All these three ExamcollectionPass CIS-SPM Exam Dumps formats contain the real ServiceNow CIS-SPM exam questions that will help you to streamline the CIS-SPM exam preparation process.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which resource tasks can be completed in Project Workspace?
Choose 2 answers

- A. View available capacity of resources
- B. Allocate a resource creating a named-resource assignment
- C. View resource requests
- D. Request a resource using role, group, or skill
- E. Create a resource calendar

Answer: A,D

NEW QUESTION # 30

If a sub-project and parent project have different project currencies, this property should be set to true for cost roll-ups.

- A. com.snc.project.rollup_project_start_date
- B. com.snc.project.calculate_roi
- C. com.snc.project.copy.additional_attributes
- **D. com.snc.project.multicurrency.rollup_if_different**

Answer: D

Explanation:

According to the ServiceNow documentation¹, this property controls whether the cost roll-ups are performed when a sub-project and parent project have different project currencies. If this property is set to true, then the system converts the sub-project currency to the parent project currency using the exchange rate table and performs the cost roll-ups. If this property is set to false, then the system does not perform the cost roll-ups for sub-projects with different currencies.

NEW QUESTION # 31

Which role can configure the parameters of the demand workbench that is provided with the base system?

- **A. it_pps_admin.**
- B. All roles.
- C. it_project_manager.
- D. business_stakeholder.

Answer: A

Explanation:

According to the Demand Workbench document, the role that can configure the parameters of the demand workbench that is provided with the base system is `it_pps_admin`. This role grants access to the Project Portfolio Suite application and allows the user to configure the demand workbench settings, such as the axes, the quadrants, the bubble size, and the color. The other options are not correct, as they are not roles that can configure the parameters of the demand workbench. The all roles option is too broad and does not specify a particular role. The `business_stakeholder` role grants access to the Business Stakeholder Portal and allows the user to view and submit demands. The `it_project_manager` role grants access to the Project Portfolio Management application and allows the user to create and update projects.

NEW QUESTION # 32

Which is the minimum role that has access to the Project Administration > Settings > Preferences-Project module?

- A. it_program_manager
- B. sys_admin
- **C. it_pps_admin**
- D. it_project_manager

Answer: C

Explanation:

According to the ServiceNow documentation¹, the `it_pps_admin` role is the minimum role that has access to the Project Administration > Settings > Preferences-Project module. This role can configure the project preferences, such as the default project template, the default project currency, and the default project status. The other options are incorrect because:

A. `it_program_manager`: The `it_program_manager` role can create and manage programs, but not project preferences².

B. `sys_admin`: The `sys_admin` role can access all modules and features on the platform, but it is not the minimum role required for the Project Administration > Settings > Preferences-Project module³.

C. `it_project_manager`: The `it_project_manager` role can create and manage projects, but not project preferences⁴.

NEW QUESTION # 33

What are the available resource states in the Resource status field on the New Resource Assignment form?

Choose 4 answers

- A. Unassigned
- B. In Progress
- C. Open
- D. Cancelled
- E. Unapproved
- F. Pending
- G. Approved

Answer: A,E,F,G

NEW QUESTION # 34

.....
