Free PDF Quiz 2026 Oracle 1Z0-771 High Hit-Rate Simulated Test

There is no doubt that having a 1Z0-771 certificate is of great importance to our daily life and daily work, it can improve your comprehensive strength when you are seeking for a decent job or competing for an important position, mainly because with 1Z0-771 certification, you can totally highlight your resume and become more confident in front of your interviewers and competitors. There are many advantages of our 1Z0-771 question torrent that we are happy to introduce you and you can pass the exam for sure.

Oracle APEX Cloud Developer Professional Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which is a valid method of logging messages to the execution log in APEX applications?

- A. apex_debug.info ('SAL for :ENAME ||' increased by 19.');

- B. `apex_error.add_error('SAL for ' || :ENAME || ' increased by 19.');`
- C. `apex_automation.log_info('SAL for ' || :ENAME || ' increased by 19.');`

Answer: C

Explanation:

Logging in APEX tracks runtime activity:

A. `apex_automation.log_info`: Correctly logs an informational message to the execution log for automation tasks (e.g., workflows). The syntax `|| :ENAME ||` concatenates the item value (e.g., "JOHN") into "SAL for JOHN increased by 19." It's stored in `APEX_AUTOMATION_LOG`, viewable in Monitoring.

B. `apex_debug.info`: Logs to debug output, but the syntax is flawed (`:ENAME ||` isn't concatenated properly; should be `'SAL for ' || :ENAME || ...`). It's valid only when debugging is enabled (e.g., `APEX_DEBUG.ENABLE`).

C. `apex_error.add_error`: Adds an error to the error stack for user display, not a log message.

Technical Insight: `log_info` is non-intrusive, unlike `apex_debug`, which requires debug mode, or `apex_error`, which signals failure.

Use Case: Logging salary updates in a scheduled job without debug overhead.

Pitfall: Ensure `:ENAME` is in scope (e.g., page item).

NEW QUESTION # 52

You have defined a REST Data Source with ORDS as the REST Data Source Type. The Source is being used as source for an editable Interactive Grid. When a user updates an employee record in this Interactive Grid, which operation is performed on the Database?

- A. POST
- B. GET
- C. PUT

Answer: C

Explanation:

An editable Interactive Grid synced with a REST Data Source (ORDS) maps CRUD operations to HTTP methods:

C. PUT: Updates an existing resource. When a user edits a row (e.g., changes SALARY), the grid sends a PUT request to the ORDS endpoint (e.g., `/employees/101`), updating the corresponding record.

A. POST: Creates new records, used for inserts, not updates.

B. GET: Retrieves data, used for initial grid population, not updates.

Technical note: ORDS maps PUT to an update operation on the underlying table, requiring the REST endpoint to support this method.

NEW QUESTION # 53

Which two statements are true about creating and using dynamic actions?

- A. If no client-side condition is defined, true actions will not fire.
- B. If a client-side condition is defined, the true action will fire when the condition is met.
- C. You can execute JavaScript code by creating a dynamic action.
- D. After you create a dynamic action, you cannot add more true actions.

Answer: B,C

Explanation:

Dynamic Actions in APEX enable responsive behavior:

If a client-side condition is defined, the true action will fire when the condition is met: A condition (e.g., `this.browserEvent === 'click'`) ensures the true action (e.g., Show, Hide) executes only when true, enhancing precision in event handling.

You can execute JavaScript code by creating a dynamic action: The "Execute JavaScript Code" action type allows custom scripts (e.g., `alert('Clicked!');`), extending functionality beyond declarative options.

Cannot add more true actions: False; multiple true actions can be added post-creation.

No condition, true actions won't fire: False; without a condition, true actions fire unconditionally on the event.

Dynamic Actions are a cornerstone of interactive UIs in APEX.

NEW QUESTION # 54

Which two actions does the Create Application Wizard allow?

- **A. Reordering application pages.**
- B. Uploading JavaScript or CSS files required for an application.
- **C. Adding or deleting application pages.**
- D. Changing the application authorization.

Answer: A,C

Explanation:

The Create Application Wizard streamlines app creation with:

Adding or deleting application pages: Allows users to define initial pages (e.g., Home, Reports) and remove unwanted ones during the wizard process.

Reordering application pages: Provides drag-and-drop or list-based reordering of pages to set the navigation sequence.

Uploading JavaScript or CSS: This occurs post-creation in Shared Components, not within the wizard.

Changing the application authorization: Authorization schemes are set after creation, not during the wizard.

This wizard is a time-saver for rapid prototyping, offering a guided yet flexible setup.

NEW QUESTION # 55

At what level does a developer enable push notifications so that end users can receive them on their devices from an APEX application?

- A. Page
- B. Region
- C. Instance
- **D. Application**

Answer: D

Explanation:

Push notifications in Oracle APEX are enabled at the application level. This allows the application to register with the Progressive Web App (PWA) framework and manage subscriptions for all end users. Once enabled in the Application Definition under "Progressive Web App" settings, APEX handles the subscription process, and developers can use APIs like APEX_PWA.SEND to send notifications. Enabling at the region, page, or instance level is not supported for this feature.

NEW QUESTION # 56

.....

Oracle 1Z0-771 certification exam is very important to every IT people. Getting the certification, you will not be eliminated in our career. What's more, you will get promoted and get more money. Free4Torrent Oracle 1Z0-771 dumps are the source of your success. Choosing it, you must arrive at the successful other shore. The reason is simply that Free4Torrent Oracle 1Z0-771 Answers Real Questions. 1Z0-771 questions are all the latest and the price is the best. Free4Torrent Oracle 1Z0-771 certification training suits every IT certification candidates.

Test 1Z0-771 Engine: <https://www.free4torrent.com/1Z0-771-braindumps-torrent.html>

Considering many exam candidates are in a state of anguished mood to prepare for the Oracle APEX Cloud Developer Professional exam, our company made three versions of 1Z0-771 real exam materials to offer help, Immediate download directly from the Free4Torrent Test 1Z0-771 Engine website, If you choose the product of our company, passing the 1Z0-771 exam won't be a dream, With ten years' dedication to collect and summarize the question and answers, Oracle 1Z0-771 PDF prep material has a good command of the knowledge points tested in the exam, thus making the questions more targeted and well-planned.
