

SDS New Real Exam, Valid Braindumps SDS Pdf

SDS EXAM – NBRC LATEST 2025-2026 REVISED UPDATE EXAM QUESTIONS AND ANSWERS| COMPREHENSIVE EXAM

Describe the anatomic position an esophageal pH catheter should be placed - Answer-Cather tip should be 5cm above the upper border of the lower esophageal sphincter

Another name for the disinfecting agent Cidex?

How long for this agent to disinfect?

How long for this agent to sterilize - Answer-Alkaline gluteraldehyde

10 min

10 hours

Another name for the disinfecting agent Sonacide?

How long for this agent to disinfect?

How long for this agent to sterilize? - Answer-Acid gluteraldehyde

10 min

1 hour

An ECG tracing shows a beat with an irregular rhythm, QRS >0.12sec, and a varying rate. The sleep tech would classify this as - Answer-PVC

What's more, part of that ValidExam SDS dumps now are free: <https://drive.google.com/open?id=1m0RoH3VSvWO9o29Kh0pConSjwGNndUl>

ValidExam You can modify settings of practice test in terms of Senior Data Scientist SDS Practice Questions types and mock exam duration. Both SDS exam practice tests (web-based and desktop) save your every attempt and present result of the attempt on the spot. Actual exam environments of web-based and desktop DASCA practice test help you overcome exam fear. Our DASCA desktop practice test software works after installation on Windows computers.

Our users are all over the world and they have completed their exams through the help of our SDS study guide. As you can see the feedbacks from our loyal customers, all of them are grateful to our SDS exam braindumps and become successful people with the SDS Certification. And what are you waiting for? Just selecting our SDS learning materials, the next one to get an international certificate is you!

Valid Braindumps SDS Pdf - Valid SDS Exam Sample

Beware that the sections of the exam change from time to time. Therefore, be alert by checking the updates frequently. It will prevent you from wasting time, material expenses, and inner peace. ValidExam has another special deal as well. It will provide you with the DASCA SDS Dumps latest updates until 365 days after purchasing the SDS exam questions.

DASCA Senior Data Scientist Sample Questions (Q60-Q65):

NEW QUESTION # 60

The main purpose of a Statement Of Work (SOW) is to get:

- A. Everybody on the same page about what work should be done
- **B. All of the above**
- C. What the priorities are
- D. None of the above
- E. What expectations are realistic

Answer: B

Explanation:

A Statement of Work (SOW) is a formal document that defines the scope, objectives, deliverables, timeline, and expectations of a project. In data science and IT projects, it ensures:

Clarity of scope (Option A): Everyone understands exactly what work should be done.

Clear priorities (Option B): It defines what is most critical for success.

Realistic expectations (Option C): It aligns stakeholders by setting measurable and achievable goals.

Since all of these are essential purposes of an SOW, the correct answer is Option D (All of the above).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Business Applications: Project Governance and SOW.

NEW QUESTION # 61

Which of the following standardizes scores similar to a percentile rank but preserves equal interval properties of a Z-score?

- A. Medium Curve Equivalent (MCE)
- **B. Normal Curve Equivalent (NCE)**
- C. None of the above
- D. High Curve Equivalent (HCE)
- E. Trend analysis

Answer: B

Explanation:

Normal Curve Equivalent (NCE) scores are standardized scores designed to:

Range between 1 and 99.

Be comparable to percentile ranks but with the advantage of equal-interval properties like Z-scores.

This makes NCE scores useful in educational assessments, survey analysis, and statistical modeling.

Option A (Trend analysis): Incorrect. Not related to score standardization.

Option B (Correct): NCE fits the definition perfectly.

Option C (HCE) & D (MCE): Not recognized standard measures in statistics.

Option E: Incorrect, since Option B is valid.

Thus, the correct answer is Option B: Normal Curve Equivalent (NCE).

DASCA Data Scientist Knowledge Framework (DSKF) - Statistical Methods in Data Science: Z-scores, Percentiles, and NCE.

NEW QUESTION # 62

Which of the following is an example of graphical model?

- A. Markov Random Fields
- **B. Both A and B**
- C. Both A and C
- D. Bayesian Networks
- E. Geographical Networks

Answer: B

Explanation:

Graphical models are probabilistic models that represent variables and dependencies using graphs:

Markov Random Fields (Option A): Undirected graphical models that capture joint distributions over variables with neighborhood dependencies.

Bayesian Networks (Option B): Directed acyclic graphical models that encode conditional dependencies between random variables.

Geographical Networks (Option C): While they are graphs, they are not probabilistic graphical models used in statistics/ML.

Thus, the correct answer is Option D (Both A and B).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Analytics: Graphical Models (Bayesian Networks & Markov Random Fields).

NEW QUESTION # 63

Which of the following is NOT an example of graphical model?

- A. Road maps
- B. Electrical circuits
- C. Computer networks
- **D. Flow charts**
- E. Geographical networks

Answer: D

Explanation:

Graphical models represent relationships between objects using nodes (entities) and edges (relationships).

Examples include:

Road maps (Option A): Nodes = intersections, Edges = roads.

Electrical circuits (Option B): Nodes = components, Edges = connections.

Computer networks (Option C): Nodes = devices, Edges = connections.

Geographical networks (Option D): Nodes = locations, Edges = transport or connectivity.

However:

Flow charts (Option E): These represent process flows, not structural networks of entities and relationships.

They are procedural diagrams, not graphical models in the statistical/graph-theory sense.

Thus, the correct answer is Option E (Flow charts).

Reference:

DASCA Data Scientist Knowledge Framework (DSKF) - Analytics: Graphical Models and Graph Analysis.

NEW QUESTION # 64

Bernoulli random variable is a type of:

- A. Continuous random variable
- **B. Discrete random variable**
- C. Both A and B
- D. Sometimes Discrete or sometimes Continuous random variable

Answer: B

Explanation:

A Bernoulli random variable is the simplest form of discrete random variable.

It can take only two values:

1 with probability p (success).

0 with probability $(1 - p)$ (failure).

Since the outcomes are finite (binary), it is a discrete random variable.

Option B (Continuous): Incorrect, as continuous variables take values from an interval (e.g., real numbers).

Option C and D: Incorrect, as Bernoulli is always discrete, never continuous.

Thus, the correct answer is Option A (Discrete random variable).
