Scrum SSM or SAFe 5 Scrum Master (SSM) is a certification program that is designed to help individuals gain knowledge and expertise in the field of agile development. The program is designed by the Scaled Agile Framework (SAFe) organization, which is a leading provider of agile development methodologies. The Scrum SSM program focuses on the Scrum methodology, which is one of the most popular agile development frameworks used by organizations worldwide.

Scrum SSM Certification Exam is designed to test the knowledge and skills of individuals in the SAFe framework. SSM exam covers various topics such as Agile Manifesto, Scrum, Lean, and SAFe principles. SSM exam also tests the candidate's knowledge of the Scrum Master role in a SAFe environment, including facilitation, coaching, and team building.

In a word, anytime if you need help, we will be your side to give a hand. We offer the best service on our SSM Study Guide.

The SAFe 5 Scrum Master certification is ideal for professionals who are looking to advance their career in Agile and Scrum. SSM (6.0) - SAFe® Scrum Master certification program is designed to help individuals understand the role of a Scrum Master in a large-scale enterprise, and how to apply the principles of Agile and Scrum to improve the overall efficiency and productivity of an organization. SSM (6.0) - SAFe® Scrum Master certification exam covers a wide range of topics, including the principles of Agile

and Scrum, the role of a Scrum Master in SAFe, and the techniques for leading and facilitating Agile teams. By earning the Scrum SSM Certification, professionals can demonstrate their commitment to the Agile and Scrum methodology and their ability to drive organizational change.

## Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q51-Q56):

### NEW QUESTION # 51

Agile Release Trains are organized around the ability to release value on demand through the \_\_\_\_\_.

- A. Please note down your answer
- B. Continuous Delivery Pipeline

**Answer: A**

### NEW QUESTION # 52

What does the letter C represent in SAFe's CALMR approach to DevOps?

- A. Continuous delivery
- B. Collaboration
- C. Culture
- D. Continuous deployment

**Answer: C**

### NEW QUESTION # 53

What is one example of Scrum Masters/Team Coaches helping without diminishing the commitment of others?

- A. Encouraging handoffs so each team member contributes to the work
- B. Deming the team's completed work
- C. Facilitating necessary meetings for the team
- D. Coaching the team to refrain from relying on external resources

**Answer: C**

Explanation:

One example of Scrum Masters/Team Coaches helping without diminishing the commitment of others is facilitating necessary meetings for the team. Facilitating means providing guidance and support to the team in conducting effective and productive meetings, such as Iteration Planning, Daily Stand-up, Iteration Review, and Iteration Retrospective<sup>1</sup> Facilitating does not mean taking over the meeting or making decisions for the team. Rather, it means creating a safe and respectful environment, ensuring clear and shared objectives, encouraging participation and collaboration, managing time and agenda, resolving conflicts and issues, and summarizing outcomes and action items<sup>23</sup> By facilitating necessary meetings for the team, Scrum Masters/Team Coaches help the team to achieve their goals, improve their processes, and deliver value to the customers and the organization<sup>14</sup> At the same time, they respect and empower the team's autonomy, self-organization, and self-management, and do not interfere with their commitment or accountability<sup>14</sup>

### NEW QUESTION # 54

What is one benefit of holding regular system demos?

- A. Bottlenecks can be identified early by the teams
- B. Execution can be measured across the whole ART
- C. Problems can be escalated to ART leadership
- D. Deliverables are reviewed with stakeholders

**Answer: B**

Explanation:

One benefit of holding regular system demos is that execution can be measured across the whole ART. A system demo is a significant event that provides an integrated view of new Features for the most recent Iteration delivered by all the teams in the Agile Release Train (ART). Each demo gives ART stakeholders an objective measure of progress during a Program Increment (PI). The system demo offers the ART a fact-based measure of current, system-level progress within the PI. It's the true measure of ART velocity and progress. Achieving this requires implementing the scalable engineering practices necessary to support Continuous Integration across the ART. By holding regular system demos, the ART can evaluate the quality, functionality, and usability of the solution, as well as identify and resolve any issues, risks, or dependencies. The system demo also provides an opportunity for feedback and learning from the customers, Business Owners, and other stakeholders, which can help the ART to align with the vision and goals, and to adapt to changing needs and expectations. (Must be taken from SAFe 6 Scrum Master resources)
