Valid SPLK-2003 Test Cram, SPLK-2003 Valid Test Pattern

Two SPLK-2003 practice tests of BraindumpsPrep (desktop and web-based) create an actual test scenario and give you a SPLK-2003 real exam feeling. These SPLK-2003 practice tests also help you gauge your Splunk Certification Exams preparation and identify areas where improvements are necessary. You can alter the duration and quantity of Splunk SPLK-2003 Questions in these SPLK-2003 practice exams as per your training needs.

Splunk Phantom Certified Admin Sample Questions (Q92-Q97):

NEW QUESTION # 92
When analyzing events, a working on a case, significant items can be marked as evidence. Where can ail of a case's evidence items be viewed together?

- A. At the bottom of the Investigation page widget panel.
- B. Investigation page Evidence tab.
- C. Evidence report.
- D. Workbook page Evidence tab.

Answer: C

Explanation:
Explanation
The correct answer is B because the evidence report is a PDF document that contains all the evidence items of a case, along with the case details, phases, tasks, and comments. The evidence report can be generated from the Case Details page by clicking on the Generate Evidence Report button. The answer A is incorrect because the Workbook page Evidence tab only shows the evidence items that are associated with a specific phase or task of a case, not all the evidence items of the case. The answer C is incorrect because the Investigation page Evidence tab only shows the evidence items that are associated with a specific event or artifact of a case, not all the evidence items of the case. The answer D is incorrect because there is no such option at the bottom of the Investigation page widget panel. Reference: Splunk SOAR User Guide, page 64.

NEW QUESTION # 93
During a second test of a playbook, a user receives an error that states: "an empty parameters list was passed to phantom.act()." What does this indicate?

- A. The container has artifacts not parameters.
- B. The playbook is using an incorrect container.
- C. The playbook debugger's scope is set to all.
- D. The playbook debugger's scope is set to new.

Answer: A

Explanation:
The error message "an empty parameters list was passed to phantom.act()" typically indicates that the action being called by the playbook does not have the required parameters to execute.
This can happen if the playbook expects certain data to be present in the container's artifacts but finds none. Artifacts in Splunk SOAR (Phantom) are data elements associated with a container (such as an event or alert) that playbooks can act upon. If a playbook action is designed to use data from artifacts as parameters and those artifacts are missing or do not contain the expected data, the playbook cannot execute the action properly, leading to this error.

NEW QUESTION # 94
Phantom supports multiple user authentication methods such as LDAP and SAML2. What other user authentication method is supported?

- A. Biometrics
- B. SAML3
- C. OpenID
- D. PIV/CAC

Answer: D

Explanation:
Splunk SOAR supports multiple user authentication methods to ensure secure access to the platform. Apart from LDAP (Lightweight Directory Access Protocol) and SAML2 (Security Assertion Markup Language
2.0), SOAR also supports PIV (Personal Identity Verification) and CAC (Common Access Card) as authentication methods. These are particularly used in government and military organizations for secure and authenticated access to systems, providing a high level of security through physical tokens or cards that contain encrypted user credentials.

NEW QUESTION # 95
Two action blocks, geolocate_ip 1 and file_reputation_2, are connected to a decision block. Which of the following is a correct configuration for making a decision on the action results from one of the given blocks?

- A.

- B.

- C.

- D.

Answer: D

Explanation:
In the given decision block, you are trying to evaluate the results of two action blocks: geolocate_ip_1 and file_reputation_2. The correct configuration for making a decision based on the result of geolocate_ip_1 is by checking the country_iso_code field from the action result and setting the evaluation option to != (not equal), with no specific value provided in the "Select Value" box. This essentially checks whether a valid country ISO code exists in the action result and proceeds if it's not empty or different from a specific value. This is a common check when working with geolocation results to see if a response has been returned.
Other options (B, C, and D) include response codes or list comparisons, which do not align with the decision structure mentioned, which needs to operate based on a country_iso_code field.

* Splunk SOAR Documentation on Decision Blocks and Action Result Evaluation.

NEW QUESTION # 96
Which Phantom VPE Nock S used to add information to custom lists?

- A. Filter blocks
- B. Action blocks
- C. Decision blocks
- D. API blocks

Answer: D

Explanation:
Filter blocks are used to add information to custom lists in Phantom VPE. Filter blocks allow the user to specify a list name and a filter expression to select the data to be added to the list. Action blocks are used to execute app actions, API blocks are used to make REST API calls, and decision blocks are used to evaluate conditions and branch the playbook execution. In the Phantom Visual Playbook Editor (VPE), an API block is used to interact with various external APIs, including custom lists within Phantom. Custom lists are key-value stores that can be used to maintain state, aggregate data, or track information across multiple playbook runs.
API blocks allow the playbook to make GET, POST, PUT, and DELETE requests to these lists, facilitating the addition, retrieval, update, or removal of information. This makes API blocks a versatile tool in managing custom list data within playbooks.

NEW QUESTION # 97
.....

With great outcomes of the passing rate upon to 98-100 percent, our SPLK-2003 practice engine is totally the perfect ones. We never boost our achievements on our SPLK-2003 exam questions, and all we have been doing is trying to become more effective

and perfect as your first choice, and determine to help you pass the SPLK-2003 Study Materials as efficient as possible. Just to try on our SPLK-2003 training guide, and you will love it.

Valid SPLK-2003 Test Cram: https://www.briandumpsprep.com/SPLK-2003-prep-exam-braindumps.html

During the process of using our SPLK-2003 study materials, you focus yourself on the exam bank within the given time, and we will refer to the real exam time to set your SPLK-2003 practice time, which will make you feel the actual SPLK-2003 exam environment and build up confidence, If you do choose us, we will provide you the most real environment through the SPLK-2003 exam dumps, We are dedicated to study Splunk Phantom Certified Admin exam and candidates' psychology, and develop an excellent product, SPLK-2003 test practice engine, to help our clients pass Splunk Phantom Certified Admin exam easily.
