Our SC-400 learning materials are new but increasingly popular choices these days which incorporate the newest information and the most professional knowledge of the practice exam. All points of questions required are compiled into our SC-400 Preparation quiz by experts. By the way, the SC-400 certificate is of great importance for your future and education. Our SC-400 practice materials cover all the following topics for your reference.

Microsoft SC-400 Exam is designed to assess the ability of candidates to implement and manage Microsoft Information Protection solutions across various Microsoft 365 workloads. It covers a wide range of topics, including data classification, labeling, and protection, data loss prevention, and data governance, among others. It is a comprehensive exam that requires a deep understanding of the Microsoft 365 ecosystem and its various components.

The SC-400 Exam Tests the candidate's ability to design and implement information protection solutions, manage data loss prevention policies, configure and manage sensitivity and retention labels, and monitor and respond to security incidents. Candidates must have a solid understanding of Microsoft 365 compliance center, Azure Information Protection, Microsoft Cloud App Security, and Microsoft Defender for Endpoint, among other technologies.

NEW QUESTION # 333

You have a Microsoft 365 E5 tenant.

Data loss prevention (DLP) policies are applied to Exchange email, SharePoint sites, and OneDrive accounts locations.

You need to use PowerShell to retrieve a summary of the DLP rule matches from the last seven days.

Which PowerShell module and cmdlet should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows a PowerShell console interface. The 'Module:' dropdown menu is open, displaying three options: 'Azure Active Directory (Azure AD)', 'Exchange Online', and 'SharePoint Online'. The 'Cmdlet:' dropdown menu is also open, displaying four options: 'Get-DlpDetailReport', 'Get-DlpDetectionsReport', 'Get-DlpPolicy', and 'Get-DlpSiDetectionsReport'. A watermark 'trainingdump.com' is visible across the center of the console.

Answer:

Explanation:

Module:  Microsoft ▼

- Azure Active Directory (Azure AD)
- Exchange Online
- SharePoint Online

Cmdlet: ▼

- Get-DlpDetailReport
- Get-DlpDetectionsReport
- Get-DlpPolicy
- Get-DlpSiDetectionsReport

NEW QUESTION # 334

Drag and Drop Question

You are creating a custom trainable classifier to classify the identification numbers of employees.

You need to test the classifier before publishing it to ensure that it is working properly.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of possible actions to the answer area and arrange them in the correct order.

Possible actions

- Select the new library on the Training Process window.
- Choose the OneDrive accounts option on the Choose Locations page.
- Create a second SharePoint document library for test content.
- Choose the Financial option in the categories section.
- Use the content included in building the classifier in the testing process.
- Choose the Add items to test option on the Training Process window.

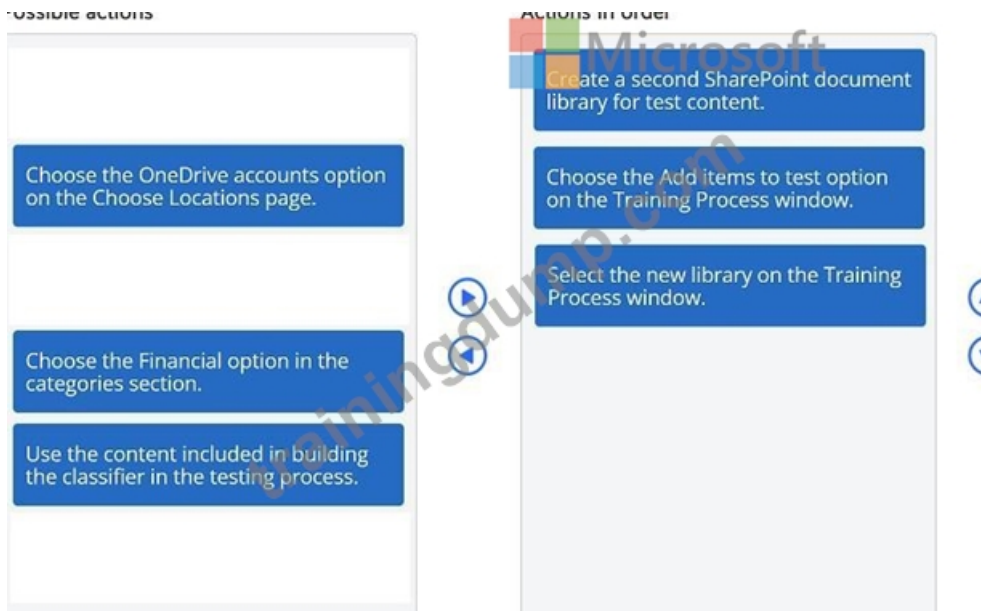

Actions in order

 Microsoft

Drag and drop actions into this area to sequence them.

Answer:

Explanation:

NEW QUESTION # 335
