SCP-NPM Latest Exam Dumps & SCP-NPM Pass Guarantee
Our products are officially certified, and SCP-NPM exam materials are definitely the most authoritative product in the industry. In order to ensure the authority of our SCP-NPM practice prep, our company has really taken many measures. First of all, we have a professional team of experts, each of whom has extensive experience. Secondly, before we write SCP-NPM Guide quiz, we collect a large amount of information and we will never miss any information points.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor) Exam is designed to provide network administrators and IT professionals with the knowledge and skills necessary to effectively monitor and manage network performance using the SolarWinds NPM platform. The SolarWinds NPM is a comprehensive network monitoring and management tool that allows IT teams to proactively identify and resolve network issues before they impact end-users. The SCP-NPM certification validates an individual's proficiency in using this platform to monitor and manage network devices, applications, and services.

SolarWinds SCP-NPM certification exam is an industry-recognized certification for IT professionals who want to demonstrate their proficiency in managing and monitoring network performance using the SolarWinds Network Performance Monitor (NPM) tool. The SCP-NPM Certification Exam covers all aspects of the NPM tool, including installation, configuration, monitoring, and reporting. SolarWinds Network Performance Monitor (NPM) Exam certification is ideal for IT professionals who have experience with network performance monitoring and management and want to advance their careers in network administration, network engineering, and IT management.

SolarWinds SCP-NPM certification exam covers a wide range of topics related to network performance monitoring. SCP-NPM exam tests the knowledge of the candidate on network monitoring fundamentals, NPM installation, configuration, and customization, device discovery and management, network mapping, performance monitoring, and troubleshooting. SCP-NPM exam consists of 65 multiple-choice questions that must be answered within 90 minutes.

SolarWinds SCP-NPM Pass Guarantee & Valid Test SCP-NPM Testking

Once you get the SolarWinds SCP-NPM certificate, you can quickly quit your current job and then change a desirable job. The SolarWinds SCP-NPM certificate can prove that you are a competent person. So it is easy for you to pass the interview and get the job. The assistance of our SCP-NPM practice quiz will change your life a lot.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q78-Q83):

NEW QUESTION # 78
All users can create their own Orion Maps. How do you limit a user from seeing or working with select monitored entities through the SolarWinds server?

- A. Configure permissions on the monitored entity to remove access to the Orion user account
- B. Configure Alert imitations to remove access to the Orion user account
- C. Unmanage entities to remove access to the Orion user account
- D. Configure Account limitations to remove access to the Orion user account

Answer: D

Explanation:
Account limitations are a way of restricting the access of Orion user accounts to specific network objects, such as nodes, interfaces, groups, maps, or alerts. You can use account limitations to prevent a user from seeing or working with select monitored entities through the SolarWinds server. For example, you can limit a user to see only the nodes in a certain group, or only the maps that they have created. You can apply account limitations to individual users or user groups, and you can choose from predefined limitations or create custom limitations based on custom properties. The other options are not effective ways of limiting user access to monitored entities, as they either affect the monitoring status of the entities (unmanage), the permissions of the entities themselves (configure permissions), or the alerting scope of the entities (configure alert limitations). Reference:
Limit user access to network areas with account limitations
Predefined Orion Platform account limitations
Create custom account limitations

NEW QUESTION # 79
You need to add a new subnet of 500 devices for monitoring. What is the first step to incorporate these devices into NPM?

- A. Collect NetFlow from a core router
- B. Perform a Network Discovery
- C. Add the nodes using the Add Node feature in Manage Nodes
- D. Measure network-wide bandwidth consumption

Answer: B

Explanation:
To add a new subnet of 500 devices for monitoring, the first step is to perform a network discovery using the Network Sonar Wizard in NPM. This wizard allows you to scan your network by IP address range, subnet, or seed device and automatically discover and add nodes and interfaces to NPM for monitoring. You can also specify credentials, polling settings, and custom properties for the discovered devices. Performing a network discovery can help you quickly and efficiently incorporate new devices into NPM without manually adding them one by one. References: Discover your network devices, Specify subnets, Discover devices by subnets

NEW QUESTION # 80
You use NPM to monitor a set of physical servers. The server team decides to virtualize these servers using VMware. Which part of your virtual infrastructure will NPM no longer be able to monitor?

- A. Virtualization host and VM performance metrics
- B. Virtualization environment tree
- C. Virtualization host hardware health
- D. VM sprawl monitoring

Answer: B

Explanation:
NPM can monitor the virtualization host hardware health, VM sprawl, and virtualization host and VM performance metrics using the Virtualization Manager Integration feature1. However, NPM cannot display the virtualization environment tree, which shows the hierarchical relationship between the virtualization hosts, clusters, datastores, and VMs. This feature is only available in Virtualization Manager2, a separate product that can be integrated with NPM. References: 1: Network Performance Monitor Administrator Guide - Monitor virtual infrastructure 2: Virtualization Manager Getting Started Guide - View the virtualization environment tree

NEW QUESTION # 81

Half of your objects in a nested map are down, but the top level map is up. What is the cause?

- A. You set map status thresholds to above 50%
- B. You set map status thresholds to below 50%
- C. You set availability thresholds for devices to below 50%
- D. You set availability thresholds for devices to above 50%

Answer: B

NEW QUESTION # 82

Your network includes the headquarters and three remote sites. Users from remote site A complain they do not have access to the company's accounting server. Users from remote site B and C have access to the accounting server. How can you find the source of the issue?

- A. Verify that the accounting servers are up
- B. Verify that the accounting servers' CPU utilization are not abnormally high
- C. Use NetPath to see if there are problem areas between remote site A and remote sites B and C
- D. Use NetPath to see if there are problem areas between remote site A and the headquarters

Answer: D

NEW QUESTION # 83

......

Many people prefer to buy our SCP-NPM study materials because they deeply believe that if only they buy them can definitely pass the test. The reason why they like our SCP-NPM study materials is that our SCP-NPM study materials' quality is very high and the service is wonderful. For years we always devote ourselves to perfecting our SCP-NPM Study Materials and shaping our products into the model products which other companies strive hard to emulate.
