Maybe this is the first time you choose our SCA-C01 practice materials, so it is understandable you may wonder more useful information of our SCA-C01 exam dumps. Those free demos give you simple demonstration of our SCA-C01 study guide. It is unquestionable necessary for you to have an initial look of them before buying any. They are some brief introductions and basic information but also impressive. Just have a try and you will be interested in them!

Tableau SCA-C01 (Tableau Server Certified Associate) Exam is a certification exam that certifies an individual's skills in managing and administering Tableau Server. SCA-C01 exam is designed to test the candidate's knowledge of Tableau Server architecture, deployment, and configuration, along with the skills required to manage users, data sources, and workbooks. SCA-C01 exam is intended for IT professionals, system administrators, and database administrators who are responsible for managing Tableau Server.

Tableau SCA-C01 certification is an excellent way for individuals to demonstrate their expertise in Tableau Server administration. Tableau Server Certified Associate Exam certification is highly valued by employers, and it can help individuals to advance their career prospects in the field of data analytics and business intelligence. Tableau certification holders are in high demand, and companies are always looking for certified professionals to fill their vacancies.

Tableau is a powerful and widely-used data visualization and analysis tool that helps businesses and organizations make data-driven decisions. Tableau Server is a platform that allows users to share and collaborate on their Tableau dashboards and visualizations, making it an essential tool for teams and organizations that rely heavily on data analysis. The Tableau SCA-C01 Exam is a certification that recognizes individuals who have demonstrated proficiency in using Tableau Server.

https://help.tableau.com/current/server-linux/en-us/service_viewstatus.htm

NEW QUESTION # 111

Which three methods should an administrator use to create a Tableau Server group or project? (Choose three.)

- A. **tabcmd**
- B. **Tableau Server browser interface**
- C. tsm customize
- D. **REST API**

Answer: A,B,D

Explanation:

Tableau Server provides multiple methods to create groups (collections of users) and projects (content containers), catering to UI, CLI, and programmatic needs. Let's dissect each option with depth:

* Option B (Tableau Server browser interface): Correct.

* Groups: Go to Users > Groups > Add Group, name it, and optionally sync with Active Directory.

* Projects: Go to Content > Projects > New Project, set name, description, and permissions.

* Details: The web UI is intuitive, requiring server/site administrator rights. It's ideal for manual, ad-hoc creation with immediate visibility.

* Permissions: For projects, you can set default permissions or lock them here.

* Option C (tabcmd): Correct.

* Groups: `tabcmd creategroup "GroupName"` creates a local group. Add users with `tabcmd addusers "GroupName" --users "user1,user2"`.

* Projects: `tabcmd createproject -n "ProjectName" -d "Description"` creates a project.

* Details: `tabcmd` is a command-line tool for batch operations or scripting (e.g., automating group/project setup). It requires a server admin login (`tabcmd login`).

* Limitation: No AD sync via `tabcmd`-that's UI or REST API territory.

* Option D (REST API): Correct.

* Groups: Use the POST `/api/api-version/sites/site-id/groups` endpoint with a payload (e.g., `{"group": {"name": "GroupName"}}`). Supports AD import too.

* Projects: Use POST `/api/api-version/sites/site-id/projects` (e.g., `{"project": {"name": "ProjectName", "description": "Desc"}}`).

* Details: The REST API is programmatic, ideal for integration with external systems or bulk automation. Requires authentication via a token and server/site admin rights.

* Power: Offers full control, including nested projects and custom permissions.

* Option A (tsm customize): Incorrect.

* Purpose: `tsm customize` modifies TSM UI branding (e.g., logos, colors) via commands like `tsm customize --logo "path/to/logo.png"`.

* Why Wrong: It's unrelated to creating groups or projects-it's for cosmetic server configuration, not content/user management.

Why This Matters: Offering UI, CLI, and API options ensures flexibility-manual for small tasks, automation for scale-critical in enterprise deployments.

NEW QUESTION # 112

.....

Our Tableau Server Certified Associate Exam test torrent boost 99% passing rate and high hit rate so you can have a high probability to pass the exam. Our SCA-C01 study torrent is compiled by experts and approved by the experienced professionals and the questions and answers are chosen elaborately according to the syllabus and the latest development conditions in the theory and the practice and based on the real exam. The questions and answers of our SCA-C01 Study Tool have simplified the important information and seized the focus and are updated frequently by experts to follow the popular trend in the industry. Because of these wonderful merits the client can pass the exam successfully with high probability.
