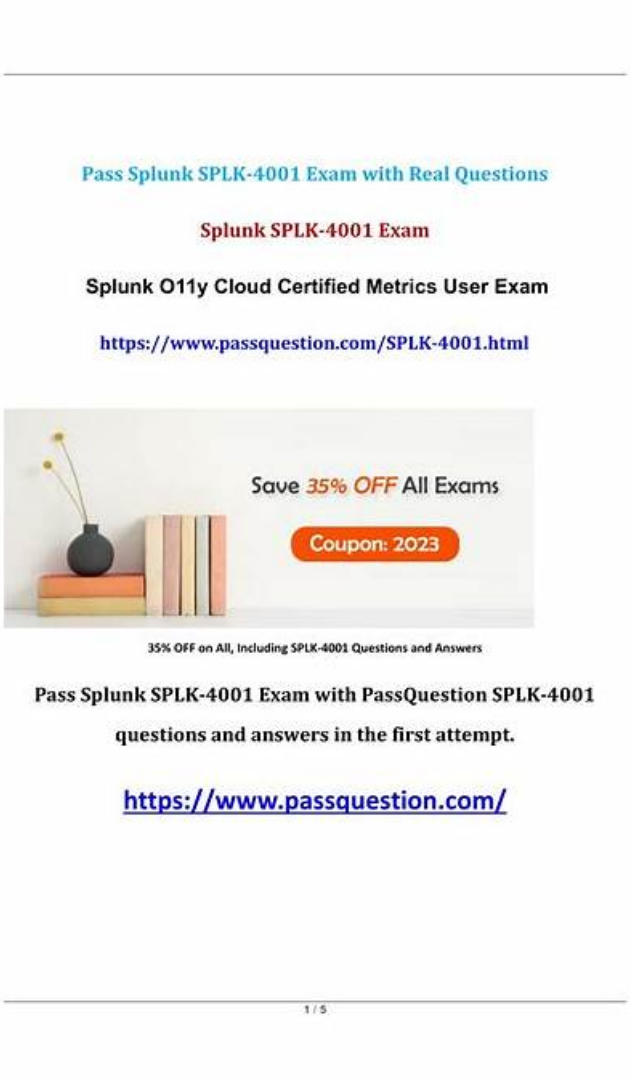
SPLK-4001 Exam Papers, SPLK-4001 Training Material



BONUS!!! Download part of ExamBoosts SPLK-4001 dumps for free: https://drive.google.com/open?id=1mK2VRBj42n7d0R7dRGNvzG3ZAZfqi3Ji

Our SPLK-4001 practice prep is so popular and famous for it has the advantage that it can help students improve their test scores by improving their learning efficiency. Therefore, users can pass SPLK-4001 exams with very little learning time. For another example, there are some materials that apply to students with professional backgrounds that are difficult for some industry rookie to understand. But our SPLK-4001 Learning Materials are compiled to simple language for our customers to understand easily.

Splunk SPLK-4001 is a certification exam offered by Splunk, a leading provider of software solutions for data analytics, machine learning, and cybersecurity. Splunk O11y Cloud Certified Metrics User certification exam is designed to test the knowledge and skills of individuals who want to become certified in Splunk O11y Cloud Certified Metrics User. Splunk O11y Cloud Certified Metrics User certification is ideal for individuals who want to demonstrate their expertise in using Splunk to measure and monitor the performance of cloud-based applications.

SPLK-4001 Training Material, Flexible SPLK-4001 Testing Engine

SWREG payment costs more tax. Especially for part of countries, intellectual property taxation will be collected by your countries if you use SWREG payment for SPLK-4001 exam test engine. So if you want to save money, please choose PayPal. Here choosing PayPal doesn't need to have a PayPal. In fact here you should have credit card. If you click PayPal payment, it will automatically

transfer to credit card payment for SPLK-4001 Exam Test engine. On the other hands, PayPal have strict restriction for sellers account to keep buyers' benefits, so that you can share worry-free purchasing for SPLK-4001 exam test engine.

Splunk O11y Cloud Certified Metrics User Sample Questions (Q52-Q57):

NEW QUESTION # 52
What are the best practices for creating detectors? (select all that apply)

- A. View data at highest resolution.
- B. Have a consistent value.
- C. Have a consistent type of measurement.
- D. View detector in a chart.

Answer: A,B,C,D

Explanation:
Explanation
The best practices for creating detectors are:
View data at highest resolution. This helps to avoid missing important signals or patterns in the data that could indicate anomalies or issues1 Have a consistent value. This means that the metric or dimension used for detection should have a clear and stable meaning across different sources, contexts, and time periods. For example, avoid using metrics that are affected by changes in configuration, sampling, or aggregation2 View detector in a chart. This helps to visualize the data and the detector logic, as well as to identify any false positives or negatives. It also allows to adjust the detector parameters and thresholds based on the data distribution and behavior3 Have a consistent type of measurement. This means that the metric or dimension used for detection should have the same unit and scale across different sources, contexts, and time periods. For example, avoid mixing bytes and bits, or seconds and milliseconds.

NEW QUESTION # 53
For which types of charts can individual plot visualization be set?

- A. Line, Bar, Column
- B. Bar, Area, Column
- C. Line, Area, Column
- D. Histogram, Line, Column

Answer: C

Explanation:
The correct answer is C. Line, Area, Column.
For line, area, and column charts, you can set the individual plot visualization to change the appearance of each plot in the chart. For example, you can change the color, shape, size, or style of the lines, areas, or columns. You can also change the rollup function, data resolution, or y-axis scale for each plot1 To set the individual plot visualization for line, area, and column charts, you need to select the chart from the Metric Finder, then click on Plot Chart Options and choose Individual Plot Visualization from the list of options. You can then customize each plot according to your preferences2 To learn more about how to use individual plot visualization in Splunk Observability Cloud, you can refer to this documentation2.

NEW QUESTION # 54
A customer is experiencing an issue where their detector is not sending email notifications but is generating alerts within the Splunk Observability UI. Which of the below is the root cause?

- A. The detector has an incorrect signal,
- B. The detector is disabled.
- C. The detector has an incorrect alert rule.

- D. The detector has a muting rule.

Answer: D

Explanation:
Explanation
The most likely root cause of the issue is D. The detector has a muting rule.
A muting rule is a way to temporarily stop a detector from sending notifications for certain alerts, without disabling the detector or changing its alert conditions. A muting rule can be useful when you want to avoid alert noise during planned maintenance, testing, or other situations where you expect the metrics to deviate from normal1 When a detector has a muting rule, it will still generate alerts within the Splunk Observability UI, but it will not send email notifications or any other types of notifications that you have configured for the detector. You can see if a detector has a muting rule by looking at the Muting Rules tab on the detector page. You can also create, edit, or delete muting rules from there1 To learn more about how to use muting rules in Splunk Observability Cloud, you can refer to this documentation1.

NEW QUESTION # 55
An SRE creates a new detector to receive an alert when server latency is higher than 260 milliseconds.
Latency below 260 milliseconds is healthy for their service. The SRE creates a New Detector with a Custom Metrics Alert Rule for latency and sets a Static Threshold alert condition at 260ms.
How can the number of alerts be reduced?

- A. Adjust the threshold.
- B. Adjust the notification sensitivity. Duration set to 1 minute.
- C. Choose another signal.
- D. Adjust the Trigger sensitivity. Duration set to 1 minute.

Answer: D

Explanation:
Explanation
According to the Splunk O11y Cloud Certified Metrics User Track document1, trigger sensitivity is a setting that determines how long a signal must remain above or below a threshold before an alert is triggered. By default, trigger sensitivity is set to Immediate, which means that an alert is triggered as soon as the signal crosses the threshold. This can result in a lot of alerts, especially if the signal fluctuates frequently around the threshold value. To reduce the number of alerts, you can adjust the trigger sensitivity to a longer duration, such as 1 minute, 5 minutes, or 15 minutes. This means that an alert is only triggered if the signal stays above or below the threshold for the specified duration. This can help filter out noise and focus on more persistent issues.

NEW QUESTION # 56
Interpreting data in charts can be affected by which of the following? (select all that apply)

- A. Analytics functions
- B. Rollups
- C. Chart resolution
- D. Tags

Answer: A,B,C
