SAP C-TS414-2023 Free Download, Pdf C-TS414-2023 Version

As a reliable company providing professional IT certificate exam materials, we not only provide quality guaranteed products for C-TS414-2023 exam software, but also offer high quality pre-sale and after-sale service. Our online service will give you 24/7 online support. If you have any question about C-TS414-2023 exam software or other exam materials, or any problem about how to purchase our products, you can contact our online customer service directly. Besides, during one year after you purchased our C-TS414-2023 Exam software, any update of C-TS414-2023 exam software will be sent to your mailbox the first time.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q79-Q84):

NEW QUESTION # 79
The sample-drawing procedure contains one or more sample-drawing items.Which information can be found in the sample-drawing item?Note: There are 2 correct answers to this question.

- A. Number of samples
- B. Confirmation of sample drawing
- C. Sample categories
- D. Sample drawing based on number of containers

Answer: A,C

NEW QUESTION # 80
What master data can you integrate into a task list for a production order?

- A. Classification
- B. MIC
- C. Material Specifications
- D. Control Indicator

Answer: B

NEW QUESTION # 81
Which valuation mode can be used for a quantitative inspection characteristic?Note: There are 3 correct answers to this question.

- A. Valuation according to characteristic attribute code
- B. Manual valuation
- C. Mean value within tolerance range
- D. Attributive inspection nonconforming units
- E. Attributive inspection number of defects

Answer: A,B,E

NEW QUESTION # 82
You are using the SAP Fiori app "Record Inspection Results" in the quality inspection. Which types of results recording are possible? Note: There are 2 correct answers to this question.

- A. Recording of single inspection results
- B. Classed inspection results recording
- C. Results recording for inspection points
- D. Summarized inspection results recording

Answer: A,D

Explanation:
The SAP Fiori app "Record Inspection Results" (App ID: F2170) in SAP S/4HANA QM supports specific result recording types for inspection lots:
* Recording of Single Inspection Results (B): This allows entering individual values for quantitative or qualitative characteristics (e.g., one value per sample), a standard feature in the app for detailed recording.
* Summarized Inspection Results Recording (D): The app supports entering a single aggregated value (e.g., average) for a characteristic, ideal for summarized quantitative data, as configured in the MIC control indicators.
* Classed Inspection Results Recording (A): Classed recording (grouping results into ranges) is supported in classic transactions (e.g., QE51N) but not explicitly in the standard Fiori app's functionality.
* Results Recording for Inspection Points (C): While inspection points are supported in QM, the Fiori app focuses on lot-level recording and doesn't emphasize point-specific recording in its standard scope.
Thus, "Recording of single inspection results" and "Summarized inspection results recording" are the correct answers.References:
SAP Help Portal - "Record Inspection Results Fiori App"; SAP S/4HANA QM User Guide - "Fiori Apps in QM".

NEW QUESTION # 83
You want to use a purchasing process with release stages (for example, first-article, preliminary series, regular procurement) and different inspection plan for each stage. How do you configure this process?

- A. By assigning a status profile to the inspection type settings in the material master
- B. By assigning a status profile to the quality info record: Procurement
- C. By assigning a status profile to the inspection type settings in customizing
- D. By assigning a status profile to the business partner

Answer: B

Explanation:
To manage release stages (e.g., first-article, series) with different inspection plans in procurement, SAP QM uses:
* By Assigning a Status Profile to the Quality Info Record: Procurement (B): In the quality info record (transaction QI01), you assign a status profile (defined in SPRO > QM > Environment > Status Management). This profile controls stages (e.g., "First Article," "Series") via statuses, and each status can link to a specific inspection plan via dynamic modification or inspection type settings. This is the standard approach for supplier-material-specific release processes.
* Business Partner (A): Status profiles here are for partner management, not QM inspection stages.
* Inspection Type Settings in Customizing (C): Inspection types (e.g., 01) don't use status profiles directly in Customizing.
* Inspection Type in Material Master (D): The material master's QM view doesn't supportstatus profiles for this purpose.
Thus, "By assigning a status profile to the quality info record: Procurement" is the correct answer.References:
SAP Help Portal - "Quality Info Record and Release Stages"; SAP S/4HANA QM Customizing Guide - "Status Profiles".
