Salesforce Certified Sharing and Visibility Architect Sample Questions (Q41-Q46):

NEW QUESTION # 41
Universal Container is a global Telco that has recently implemented enterprise territory management to better align their sales teams and sales processes. They are in Q4 of the FY and they have completely revamped their territory structure and created a plan for a new structure that would support the new FY. Their current territory model has 8k territories. Their new model would be a new set of 8,5K territories, and their org limit is 10k. What enterprise territory management feature can US take advantage of in order to help them stay within their org limits?

- A. Territory Model State
- B. Territory Hierarchy
- C. Territory Type
- D. Territory type priority

Answer: A

NEW QUESTION # 42
Assuming Person Account is enabled in a Salesforce organization, which three objects can be configured as
"Controlled by Parent" in Sharing Settings?
Choose 3 answers

- A. Asset
- B. Contact
- C. Opportunity
- D. Case
- E. Order

Answer: A,B,E

Explanation:
Explanation
Order, Asset, and Contact are the three objects that can be configured as "Controlled by Parent" in Sharing Settings when Person Account is enabled in a Salesforce organization. Controlled by Parent means that the sharing setting for the object is determined by the parent record. For example, an order's sharing setting is determined by its associated account. Opportunity and Case are not objects that can be configured as
"Controlled by Parent" in Sharing Settings.

NEW QUESTION # 43
To grant Universal Containers sales managers access to shipment records properly, it was necessary to leverage Apex managed sharing. The IT team is worried about improper access to records.
What should an architect recommend to mitigate this risk?

- A. Use isAccesible keyword in Apex classes to assure record visibility will be followed.
- B. Use runAs system method in test classes to test using different users and profiles.
- C. Use isSharesble keyword in Apex classes to assure record visibility will be followed.

Answer: B

NEW QUESTION # 44

Universal Containers has a private sharing model on Accounts. Apex Managed Sharing is required to share certain account records with all users who are assigned to a specific Role in the Role Hierarchy. What should be the recommended way for the Architect to implement this?

- A. Create an AccountShare record associated to a public group containing the Users in the Role.
- B. Create an AccountShare record associated to each user who is assigned to the Role.
- C. Create an AccountShare record associated to a public group containing the Role.
- D. Create an AccountShare record associated to the required Role.

Answer: A

NEW QUESTION # 45

Universal Containers (UC) operates worldwide, with offices in more than 100 regions in 10 different countries, and has established a very complex Role Hierarchy to control data visibility. In the new fiscal year, UC is planning to reorganize the roles and reassign account owners.
Which feature should an architect recommend to avoid problems with this operation?

- A. Partition data using Divisions
- B. Skinny table
- C. Parallel Sharing Rule recalculation

Answer: C

Explanation:
* Parallel Sharing Rule Recalculation:
* This feature in Salesforce processes sharing rule recalculations concurrently across multiple threads, significantly reducing processing time for large organizations with complex role hierarchies.
* Why Option B is Correct:
* Universal Containers' complex role hierarchy and planned reorganization will trigger significant sharing recalculations. Parallel Sharing Rule recalculation ensures that the system handles these efficiently.
* Why Others Are Incorrect:
* Option A: Divisions are used for partitioning data but do not directly address sharing rule recalculations.
* Option C: Skinny tables optimize query performance but do not influence sharing operations.
For more details, refer to Salesforce Sharing Recalculation Best Practices: https://help.salesforce.com/

NEW QUESTION # 46
......

Are you still worried about the actuality and the accuracy of the Sharing-and-Visibility-Architect exam cram?
