MI300X Expert (SMI300XE) Certification Exam latest practice pdf & SMI300XE free study torrent

If you cannot fully believe our SMI300XE exam prep, you can refer to the real comments from our customers on our official website before making a decision. There are some real feelings after they have bought our study materials. Almost all of our customers have highly praised our SMI300XE exam guide because they have successfully obtained the certificate. What's more, all contents are designed carefully according to the exam outline. As you can see, the quality of our SMI300XE Exam Torrent can stand up to the

test. Your learning will be a pleasant process.

Supermicro MI300X Expert (SMI300XE) Certification Exam Sample Questions (Q25-Q30):

NEW QUESTION # 25

The AGFHC Tool is intended for use exclusively by specific users. Who are those users? Choose 2 answers.

- A. SMC Partners
- B. Customers
- C. Internal SMC Employees
- D. VARs / Resellers

Answer: C,D

Explanation:

The AGFHC Tool is specifically designed for Supermicro's internal employees and authorized resellers (VARs). These users require access to diagnostic and firmware update tools that are restricted to trained personnel.

* Option A (Correct): Internal Supermicro employees use this tool for system maintenance and diagnostics.

* Option D (Correct): VARs (Value-Added Resellers) are authorized to use the tool for customer support and system integration.

* Option B (Incorrect): General SMC partners do not have access to AGFHC.

* Option C (Incorrect): End customers do not have access to this tool.

NEW QUESTION # 26

When you first access the IPMI Web GUI, you will be prompted to log in. Where can you find the password?

- A. It will be on the label on the bottom side of the system cover.
- B. It will be on the label on the bottom of the system.
- C. It will be on the tag next to the I/O Module.
- D. Use the system model number as the password.

Answer: A

Explanation:

Supermicro ships systems with a unique BMC password for security purposes. This password is printed on a label located on the bottom side of the system cover.

* Option A (on the I/O module tag) is incorrect as the tag typically contains network interface information rather than credentials.

* Option B (using the system model number as a password) is incorrect because Supermicro does not use default passwords based on the model number.

* Option C (on the bottom of the system) is close but not precise; the correct location is the bottom side of the system cover.

* Option D (label on the bottom side of the system cover) is correct, as stated in the Supermicro IPMI and BMC login documentation.

Security Recommendation: Upon first login, Supermicro strongly recommends changing the default BMC password immediately for security reasons.

NEW QUESTION # 27

Which 2 ROCm commands should you run to gather AMD GPU information from the server?

- A. `sudo rocm-smi -a`, and `sudo rocm-smi`
- B. `sudo rocm-gpu`, `sudo rocm-baseboardgpu`
- C. `sudo rocm-smc`, and `sudo rocm-bug.report.txt`
- D. `sudo rocm-csv`, and `sudo rocm-amd.bug.txt`

Answer: A

Explanation:

The ROCm System Management Interface (`rocm-smi`) is the recommended tool for gathering AMD GPU information from the server.

* Option D (Correct):

* `sudo rocm-smi -a` displays all available GPU information.

- * `sudo rocm-smi` shows basic GPU stats.
- * Option A (Incorrect): These are not valid ROCm commands.
- * Option B (Incorrect): `"rock-smc"` and `"rock-bug-report.txt"` do not exist in ROCm.
- * Option C (Incorrect): `"rocm-gpu"` and `"rocm-baseboard-gpu"` are not standard AMD diagnostic commands.

NEW QUESTION # 28

In the IPMI Dashboard, how can the health event log help you identify a failure with a component like a fan or power supply?

- **A. The red severity status identifies failed components in the log.**
- B. The purple status indicator in the IPMI Dashboard indicates failures.
- C. The blades will be turning a bright orange.
- D. In IPMI under Configuration, configure a new fan.

Answer: A

Explanation:

The IPMI Dashboard health event log helps identify component failures using a red severity status indicator.

If a fan or power supply fails, the event log will mark it as a red alert, allowing users to take corrective action.

* Option A (Correct): Red severity status in the event log signals a failed component.

* Option B (Incorrect): Fans do not change colors when failing.

* Option C (Incorrect): There is no purple status indicator in IPMI for failures.

* Option D (Incorrect): You cannot configure a new fan in IPMI under Configuration; you must replace a failed fan.

NEW QUESTION # 29

The ROCm commands are not providing output or are failing. What could be the primary reason why?

And how can you validate the reasoning?

- **A. You suspect there are GPUs not detected. To determine which GPUs are missing, open the IPMI GUI and review the GPU component section to make sure all GPUs are present.**
- B. The GPU baseboard may not be detected. You can determine this by opening the IPMI GUI and reviewing the FW section.
- C. If more than 3 GPUs are missing, then ROCm commands will not function. We need to verify that the 3 are missing in the IPMI GUI and review the GPU component section to make sure that at least 2 or fewer GPUs are missing.
- D. CPU is not installed correctly on the server. Review the OS dmesg logs for any odd CPU messages, then if located proceed to reseat the CPU.

Answer: A

Explanation:

If ROCm commands fail to provide output, the primary issue is likely missing or undetected GPUs. The best way to validate this is by checking the IPMI GUI and reviewing the GPU component section to ensure that all GPUs are present.

* Option A (Correct): Missing GPUs are the most common cause of ROCm failures. The IPMI GUI provides visibility into which GPUs are detected.

* Option B (Incorrect): CPU misalignment would cause general system failure, not ROCm-specific issues.

* Option C (Incorrect): The GPU baseboard status can be checked in IPMI but is not the primary cause of ROCm failures.

* Option D (Incorrect): ROCm can function with multiple missing GPUs, but the key issue is confirming GPU presence first.

NEW QUESTION # 30

.....

To help applicants prepare successfully according to their styles, we offer three different formats of MI300X Expert (SMI300XE) Certification Exam (SMI300XE) exam dumps. These formats include desktop-based MI300X Expert (SMI300XE) Certification Exam (SMI300XE) practice test software, web-based Supermicro SMI300XE Practice Exam, and Building MI300X Expert (SMI300XE) Certification Exam (SMI300XE) dumps pdf format. Our customers can download a free demo to check the quality of SMI300XE practice material before buying.

SMI300XE Valid Exam Cost: https://www.realvce.com/SMI300XE_free-dumps.html

Connected with professionals to get best results in Supermicro SMI300XE Valid Exam Cost, To do this, you just need to enroll in the SMI300XE examination and start preparation with top-notch and updated Supermicro SMI300XE actual exam dumps, In addition, SMI300XE exam dumps of us will offer you free update for 365 days, and our system will send the latest version of SMI300XE exam braindumps to your email automatically, Candidates who don't use SMI300XE dumps fail in the SMI300XE examination and waste their resources.

Additionally, many rogueware criminals include additional malware SMI300XE in the rogueware, Of course, any rule has exceptions, Connected with professionals to get best results in Supermicro.

To do this, you just need to enroll in the SMI300XE examination and start preparation with top-notch and updated Supermicro SMI300XE actual exam dumps, In addition, SMI300XE exam dumps of us will offer you free update for 365 days, and our system will send the latest version of SMI300XE exam braindumps to your email automatically.

Latest SMI300XE Test Question – Find Shortcut to Pass SMI300XE Exam

Candidates who don't use SMI300XE dumps fail in the SMI300XE examination and waste their resources, The customers are pleased with MI300X Expert (SMI300XE) Certification Exam (SMI300XE) exam questions and all of them have passed the MI300X Expert (SMI300XE) Certification Exam (SMI300XE) certification exam on the very first try.
