If you want to give up your certificate exams as you fail SDLCSA exam or feel it too difficult, please think about its advantages after you obtain a Supermicro certification. Many special positions require employees to have a qualification. If you think it is very difficult for you to pass exams, our SDLCSA Valid Exam Cram PDF can help you to achieve your goal. Our exam materials are collected from the real test center and edited by our experienced experts. If you need 100% passing rate, our SDLCSA valid exam cram PDF can help you.

Web-based Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) practice test of Exams-boost is accessible from any place. You merely need an active internet connection to take this Supermicro SDLCSA practice exam. Browsers including MS Edge, Internet Explorer, Safari, Opera, Chrome, and Firefox support this Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) practice exam. Additionally, this Supermicro Direct Liquid Cooling Service

Associate (SDLCSA) Exam(SDLCSA) test is supported by operating systems including Android, Mac, iOS, Windows, and Linux.

## Features of SDLCSA Practice Material

Do you want to get the SDLCSA exam braindumps as quickly as you finish paying, then choose the SDLCSA study material of us, we can do this for you. You can pass the exam only just need to spend about 48 to 72 hours in practicing. The SDLCSA exam braindumps of us is verified by experienced experts, therefore the quality and the accuracy of the SDLCSA Study Materials can be guaranteed, and we also pass guarantee and money back guarantee for your fail to pass the exam.

## Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam Sample Questions (Q14-Q19):

### NEW QUESTION # 14

To remove an AOC NIC card, simply pull the card straight up. True or False.

- A. True
- B. False

**Answer: B**

Explanation:

Removing an AOC NIC card in Supermicro systems like the SYS-421GE-TNHR2-LCC requires more than pulling straight up. Per standard procedures (e.g., SYS-420GP-TNAR), you must first unscrew the card from its bracket (1 screw) and release any retaining mechanisms (e.g., PCIe slot latch). Simply pulling risks damage to the card or slot, especially in DLC setups with dense configurations. False (B) reflects Supermicro's emphasis on careful hardware handling, making it the correct answer. References: Supermicro AOC card removal guides, DLC system component safety.

### NEW QUESTION # 15

Which 3 components of the SYS-421GE-TNHR2-LCC does this training discuss break/fix for? (Choose 3 answers)

- A. PCIe Tray
- B. External Chassis
- C. Bluetooth
- D. Motherboard Tray

**Answer: A,B,D**

Explanation:

The SYS-421GE-TNHR2-LCC, a DLC-enabled server, focuses break/fix training on key physical components per Supermicro's service scope:

\* PCIe Tray: Houses GPUs/NICs, critical for DLC cooling (e.g., cold plates on GPUs).

\* Motherboard Tray: Contains CPUs and core systems, also liquid-cooled in DLC setups.

\* External Chassis: Encloses all components, requiring access for repairs. Bluetooth (C) is a connectivity feature, not a physical component for break/fix in this context, and Supermicro's DLC documentation (e.g., rack-scale solutions) emphasizes trays and chassis. Thus, A, B, and D are the focus. References:

Supermicro DLC solution breakdowns, SYS-420 series service guides.

### NEW QUESTION # 16

Where is the screw located that releases the AOC card from the bracket?

- A. On the metal bar, on the top of the AOM card
- B. On the metal bar, on the top of the bracket
- C. There is no screw that you need to remove
- D. On the AOC card itself

**Answer: B**

Explanation:

In Supermicro systems, an AOC (Add-On Card), such as a NIC or GPU card, is typically secured to a bracket for stability within the PCIe tray or chassis. Based on Supermicro's hardware design for systems like the SYS-421GE-TNHR2-LCC (a DLC-capable server), the AOC card is fastened to a metal bracket via a screw located on the metal bar at the top of the bracket. This aligns with standard PCIe card installation practices, where the bracket interfaces with the chassis, and a single screw on the bar secures it. Option A references an "AOM card" (likely a typo for AOC), but the screw isn't on the card itself. Option C is incorrect as the card doesn't self-secure, and D is false since a screw is standard. Supermicro's DLC solutions maintain traditional card mounting for compatibility, making B the correct location. References: Supermicro PCIe card installation guides, SYS-420 series documentation.

#### NEW QUESTION # 17

What is the role of the pump in the D2C liquid-cooled rack?

- A. It boils the liquid and overheats the server
- **B. It circulates the liquid and is placed directly on the chip to improve flow**
- C. It provides air to cool the server
- D. It turns the liquid into different colors based on the mood of the server

**Answer: B**

#### NEW QUESTION # 18

When replacing the air shroud onto the motherboard tray, which 2 screws should be placed back first?

- A. The first 2 screws connecting the air shroud to the fan board
- **B. The first 2 screws connecting the air shroud to the motherboard tray**
- C. The first 2 screws connecting the air shroud to the fan board
- D. The first 2 screws connecting the air shroud to the PCIe tray

**Answer: B**

Explanation:

Replacing the air shroud onto the motherboard tray in a Supermicro system involves securing it to the tray itself first for stability. The correct screws are those connecting the shroud directly to the motherboard tray, as outlined in Supermicro's assembly guides (e.g., SYS-420 series). These initial screws align and anchor the shroud, ensuring proper fitment before additional connections (if any). Options B (PCIe tray) and C/D (fan board) are incorrect since the shroud's primary attachment is to the motherboard tray, not other components.

In DLC systems, precise shroud placement enhances cooling efficiency, supporting A as the correct choice.

References: Supermicro motherboard tray assembly guides, DLC system component integration.

#### NEW QUESTION # 19

.....

Keeping in view different preparation styles of Supermicro SDLCSA test applicant Exams-boost has designed three easy-to-use formats for its product. Each format has a pool of Supermicro Direct Liquid Cooling Service Associate (SDLCSA) Exam (SDLCSA) actual questions which have been compiled under the guidance of thousands of professionals worldwide. Questions in this product will appear in the Supermicro SDLCSA final test.
