SMI300XE online test engine & SMI300XE training study & SMI300XE torrent dumps
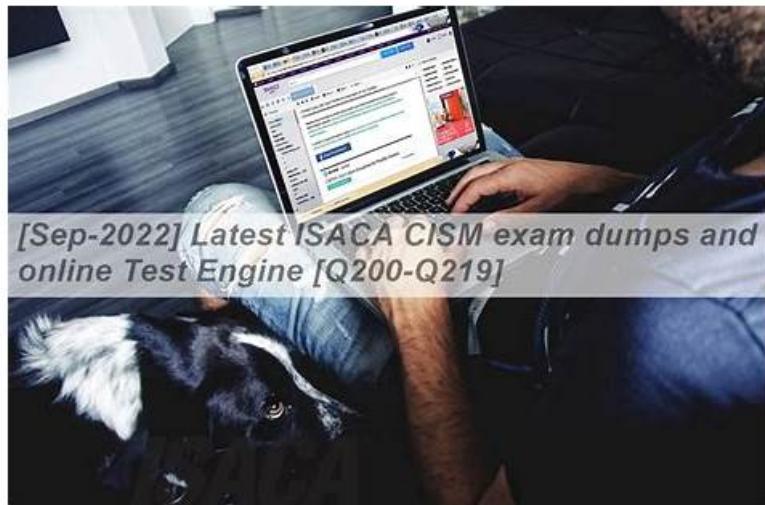

If you are working all the time, and you hardly find any time to prepare for the SMI300XE exam, then NewPassLeader present the smart way to SMI300XE exam prep for the exam. You can always prepare for the SMI300XE test whenever you find free time with the help of our SMI300XE Pdf Dumps. We have curated all the SMI300XE questions and answers that you can view the exam Supermicro SMI300XE PDF brain dumps and prepare for the exam. We guarantee that you will be able to pass the SMI300XE in the first attempt.

The NewPassLeader wants to become the first choice of Supermicro SMI300XE certification exam candidates. To achieve this objective the top-notch and real Supermicro SMI300XE exam questions are being offered in three easy-to-use and compatible formats. These NewPassLeader SMI300XE Exam Questions formats are PDF dumps files, desktop practice test software, and web-based practice test software.

MI300X Expert (SMI300XE) Certification Exam exam simulators & SMI300XE exam torrent

NewPassLeader's Supermicro SMI300XE Exam Training materials is virtually risk-free for you at the time of purchase. Before you buy, you can enter NewPassLeader website to download the free part of the exam questions and answers as a trial. So you can see the quality of the exam materials and we NewPassLeaderis friendly web interface. We also offer a year of free updates. If you do not pass the exam, we will refund the full cost to you. We absolutely protect the interests of consumers. Training materials provided by NewPassLeader are very practical, and they are absolutely right for you. We can make you have a financial windfall.

Supermicro MI300X Expert (SMI300XE) Certification Exam Sample Questions (Q25-Q30):

NEW QUESTION # 25
How would you identify and differentiate a failed GPU that needs to be replaced from other GPUs in the system that are functional?

- A. By the discoloration
- B. By the serial number
- C. By the warning light
- D. By the part number

Answer: C

Explanation:
A failed GPU in the Supermicro MI300X system can be identified using the warning light indicator.
Supermicro systems include LED diagnostic indicators that display the operational status of various components, including GPUs.
When a GPU malfunctions, the system will trigger an alert that is displayed as a warning light on the GPU tray or the server chassis.
This allows technicians to visually identify the faulty GPU without requiring extensive hardware testing.
* Discoloration (A) is not a reliable method of identifying a failed GPU as it would require physical degradation, which is uncommon.
* Serial numbers (B) and Part numbers (C) are used for inventory tracking but do not indicate functional status.
* Warning lights (D) are the recommended method, as documented in the system health monitoring section of Supermicro's documentation, which details LED indicators and diagnostic lights for system status monitoring.

NEW QUESTION # 26
The ROCm commands are not providing output or are failing. What could be the primary reason why?
And how can you validate the reasoning?

- A. You suspect there are GPUs not detected. To determine which GPUs are missing, open the IPMI GUI and review the GPU component section to make sure all GPUs are present.
- B. If more than 3 GPUs are missing, then ROCm commands will not function. We need to verify that the 3 are missing in the IPMI GUI and review the GPU component section to make sure that at least 2 or fewer GPUs are missing.
- C. CPU is not installed correctly on the server. Review the OS dmesg logs for any odd CPU messages, then if located proceed to reseat the CPU.
- D. The GPU baseboard may not be detected. You can determine this by opening the IPMI GUI and reviewing the FW section.

Answer: A

Explanation:
If ROCm commands fail to provide output, the primary issue is likely missing or undetected GPUs. The best way to validate this is by checking the IPMI GUI and reviewing the GPU component section to ensure that all GPUs are present.
* Option A (Correct): Missing GPUs are the most common cause of ROCm failures. The IPMI GUI provides visibility into which GPUs are detected.
* Option B (Incorrect): CPU misalignment would cause general system failure, not ROCm-specific issues.
* Option C (Incorrect): The GPU baseboard status can be checked in IPMI but is not the primary cause of ROCm failures.
* Option D (Incorrect): ROCm can function with multiple missing GPUs, but the key issue is confirming GPU presence first.

NEW QUESTION # 27
When removing the GPU tray, why is it important that you keep it straight?

- A. You won't be able to set it on your work surface if you don't.
- B. Movement can damage the upper portion of the chassis or the fans below the GPU tray.
- C. The GPU tray only slides in or out at a 16-degree angle.
- D. Because of the screws on either side of the tray.

Answer: B

Explanation:
When removing the GPU tray, it is crucial to keep it level to prevent damage to the chassis and cooling fans below.
* Option A (Correct): If the tray tilts, it can hit the upper chassis or damage fans below.
* Option B (Incorrect): There is no specific 16-degree angle requirement.
* Option C (Incorrect): Work surface placement does not impact removal safety.
* Option D (Incorrect): The screws must be removed first, but they do not affect the removal angle.

NEW QUESTION # 28
In the IPMI Dashboard, how can the health event log help you identify a failure with a component like a fan or power supply?

- A. The blades will be turning a bright orange.
- B. The red severity status identifies failed components in the log.
- C. The purple status indicator in the IPMI Dashboard indicates failures.

- D. In IPMI under Configuration, configure a new fan.

Answer: B

Explanation:
TheIPMI Dashboard health event loghelpsidentify component failuresusing ared severity status indicator
. If a fan or power supply fails, theevent log will mark it as a red alert, allowing users to take corrective action.
* Option A (Correct):Red severity status in theevent logsignals a failed component.
* Option B (Incorrect):Fansdo not change colorswhen failing.
* Option C (Incorrect):There is nopurple status indicatorin IPMI for failures.
* Option D (Incorrect):You cannot configure a new fan inIPMI under Configuration; you must replace a failed fan.

NEW QUESTION # 29
How many people are required to safely remove the GPU tray from the MI300X?

- A. 6 people
- B. 10 people
- C. 1 person
- D. 2 people

Answer: D

Explanation:
Tosafely remove the GPU trayfrom theMI300X system,two peopleare required.
* Option A (Incorrect):One personcannot safely removethe tray as it is too heavy (~70 lbs).
* Option B (Incorrect):Six people are unnecessary for this task.
* Option C (Correct):Two peoplearerecommended by Supermicroto ensure safe removal.
* Option D (Incorrect):Ten people are excessive and impractical.
Thus,the correct answer is C (2 people).

NEW QUESTION # 30
......

NewPassLeader MI300X Expert (SMI300XE) Certification Exam (SMI300XE) questions in three formats are the go-to source for successful and quick preparation. Three formats of our study material are Supermicro SMI300XE exam PDF questions, desktop practice test software, and web-based SMI300XE practice test. The philosophy behind offering these formats is simple: to create a world-class learning material that can help candidates achieve their MI300X Expert (SMI300XE) Certification Exam (SMI300XE) preparation objectives. With the help of SMI300XE exam questions in three formats, you can prepare successfully for the test according to your style.

SMI300XE Test Answers: https://www.newpassleader.com/Supermicro/SMI300XE-exam-preparation-materials.html

Our SMI300XE exam study material will always be your top choice, For example, if you are a college student, you can study and use online resources through the student column of our SMI300XE learning guide, and you can choose to study in your spare time, Candidates who pass SMI300XE certification prove their worth in the Supermicro field, 1.100% guaranteed first pass SMI300XE exam.

Knowledge Transfer Sessions, One of the easiest ways to SMI300XE connect two FireWire computers and share files is with a simple system configuration called target disk mode.

Our SMI300XE Exam study material will always be your top choice, For example, if you are a college student, you can study and use online resources through the student column of our SMI300XE learning guide, and you can choose to study in your spare time.
