

SCP-NPM Test Dumps Demo, SCP-NPM New Learning Materials

Why Choose DumpsGroup?

Choosing DumpsGroup for your SCP-NPM exam preparation offers numerous benefits. Their materials are up-to-date, reflecting the latest exam content. The SCP-NPM Dumps from DumpsGroup are meticulously prepared by experts, ensuring accuracy and relevance. By practicing with their SCP-NPM Practice Test, you can identify your strengths and areas for improvement, increasing your confidence for the exam day.

Conclusion

In conclusion, preparing for the **SolarWinds** Network Performance Monitor (NPM) Exam is a significant step towards earning your SolarWinds Certified Professional certification. Utilize resources like SCP-NPM Dumps PDF and practice tests from DumpsGroup to ensure your success. Don't forget to use the coupon code "**SAVE20**" to get a **20% discount**. Achieving this certification not only validates your skills but also enhances your career opportunities in the IT and networking fields. Start your preparation today and unlock new career heights with the SCP-NPM certification.

P.S. Free & New SCP-NPM dumps are available on Google Drive shared by Pass4training: https://drive.google.com/open?id=1VzcNoVDKhhL37Gz5o_WQSmjXzKXlbPID

If we update, we will provide you professional latest version of SCP-NPM dumps torrent as soon as possible, which means that you keep up with your latest knowledge in time. Therefore, we believe that you will never regret to use the SCP-NPM exam dumps. Let's learn SCP-NPM Exam Dumps, and you can pass the exam at once. When you pass the SCP-NPM exam and get a certificate, you will find that you are a step closer to your dream. It will be a first step to achieve your dreams.

SolarWinds SCP-NPM Certification Exam tests the knowledge and skills required to effectively use SolarWinds NPM to monitor and manage network performance. SCP-NPM exam covers topics such as network topology, network discovery, performance monitoring, alerting and reporting, and network troubleshooting. Through SCP-NPM Exam, IT professionals can validate their skills and demonstrate their ability to use SolarWinds NPM to optimize network performance and ensure network uptime.

SCP-NPM New Learning Materials & SCP-NPM Latest Exam Forum

As a famous brand in this field, we have engaged for over ten years to offer you actual SCP-NPM exam questions as your exams preparation. Our company highly recommends you to try the free demo of our SCP-NPM study material and test its quality feature

before purchase. You can find the three demos easily on our website. And you may find out that they are accordingly corresponding to our three versions of the SCP-NPM learning braindumps. Once you click on them, then you can experience them at once.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q42-Q47):

NEW QUESTION # 42

Network performance over an inter-campus Ethernet link is slow. One side of the connection is experiencing a high number of packet drops. What information in NPM can you review to help discover the cause of the issue?

- **A. Packet loss on the nodes on either side of the connection**
- B. MTU of each side of the link
- C. Routing tables on each side of the link
- D. Possible Duplex Mismatches

Answer: A

Explanation:

Packet loss is a measure of how many packets are lost or discarded during transmission over a network. Packet loss can cause network performance issues such as slow response time, jitter, and degraded voice quality. NPM can monitor packet loss on nodes and interfaces using ICMP ping or SNMP statistics. You can review the packet loss metrics on the Node Details or Interface Details views, or create a custom chart or report to compare packet loss across multiple nodes or interfaces. By reviewing the packet loss on the nodes on either side of the connection, you can identify which node or interface is experiencing the problem and troubleshoot the root cause. You can also use the Performance Analysis dashboard (PerfStack) to correlate packet loss with other metrics such as response time, CPU load, memory usage, buffer misses, and interface errors¹²³. Reference:

Monitor packet loss in NPM - SolarWinds

Troubleshoot intermittent network slowdowns with NPM - SolarWinds

SCP Study Aid - SolarWinds (page 9)

NEW QUESTION # 43

For any node you monitor, you can use Network Discovery to automatically add child volumes or interfaces for monitoring.

- **A. TRUE**
- B. FALSE

Answer: A

NEW QUESTION # 44

How can you add entities from NPM to monitor for all registered devices in your company domain?

- A. Add each registered device individually, and then select the entities you want to monitor
- **B. Select to query Domain Controllers in a Network Discovery and then select the Organizational Units (OUs) with the registered devices you want to scan**
- C. Add each of your Domain Controllers as nodes to NPM and scan Active Directory Organization Units (OUs) for the registered devices
- D. Use the NPM Active Directory Discovery tool to find all registered devices on the domain

Answer: B

Explanation:

Network Discovery is a feature of SolarWinds NPM that allows you to automatically discover and add network devices to the Orion Platform for monitoring. You can use Network Discovery to query Domain Controllers in your company domain and then select the Organizational Units (OUs) with the registered devices you want to scan. This way, you can add entities from NPM to monitor for all registered devices in your company domain in a single discovery. The other options are not as efficient or accurate as Network Discovery, as they either require manual addition of each device, or rely on the Domain Controllers to provide the list of registered devices, which may not be up-to-date or complete. Reference:

Discover your network devices and add them to the Orion Platform

Discover devices on your network using Active Directory

NEW QUESTION # 45

You need to change the polling method from ICMP to SNMP on 200 nodes you monitor with Orion. How would you best accomplish this?

- A. Bulk select nodes in Manage Nodes and change the polling method
- **B. Use the Orion Polling Configuration tool to change polling methods**
- C. Edit each individual node and change the polling method
- D. Unmanage all the nodes and remanage them choosing SNMP as the polling method

Answer: B

NEW QUESTION # 46

Capacity planning is available for which metrics?

- **A. CPU, Memory, and Interface**
- B. Up/Down, Packet Loss, and Latency
- C. Response Time, Interface, and Volume Utilization
- D. Hardware Health

Answer: A

Explanation:

Capacity planning is available for the following metrics of monitored nodes, interfaces, and volumes: CPU utilization on nodes, memory usage on nodes, space usage on volumes, receive(in) utilization on interfaces, and transmit (out) utilization on interfaces¹. Capacity planning allows you to monitor capacity usage trends on the network and forecast capacity issues based on historical data and customizable thresholds. You can view capacity forecasting graphs and tables on the details views of nodes, interfaces, and volumes, or use the Top XX Capacity Problems widget to see a list of objects whose usage trend is rising². References: Monitor capacity usage trends on the network and forecast capacity issues in NPM, Forecast capacity for nodes, interfaces, or volumes in NPM

NEW QUESTION # 47

.....

To save you from loss of money and time, Pass4training is offering a product that is specially designed to help you pass the SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) exam on the first try. The SolarWinds SCP-NPM Exam Dumps is easy to use and very easy to understand, ensuring that it is student-oriented. You can choose from 3 different formats available according to your needs. The 3 formats are desktop SCP-NPM Practice Test software, web-based SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) practice exam, and SCP-NPM dumps PDF format.
