Only through qualification examination, has obtained the corresponding qualification certificate, we will be able to engage in related work, so the Sharing-and-Visibility-Architect Test Torrent is to help people in a relatively short period of time a great important tool to pass the qualification test. Choose our Sharing-and-Visibility-Architect study tool, can help users quickly analysis in the difficult point, and pass the Sharing-and-Visibility-Architect exam successfully.

Salesforce Certified Sharing and Visibility Architect Exam is designed for experienced Salesforce professionals who have a deep understanding of the platform's sharing and visibility architecture. This includes architects, consultants, and developers who are responsible for designing and implementing sharing and visibility solutions for their organizations. To be eligible to take the exam, individuals must have already obtained other Salesforce certifications, such as the Salesforce Certified Administrator or Salesforce Certified Advanced Administrator.

Salesforce Certified Sharing and Visibility Architect exam is built around a set of critical skills required by an architect in creating a role hierarchy, sharing rules, object and field level security, manual and automated sharing, and access controls. Sharing-and-Visibility-Architect exam is designed to evaluate your ability to assess complex sharing and visibility requirements, design scalable and secure solutions, and implement the right security features at the right level. Salesforce Certified Sharing and Visibility Architect certification program requires you to have an advanced knowledge of the Salesforce platform and be able to work effectively with a team to architect solutions that meet the needs of your organization.

Salesforce Sharing-and-Visibility-Architect Certification is considered one of the most challenging and prestigious certifications in the Salesforce ecosystem. It requires a deep understanding of the Salesforce platform, as well as the ability to design and implement complex sharing and visibility scenarios. Salesforce Certified Sharing and Visibility Architect certification is highly valued by organizations that use Salesforce and is often a requirement for senior-level roles in Salesforce administration or development.

Now you can download our updated Sharing-and-Visibility-Architect practice questions up to three months from the date of TrainingQuiz Salesforce Certified Sharing and Visibility Architect (Sharing-and-Visibility-Architect) exam purchase.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q29-Q34):

NEW QUESTION # 29

Universal Containers (UC) requested that branch managers and UC branch staff should only see customers and related information in their geographic location.

Which options should be used together to achieve the requirements?

- A. Create the Account Team and add branch manager team members, and configure organization-wide defaults of the Account object.
- **B. Configure organization-wide defaults of the Account object and create sharing rules.**
- C. Configure Role Hierarchy and create sharing rules.

Answer: B

Explanation:

Explanation

Configuring organization-wide defaults of the Account object and creating sharing rules are two options that should be used together to achieve the requirements, as they allow admins to set the baseline level of access for accounts and then grant additional access based on criteria such as geographic location². Creating the Account Team and adding branch manager team members will not work, as it will require manual maintenance and will not grant access to UC branch staff. Configuring Role Hierarchy will not work, as it will grant access based on the user's position in the organization, not their geographic location

NEW QUESTION # 30

Universal Containers has built a recruiting application on the Salesforce Platform. HR requested that all internal users should have edit access to the referral custom object. One of the recruiters needed to share a referral record with another colleague for collaboration using manual sharing. The recruiter opened the referral record and could not find the share button. What could be the technical reason for this?

- **A. The Referral object OWD is public Read/Write.**
- B. The Referral object OWD is private.
- C. The Referral object OWD is public Full Access.
- D. The Referral object OWD is public Read only.

Answer: A

NEW QUESTION # 31

A company intends bring work from anywhere culture in a bid to improve productivity. Their sellers use wide variety of devices with different form factors. The company currently uses one page layout to display opportunity record details to the sellers. The Regional Vice President of Sales is complaining about incorrect alignment of data in opportunity records, making it difficult for some sellers. Which steps are recommended to rectify this?

- A. Use Dynamic Form to define different field sections applicable for different form factors of devices.
- B. Use a custom LWC override for Opportunity view action, identify form factor onLoad action and display relevant layouts based on form factors.
- **C. Use a visualforce override for Opportunity view action, identify the form factor onLoad action and display relevant layouts based on form factors,**

Answer: C

NEW QUESTION # 32

Universal Containers has set Opportunity Sharing to Private with Opportunity Teams enabled. Which three options can change the Owner of the Opportunity?
Choose 3 answers.

- A. The current Opportunity Owner can transfer the current ownership.
- B. Someone above the Opportunity Owner in the Role Hierarchy.
- C. The user specified as the Manager on the Owner's User Profile.
- D. Any Opportunity Team Member on the current Opportunity.
- E. The System Administrator or a user with the "Transfer Records" permission.

Answer: A,B,E

Explanation:

Explanation

The three options that can change the owner of the opportunity are B, C, and E. The current opportunity owner can transfer the ownership to another user by editing the record or using the change owner button. The system administrator or a user with the "Transfer Records" permission can also change the owner of any record, regardless of the sharing settings. Someone above the opportunity owner in the role hierarchy can also change the owner, as they have full access to the records owned by users below them in the hierarchy. The other options are either incorrect or not possible.

NEW QUESTION # 33

Universal Containers uses Person Accounts to represent retail customers and Business Accounts to represent commercial customers. The retail sales team should not have access to commercial customers but should have access to ALL retail customers. With the organization-wide default on Account set to Private, how should the architect meet these requirements?

- A. Update the Retail Sales profile to grant access to Person Account record type.
- B. Create 2 criteria-based sharing rule giving the Retail Sales role access to Accounts of type PersonAccount.
- C. Create an owner-based sharing rule on AccountContactRelation to grant access to all account contact roles records owned by retail sales reps.

Answer: B

Explanation:

To restrict access to only Person Accounts for the retail sales team while maintaining a private OWD:

- * Option A (Correct): Create criteria-based sharing rules. These rules can be defined to share accounts of type PersonAccount with users in the Retail Sales role. This ensures they can only access retail customers (Person Accounts) and not Business Accounts.
- * Option B: Sharing on AccountContactRelation does not provide direct access to accounts and is irrelevant to this requirement.
- * Option C: Updating the profile to grant access to the Person Account record type does not align with the private OWD and does not manage access to records individually.

:

Criteria-Based Sharing Rules

NEW QUESTION # 34

.....
