## **SPLK-3002 Certification Test Questions - Exam SPLK-3002 Registration**

Many clients may worry that their privacy information will be disclosed while purchasing our SPLK-3002 quiz torrent. We promise to you that our system has set vigorous privacy information protection procedures and measures and we won't sell your privacy information. Before you buy our product, you can download and try out it freely so you can have a good understanding of our SPLK-3002 Quiz prep. Please feel safe to purchase our SPLK-3002 exam torrent any time as you like. We provide the best service to the client and hope the client can be satisfied.

## **Splunk IT Service Intelligence Certified Admin Sample Questions (Q41-Q46):**

**NEW QUESTION # 41**

Which of the following is the best use case for configuring a Multi-KPI Alert?

- A. Comparing content between two notable events.
- B. Using machine learning to evaluate when data falls outside of an expected pattern.
- **C. Raising an alert when one or more KPIs indicate an outage is occurring.**
- D. Comparing anomaly detection between two KPIs.

**Answer: C**

Explanation:

Reference:

A multi-KPI alert is a type of correlation search that is based on defined trigger conditions for two or more KPIs. When trigger conditions occur simultaneously for each KPI, the search generates a notable event. For example, you might create a multi-KPI alert based on two common KPIs: CPU load percent and web requests. A sudden simultaneous spike in both CPU load percent and web request KPIs might indicate a DDOS (Distributed Denial of Service) attack. Multi-KPI alerts can bring such trending behaviors to your attention early, so that you can take action to minimize any impact on performance. Multi-KPI alerts are useful for correlating the status of multiple KPIs across multiple services. They help you identify causal relationships, investigate root cause, and provide insights into behaviors across your infrastructure. The best use case for configuring a multi-KPI alert is to raise an alert when one or more KPIs indicate an outage is occurring, such as when the service health score drops below a certain threshold or when multiple KPIs have critical severity levels. Reference: Create multi-KPI alerts in ITSI

#### NEW QUESTION # 42

When in maintenance mode, which of the following is accurate?

- **A. Once the window is over, KPIs and notable events will begin to be generated again.**
- B. KPIs are shown in blue while in maintenance mode.
- C. Maintenance mode slots are scheduled on a per hour basis.
- D. Service health scores and KPI events are deleted until the window is over.

**Answer: A**

Explanation:

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/EA/REBestPractice> A is the correct answer because when in maintenance mode, KPIs and notable events will begin to be generated again once the window is over. Maintenance mode is a feature of ITSI that allows you to temporarily suspend alerts and health score calculations for a service or an entity during planned maintenance or downtime. During maintenance mode, KPI searches still run, but the results are buffered until the window is over. Once the window is over, the buffered results are processed and alerts and health scores are generated if necessary. References: [Overview of maintenance windows in ITSI]

#### NEW QUESTION # 43

What is the minimum number of entities a KPI must be split by in order to use Entity Cohesion anomaly detection?

- A. 0
- B. 1
- C. 2
- **D. 3**

**Answer: D**

Explanation:

For Entity Cohesion anomaly detection in Splunk IT Service Intelligence (ITSI), the minimum number of entities a KPI must be split by is 2. Entity Cohesion as a method of anomaly detection focuses on identifying anomalies based on the deviation of an entity's behavior in comparison to other entities within the same group or cohort. By requiring a minimum of only two entities, ITSI allows for the comparison of entities to detect significant deviations in one entity's performance or behavior, which could indicate potential issues. This method leverages the idea that entities performing similar functions or within the same service should exhibit similar patterns of behavior, and significant deviations could be indicative of anomalies. The low minimum requirement of two entities ensures that this powerful anomaly detection feature can be utilized even in smaller environments.

#### NEW QUESTION # 44

Which capabilities are enabled through "teams"?

- A. Teams allow searches against the `itsi_summary` index.
- B. Teams restrict searches against the `itsi_notable_audit` index.
- C. Teams restrict notable event alert actions.
- D. Teams allow restrictions to service content in UI views.

#### Answer: D

Explanation:

D is the correct answer because teams allow you to restrict access to service content in UI views such as service analyzers, glass tables, deep dives, and episode review. Teams also control access to services and KPIs for editing and viewing purposes. Teams do not affect the ability to search against the `itsi_summary` index, restrict notable event alert actions, or restrict searches against the `itsi_notable_audit` index.

References: Overview of teams in ITSI

#### NEW QUESTION # 45

Which of the following statements describe default glass tables in ITSI?

- A. There is one service template default glass table.
- B. There is one default glass table per service.
- C. The Service Health Score default glass table.
- D. There are no default glass tables.

#### Answer: D

Explanation:

In Splunk IT Service Intelligence (ITSI), glass tables are fully customizable dashboards that provide a visual representation of an organization's IT environment, along with the health and status of services and KPIs.

Unlike some pre-configured views or dashboards that might come with default setups in various platforms, ITSI does not provide default glass tables out of the box. Instead, users are encouraged to create their own glass tables tailored to their specific monitoring needs and operational views. This approach ensures that each organization can design glass tables that best represent their unique infrastructure, applications, and service landscapes, providing a more personalized and relevant operational overview.

#### NEW QUESTION # 46

.....

The product we provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the SPLK-3002 study materials by the method which is convenient for you. They check the update every day, and we can guarantee that you can get a free update service from the date of purchase. Once you have any questions and doubts about the SPLK-3002 Exam Questions we will provide you with our customer service before or after the sale, you can contact us if you have question or doubt about our exam materials and the professional personnel can help you solve your issue about using SPLK-3002 study materials.
