

# Simulations HPE7-A03 Pdf - Reliable HPE7-A03 Test Experience

P.S. Free 2025 HP HPE7-A03 dumps are available on Google Drive shared by ExamDumpsVCE: <https://drive.google.com/open?id=11T83vn1PL0-RJTl8LDdc-9tmBkTDbDWp>

Considering that our customers are from different countries, there is a time difference between us, but we still provide the most thoughtful online after-sale service twenty four hours a day, seven days a week, so just feel free to contact with us through email anywhere at any time. Our commitment of helping you to Pass HPE7-A03 Exam will never change. Considerate 24/7 service shows our attitudes, we always consider our candidates' benefits and we guarantee that our HPE7-A03 test questions are the most excellent path for you to pass the exam.

## HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.</li> </ul>

## Start Exam Preparation with Real and Valid HP HPE7-A03 Exam Questions

It is similar to the Aruba Certified Campus Access Architect Exam (HPE7-A03) desktop-based exam simulation software, but it requires an active internet. No extra plugins or software installations are required to take the Aruba Certified Campus Access Architect Exam (HPE7-A03) web-based practice test. Every browser such as Chrome, Mozilla Firefox, MS Edge, Internet Explorer, Safari, and Opera supports this format of HPE7-A03 mock exam.

### HP Aruba Certified Campus Access Architect Exam Sample Questions (Q48-Q53):

#### NEW QUESTION # 48

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of "smart office" technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client is looking to utilize lower-cost Aruba OS-CX switches in their wiring closets. They calculate that each closet will need a stack or qty 6 POE (AT) and qty 0 Gigabit Ethernet switches stacked with low-cost OACs.

Which series switch should you recommend?

- A. Aruba CX 6000
- **B. ArubaCX6300F**
- C. Aruba CX6200H
- D. Aruba CX 6100

#### Answer: B

Explanation:

The Aruba CX 6300F series is a suitable recommendation for the described scenario due to its performance, PoE capabilities, and cost-effectiveness for wiring closet deployments. The CX 6300F series offers the flexibility and scalability needed for modern network environments, supporting both wired and wireless connectivity demands. It provides advanced features such as stackability, high-density PoE options, and the capability to support dynamic segmentation, which is essential for separating and securing different types of network traffic, such as corporate data and guest Wi-Fi access. This series is designed to meet the needs of a full-stack wired and wireless network in a large, multi-story office building, providing the necessary infrastructure for both current and future network requirements.

#### NEW QUESTION # 49

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of "smart office" technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client has decided to market additional tools to its retail customers. The desire is to make a Blue Dot wayfinding app available to any customer to allow them to locate stores and services within the retail space.

They would also like to have directed pop-ups within the app appear when a customer walks within close proximity to any of the 10 "Promotional Kiosks." What licensing will be needed to make this retail solution a reality? (Select two.)

- A. qty 10 Aruba beacons
- B. qty Z Meridian Blue Dot subscriptions
- C. qty 2 Meridian Map subscriptions
- D. qty 1 Meridian Map subscription

**Answer: B,C**

**NEW QUESTION # 50**

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client decides that they would like for all of their exposed printer, conference room, and VoIP phone connections to be controlled by a stateful firewall. What could be planned to ensure that these ports will meet the customer's requirements?

- A. Airgroup
- B. Web Portal
- C. Tunneled Node
- D. Multi-Zone

**Answer: C**

Explanation:

To control exposed printer, conference room, and VoIP phone connections with a stateful firewall, utilizing Tunneled Node functionality would be effective. Tunneled Node allows for the encapsulation of wired Ethernet traffic into a user-based tunnel, similar to how wireless traffic is handled. This means that traffic from these devices can be sent through a centralized controller where stateful firewall policies can be applied.

This setup ensures that the specific ports used by these devices are subjected to the same level of security scrutiny and policy enforcement as wireless traffic, aligning with the client's requirements for a secure and controlled network environment.

**NEW QUESTION # 51**

Match the deployment type with the usage scenario.

**Answer:**

Explanation:

Explanation:

Capacity based design with low to mid density - Basic office/cubicle area with low to medium user density and no voice with limited

rf redundancy. Coverage based design - Coverage, office areas with higher user density OR basic coverage office/cubicle with High Demand users High-capacity design - High user density indoor space, with high demand users Very low-density, low coverage - Warehouses, large open areas The types of wireless network deployment should be matched to the usage scenarios based on the density of users and coverage requirements:

\* Capacity based design with low to mid density is suitable for basic office or cubicle areas where there are not many users, and high-performance voice applications are not a priority, thus limited RF redundancy may be acceptable.

\* Coverage based design is intended for areas where coverage is more critical than capacity. It could be used in office areas with higher user density, where maintaining a basic level of connectivity is more important than accommodating a large number of high-bandwidth connections.

\* High-capacity design is used in environments where there is a high density of users who are likely to be using bandwidth-intensive applications. This could include indoor spaces like conference centers, auditoriums, or any area with a high concentration of users and devices.

\* Very low-density, low coverage is typically for spaces like warehouses or large open areas where there are few users spread out over a large area. The focus here is on providing coverage to all areas,

\* regardless of the low user density.

## NEW QUESTION # 52

Which is true when it comes to Aruba Central licensing for gateways? (Select two.)

- A. Aruba Gateway normal licensing is subdivided into three categories: Foundation, Advanced, and Foundation Base.
- **B. SD-WAN Gateway functionality requires security licensing.**
- **C. Aruba SD-Branch Gateway licenses allow normal WLAN Gateway features within a campus.**
- D. Aruba WLAN Gateway licenses allow normal SD-Branch features within a campus.

**Answer: B,C**

Explanation:

In the context of Aruba Central licensing for gateways, it is true that SD-WAN Gateway functionality requires a specific security licensing (Option B), which is essential for enabling advanced security features and capabilities in an SD-WAN deployment. This includes functionalities like firewall, threat management, and secure VPN connections. Additionally, Aruba SD-Branch Gateway licenses allow for the use of standard WLAN Gateway features within a campus environment (Option C). This means that with an SD-Branch Gateway license, the gateway can handle traditional WLAN management and security tasks, in addition to its SD-WAN capabilities, providing a unified solution for both branch and campus deployments.

## NEW QUESTION # 53

.....

Our website is equipped with a team of IT elites who devote themselves to design the HP exam dumps and top questions to help more people to pass the certification exam. They check the updating of exam dumps everyday to make sure HPE7-A03 Dumps latest. And you will find our valid questions and answers cover the most part of HPE7-A03 real exam.
