

Sie können so einfach wie möglich - FCSS_SASE_AD-25 bestehen!

P.S. Kostenlose 2025 Fortinet FCSS_SASE_AD-25 Prüfungsfragen sind auf Google Drive freigegeben von ZertSoft verfügbar:
<https://drive.google.com/open?id=1GTKIW2oAplsWqVVCbC0sjH9KzUV65G>

Unser ZertSoft verspricht, dass Sie die Fortinet FCSS_SASE_AD-25 Prüfung einmalig bestehen und das Zertifikat von den Experten bekommen können. Denn unser ZertSoft stellt Ihnen die besten Prüfungsfragen und Antworten zur Fortinet FCSS_SASE_AD-25 zur Verfügung. Und Sie können sich schrittweise auf die Prüfung gut vorbereiten. Unser ZertSoft verspricht, dass die Fragen und Antworten zur Fortinet FCSS_SASE_AD-25 Zertifizierungsprüfung von ZertSoft Ihren Erfolg garantiert.

Fortinet FCSS_SASE_AD-25 Prüfungsplan:

Thema	Einzelheiten
Thema 1	SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.
Thema 2	Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.
Thema 3	Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.

Thema 4	• SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.

Fortinet FCSS_SASE_AD-25 Prüfungsübungen, FCSS_SASE_AD-25 Prüfungsvorbereitung

ZertSoft ist eine Website, die den Traum der IT-Fachleute erfüllen kann. ZertSoft bietet den Kandidaten die gewünschte Materialien, mit den Sie die Prüfung bestehen können. Machen Sie sich noch Sorgen um die Fortinet FCSS_SASE_AD-25 Zertifizierungsprüfung? Haben Sie schon mal gedacht, die relevanten Kurse von ZertSoft zu kaufen? Die Schulungsunterlagen von ZertSoft wird Ihnen helfen, die Prüfung effizienter zu bestehen. Die Fragen von ZertSoft sind den realen Prüfungsfragen ähnlich, fast mit ihnen identisch. Mit den genauen Prüfungsfragen und Antworten zur Fortinet FCSS_SASE_AD-25 Zertifizierungsprüfung können Sie die Prüfung leicht bestehen.

Fortinet FCSS - FortiSASE 25 Administrator FCSS_SASE_AD-25 Prüfungsfragen mit Lösungen (Q38-Q43):

38. Frage

Which two advantages does FortiSASE bring to businesses with microbranch offices that have FortiAP deployed for unmanaged devices? (Choose two.)

- **A. It simplifies management and provisioning.**
- B. It eliminates the requirement for an on-premises firewall.
- C. It uses zero trust network access (ZTNA) tags to perform device compliance checks.
- **D. It secures internet access both on and off the network.**

Antwort: A,D

Begründung:

FortiSASE extends secure internet access to users regardless of their location and streamlines the management and provisioning of security policies and services for microbranch offices with unmanaged devices.

39. Frage

In which three ways does FortiSASE help organizations ensure secure access for remote workers? (Choose three.)

- **A. It enforces granular access policies based on user identities.**
- **B. It offers zero trust network access (ZTNA) capabilities.**
- C. It uses the identity & access management (IAM) portal to validate the identities of remote workers.
- D. It enforces multi-factor authentication (MFA) to validate remote users.
- **E. It secures traffic from endpoints to cloud applications.**

Antwort: A,B,E

Begründung:

FortiSASE provides several features to ensure secure access for remote workers. The following three ways are particularly relevant: It secures traffic from endpoints to cloud applications (Option B):

FortiSASE secures all traffic between remote endpoints and cloud applications by inspecting it in real time. This includes applying security policies, threat detection, and data protection measures to ensure that traffic is safe and compliant.

It offers zero trust network access (ZTNA) capabilities (Option D):

ZTNA ensures that remote workers are granted access to resources based on strict verification of their identity and device posture. By treating all users and devices as untrusted by default, ZTNA minimizes the risk of unauthorized access and lateral movement within the network.

It enforces granular access policies based on user identities (Option E):

FortiSASE allows administrators to define and enforce fine-grained access policies based on user identities, roles, and other attributes. This ensures that remote workers only have access to the resources they need, reducing the attack surface.

Here's why the other options are incorrect:

A . It enforces multi-factor authentication (MFA) to validate remote users: While MFA is a critical security measure, it is typically implemented through identity providers (e.g., FortiAuthenticator or third-party solutions) rather than directly through FortiSASE.

C . It uses the identity & access management (IAM) portal to validate the identities of remote workers: FortiSASE integrates with IAM systems but does not use the IAM portal itself to validate identities. Identity validation is handled through authentication mechanisms like SAML, LDAP, or OAuth.

Fortinet FCSS FortiSASE Documentation - Secure Remote Access

FortiSASE Administration Guide - ZTNA and Access Policies

40. Frage

Refer to the exhibit.

A customer needs to implement device posture checks for their remote endpoints while accessing the protected server. They also want the TCP traffic between the remote endpoints and the protected servers to be processed by FortiGate.

In this scenario, which two setups will achieve these requirements? (Choose two.)

- A. Configure FortiGate as a zero trust network access (ZTNA) access proxy.
- B. Configure ZTNA tags on FortiGate.
- C. Configure private access policies on FortiSASE with ZTNA.
- D. Configure ZTNA servers and ZTNA policies on FortiGate.

Antwort: A,D

Begründung:

To enforce device posture checks and ensure that TCP traffic flows through FortiGate, the FortiGate must act as a ZTNA access proxy and host the ZTNA servers and policies. This setup allows posture validation via FortiSASE while routing traffic securely to protected servers through FortiGate.

41. Frage

Which two of the following can release the network lockdown on the endpoint applied by FortiSASE?

(Choose two.)\

- A. When the endpoint is determined as on-net
- B. When the endpoint connects to the FortiSASE tunnel
- C. When the endpoint is rebooted
- D. When the endpoint is determined as compliant using ZTNA tags

Antwort: B,D

Begründung:

FortiSASE releases network lockdown when the endpoint re-establishes the tunnel connection or when it is verified as compliant

Refer to the exhibits.

[illegible]

The screenshot displays the Zertsoft Firewall configuration window with four modules enabled (indicated by blue toggle switches):

- AntiVirus:** Shows a list of inspected protocols: HTTP, SMTP, POP3, IMAP, FTP, and CIFS, all with green checkmarks indicating they are active.
- Web Filter With Inline-CASB:** Shows a list of threats with their counts and filter actions:

Threats	Count	Filters	Count
www.eicar.org	80	Allow	0
5f3c395.com19.de	22	Block	0
www.eicar.com	13	Exempt	0
encrypted-tbn0.gstatic.com	9	Monitor	93
ocsp.digicert.com	8	Warning	0
		Disable	0
		Inline-CASB Headers	1
- Intrusion Prevention:** Shows a message: "Recommended: Scanning traffic for all known threats and applying the recommended rules." The status is "Disabled".
- SSL Inspection:** Shows a list of threats with their counts and filter actions:

Threats	Count	SSL Inspection	Count
ssl-anomaly	734	Deep Inspection	
		Exempt Hosts	1
		Exempt URL Categories	2

Each module has buttons for "View All", "View Logs", and "Customize".

Secure Internet Access policy

Name: Web Traffic

Source Scope: All VPN Users

Source: All Traffic

User: All VPN Users

Destination: All Internet Traffic

Service: ALL

Profile Group: Default

Force Certificate Inspection: ☒

Action: ☒ Accept ☐ Deny

Status: ☒ Enable ☐ Disable

Logging Options

Log Allowed Traffic: ☒ Security Events All Sessions

A FortiSASE administrator has configured an antivirus profile in the security profile group and applied it to the internet access policy. Remote users are still able to download the eicar.com-zip file from <https://eicar.org>. Traffic logs show traffic is allowed by the policy. Which configuration on FortiSASE is allowing users to perform the download?

- A. The HTTPS protocol is not enabled in the antivirus profile.
- B. Web filter is allowing the traffic.
- C. Force certificate inspection is enabled in the policy.
- D. IPS is disabled in the security profile group.

Antwort: C
