## CompTIA Server+ Certification Exam Sample Questions (Q359-Q364):

### NEW QUESTION # 359

A company is running an application on a file server. A security scan reports the application has a known vulnerability. Which of the following would be the company's BEST course of action?

- A. Upgrade the application package
- B. Install antivirus software
- C. Patch the server OS
- D. Tighten the rules on the firewall

**Answer: A**

Explanation:

Explanation

The best course of action for the company is to upgrade the application package to fix the known vulnerability. A vulnerability is a weakness or flaw in an application that can be exploited by an attacker to compromise the security or functionality of the system. Upgrading the application package means installing a newer version of the application that has patched or resolved the vulnerability. This way, the company can prevent potential attacks that may exploit the vulnerability and cause damage or loss.

#### NEW QUESTION # 360

Network connectivity to a server was lost when it was pulled from the rack during maintenance. Which of the following should the server administrator use to prevent this situation in the future?

- A. A wireless connection
- B. A power distribution unit
- C. **Cable management**
- D. Rail kits

**Answer: C**

#### NEW QUESTION # 361

An administrator is configuring the storage for a new database server, which will host databases that are mainly used for archival lookups. Which of the following storage types will yield the fastest database read performance?

- A. **SSD**
- B. 10K rpm SATA
- C. NAS
- D. 15K rpm SCSI

**Answer: A**

Explanation:

The storage type that will yield the fastest database read performance is SSD. SSD (Solid State Drive) is a type of storage device that uses flash memory to store data. SSDs have no moving parts and can access data faster than traditional hard disk drives (HDDs) that use spinning platters and magnetic heads. SSDs are especially suitable for databases that are mainly used for archival lookups, as they can provide faster response times and lower latency for read operations.
