for a grace period.

* Users must provide one authentication method to reset their password by using SSPR. Available methods must include:

* Email

* Phone

* Security questions

* The Microsoft Authenticator app

* Trust relationships must NOT be established between the adatum.com and litware.com AD DS domains.

* The principle of least privilege must be used.

## NEW QUESTION # 243

Case Study 3 - A. Datum Corp

Overview

A Datum Corporation is a consulting company in Montreal. A. Datum recently acquired a Vancouver-based company named Litware, Inc.

Existing Environment

A Datum Environment

The on-premises network of A. Datum contains an Active Directory Domain Services (AD DS) forest named adatum.com.

A Datum has a Microsoft 365 E5 subscription. The subscription contains a verified domain that syncs with the adatum.com AD DS domain by using Azure AD Connect A. Datum has an Azure Active Directory (Azure AD) tenant named adatum.com. The tenant has Security defaults disabled.

The tenant contains the users shown in the following table.

| Name | Role |
|------|------|
| User1 | None |
| User2 | None |
| User3 | User administrator |
| User4 | Privileged role administrator |
| User5 | Identity Governance Administrator |

The tenant contains the groups shown in the following table.

| Name | Type | Membership type | Owner | Members |
|------|------|-----------------|-------|---------|
| IT_Group1 | Security | Assigned | None | All users in the IT department |
| AdatumUsers | Security | Assigned | None | User1, User2 |

Existing Environment

Litware Environment

Litware has an AD DS forest named litware.com

Existing Environment

Problem Statements

A Datum identifies the following issues:

- Multiple users in the sales department have up to five devices. The sales department users report that sometimes they must contact the support department to join their devices to the Azure AD tenant because they have reached their device limit.

- A recent security incident reveals that several users leaked their credentials, a suspicious browser was used for a sign-in, and

resources were accessed from an anonymous IP address.

- When you attempt to assign the Device Administrators role To IT_Group1, the group does NOT appear in the selection list.
- Anyone in the organization can invite guest users, including other guests and non- administrators.
- The helpdesk spends too much time resetting user passwords.
- Users currently use only passwords for authentication.

Requirements
Planned Changes

A Datum plans to implement the following changes;

- Configure self-service password reset {SSPR}.
- Configure multi-factor authentication (MFA) for all users.
- Configure an access review for an access package named Package1.
- Require admin approval for application access to organizational data.
- Sync the AD DS users and groupsoflitware.com with the Azure AD tenant.
- Ensure that only users that are assigned specific admin roles can invite guest users.
- Increase the maximum number of devices that can be joined or registered to Azure AD to 10.

Requirements
Technical Requirements

A Datum identifies the following technical requirements:

- Users assigned the User administrator role must be able to request permission to use the role when needed for up to one year.
- Users must be prompted to register for MFA and provided with an option to bypass the registration for a grace period.
- Users must provide one authentication method to reset their password by using SSPR.

Available methods must include:

- Email
- Phone
- Security questions
- The Microsoft Authenticator app
- Trust relationships must NOT be established between the adatum.com and litware.com AD DS domains.
- The principle of least privilege must be used.

You need implement the planned changes for application access to organizational data.
What should you configure?

- A. access packages
- B. an application proxy
- C. the User consent settings
- D. authentication methods

**Answer: A**

Explanation:
Azure Portal▷ Azure AD > Identity Governance > (Entitlement Management Heading) Access Packages > + New Access Package (from the top bar) > (Resources tab) + Applications > (Requests tab) in the section "users who can requests" we check box " for users in your directory), and then "all members(incl. guests), and then in the section " approval, we select
"Yes" ..etc

## NEW QUESTION # 244
......
