

SC-401 Advanced Testing Engine, Reliable SC-401 Study Notes

What's more, part of that 2Pass4sure SC-401 dumps now are free: https://drive.google.com/open?id=1FWopxFgjJl64k6zHIFUyOtCH0GdGKr_

2Pass4sure has collected the frequent-tested knowledge into our SC-401 practice materials for your reference according to our experts' years of diligent work. So our SC-401 exam materials are triumph of their endeavor. By resorting to our SC-401 practice materials, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our SC-401 training engine, the passing rate is 98-100 percent. So your chance of getting success will be increased greatly by our SC-401 exam questions.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 2	<ul style="list-style-type: none">• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 3	<ul style="list-style-type: none">• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 4	<ul style="list-style-type: none">• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.

Sample Materials SC-401 All-in-One Exam Guide

Of course, we also need to realize that it is very difficult for a lot of people to pass the exam without valid SC-401 study materials in a short time, especially these people who have not enough time to prepare for the exam, that is why many people need to choose the best and most suitable SC-401 Study Materials as their study tool. We believe that if you have the good SC-401 study materials when you are preparing for the exam, it will be very useful and helpful for you to pass exam and gain the related certification successfully.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q143-Q148):

NEW QUESTION # 143

You need to provide a user with the ability to view data loss prevention (DLP) alerts in the Microsoft Purview portal. The solution must use the principle of least privilege.

Which role should you assign to the user?

- A. Security Reader
- **B. Compliance Administrator**
- C. Compliance Data Administrator
- D. Security Operator

Answer: B

NEW QUESTION # 144

You have a Microsoft 365 E5 subscription.

You have a file named Customer.csv that contains a list of 1,000 customer names.

You plan to use Customer.csv to classify documents stored in a Microsoft SharePoint Online library.

What should you create in the Microsoft Purview portal, and which type of element should you select? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

The screenshot shows two dropdown menus. The 'Create' menu is open, showing three options: 'A sensitive info type', 'A trainable classifier', and 'An adaptive scope'. The 'Element' menu is also open, showing three options: 'Functions', 'Keyword dictionary', and 'Regular expression'. A Microsoft logo is visible in the background.

Answer:

Explanation:

The screenshot shows the 'Answer Area' with the 'Create' and 'Element' dropdown menus. The 'Create' menu is set to 'A sensitive info type' and the 'Element' menu is set to 'Keyword dictionary'. A Microsoft logo is visible in the background.

Explanation:

Create: # A sensitive info type

Element: # Keyword dictionary

You want to classify documents in SharePoint Online based on a list of customer names stored in Customer.csv (1,000 entries).

In Microsoft Purview, there are several options for custom classification:

Sensitive info type (SIT):

Designed to detect predefined or custom patterns such as credit cards, IDs, or custom lists.

You can build a custom SIT using elements like keyword dictionary, regular expressions, and functions.

In this case, since you have a large CSV with 1,000 customer names, you upload that list as a keyword dictionary element.

Trainable classifier:

Used when you want AI to classify documents by training on examples of positive/negative samples (like contracts, resumes).

Not relevant here because you already have a structured list of customer names rather than needing machine learning classification.

Adaptive scope:

Determines where (users, groups, sites) policies apply, not what content is classified.

Not relevant here.

Correct pairing:

Create: A sensitive info type (SIT).

Element: Keyword dictionary (upload the Customer.csv file).

Reference:

Microsoft Learn: Create a custom sensitive information type

Microsoft Learn: Keyword dictionary for SITs

Final Answer:

Create # A sensitive info type

Element # Keyword dictionary

NEW QUESTION # 145

You have Microsoft 365 E5 tenant that has a domain name of 86s40q.ofimicrosoft.com. The tenant contains the users shown in the following table.

Name	User type
User1	Member
User2	Guest

You have a published sensitivity label.

The Access control settings for the sensitivity label are configured as shown in the exhibit (Click the Exhibit tab.)

Access control

Use encryption capabilities to control who can access labeled items. Depending on the scope you specified, items can include emails, Office, Fabric and Power BI files, and meeting invites. [Learn more about access control settings](#)

☐ Remove access control settings if already applied to items

☒ Configure access control settings

 Turn on co-authoring for Office desktop apps so multiple users can simultaneously edit labeled documents that have access control settings applied. [Learn more about this setting](#)

[Go to co-authoring setting](#)

Assign permissions now or let users decide?

Assign permissions now

The settings you choose will be automatically enforced when the label is applied to email and Office files.

User access to content expires 

Never

Allow offline access 

Always

Assign permissions to specific users and groups 

[Assign permissions](#)

2 items

Users and groups	Permissions	Edit	Delete
LegalTeam@86s40q.onmicrosoft.com	Co-Author		
USSales@86s40q.onmicrosoft.com	Reviewer		

☐ Use dynamic watermarking 

☐ Use Double Key Encryption 

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer Area	Statements	Yes	No
	Only users at your company can view an email that has the sensitivity label applied.	<input type="radio"/>	<input type="radio"/>
	The owner of an email can assign permissions when applying the sensitivity label.	<input type="radio"/>	<input type="radio"/>
	USSales@86s40q.onmicrosoft.com can print an email that has the sensitivity label applied.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
Only users at your company can view an email that has the sensitivity label applied.	<input type="radio"/>	<input checked="" type="radio"/>
The owner of an email can assign permissions when applying the sensitivity label.	<input type="radio"/>	<input checked="" type="radio"/>
USSales@86s40q.onmicrosoft.com can print an email that has the sensitivity label applied.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Statements	Yes	No
Only users at your company can view an email that has the sensitivity label applied.	<input type="radio"/>	<input checked="" type="radio"/>
The owner of an email can assign permissions when applying the sensitivity label.	<input type="radio"/>	<input checked="" type="radio"/>
USSales@86s40q.onmicrosoft.com can print an email that has the sensitivity label applied.	<input type="radio"/>	<input checked="" type="radio"/>

Comprehensive Detailed Explanation with References

We are given a sensitivity label with the following Access control settings:

Assign permissions now # meaning admins define permissions, not end users.

User access to content expires = Never.

Allow offline access = Always.

Permissions explicitly assigned:

LegalTeam@... # Co-Author

USSales@... # Reviewer

Dynamic watermarking and Double Key Encryption are not enabled.

Reference: Restrict access to content with sensitivity labels

Statement 1: Only users at your company can view an email that has the sensitivity label applied.

False, because permissions are explicitly assigned to two groups (LegalTeam, USSales).

If any external users were added, they would also get access. The configuration does not inherently restrict to only internal users.

The answer: NO

Statement 2: The owner of an email can assign permissions when applying the sensitivity label.

False, because the sensitivity label was configured with "Assign permissions now".

This means permissions are fixed by admins and cannot be modified by the email sender.

If "Let users assign permissions" was enabled, this would be YES.

The answer: NO

Statement 3: USSales@86s40q.onmicrosoft.com
can print an email that has the sensitivity label applied.

USSales group has the Reviewer role.

Reviewer = Can view, read, and save, but cannot print, copy, or export.

Reference: Usage rights and role mapping for sensitivity labels

The answer: NO

NEW QUESTION # 146

HOTSPOT

You need to meet the technical requirements for the confidential documents.

What should you create first, and what should you use for the detection method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Create first:

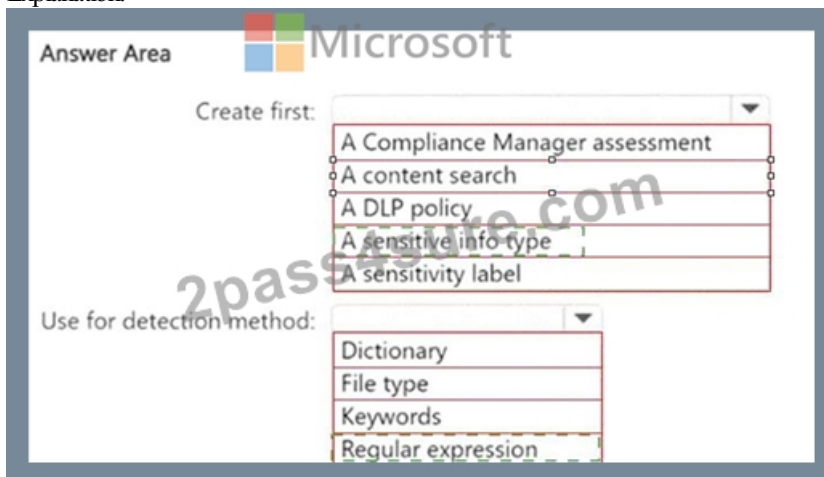

A Compliance Manager assessment
A content search
A DLP policy
A sensitive info type
A sensitivity label

Use for detection method:

Dictionary
File type
Keywords
Regular expression

Answer:

Explanation:

Explanation:

A screenshot of a computer AI-generated content may be incorrect.

Answer Area

 Microsoft

Create first:

- A Compliance Manager assessment
- A content search
- A DLP policy
- A sensitive info type**
- A sensitivity label

Use for detection method:

- Dictionary
- File type
- Keywords
- Regular expression**

To detect and protect confidential documents, we need a custom rule to identify project codes that start with 999 (since they are classified as confidential).

Box 1: A Sensitive Info Type (SIT) allows Microsoft Purview DLP policies to recognize structured data (e.g., project codes). DLP policies require a sensitive info type to detect content based on patterns, keywords, or dictionary terms. A sensitivity label alone does not define detection logic-it is used for classification and protection after content is identified.

Box 2: Since project codes follow a structured 10-digit pattern, we should use a Regular Expression (Regex) to match project codes that start with 999.

Example Regex pattern:

999\d{7}

This pattern detects a 10-digit number starting with "999".

NEW QUESTION # 147

You have two Microsoft 365 subscriptions named Contoso and Fabrikam. The subscriptions contain the users shown in the following table.

Name	Subscription	Email address
User1	Contoso	user1@contoso.com
User2	Contoso	user2@contoso.com
User3	Fabrikam	user3@fabrikam.com
User4	Fabrikam	user4@fabrikam.com

You have a sensitivity label named Sensitivity1 as shown in the exhibit. (Click the Exhibit tab) you have the files shown in the following table.

Name	Sensitivity1
File1	Automatically applied by using an auto-labeling policy
File2	Applied by User1
File3	Applied by User2

For each of the following statements, select yes if the statement is true. Otherwise select No.

NOTE: Each correct selection is worth one point.

Answer Area

 Microsoft

Statements

User1 can edit File1.

User2 can edit rights for File3.

User3 can print File2.

Yes No

☐ ☐

☐ ☐

☐ ☐

Answer:

Explanation:

Statements	Yes	No
User1 can edit rights for File1.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can edit rights for File3.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can print File2.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Statements	Yes	No
User1 can edit rights for File1.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can edit rights for File3.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can print File2.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION # 148

.....

Our Microsoft SC-401 study guide in order to allow the user to form a complete system of knowledge structure, the qualification examination of test interpretation and supporting course practice organic reasonable arrangement together, the SC-401 simulating materials let the user after learning the section, and each section between cohesion and is closely linked, for users who use the Administering Information Security in Microsoft 365 SC-401 training quiz to build a knowledge of logical framework to create a good condition.
