Splunk Enterprise Certified Admin Sample Questions (Q48-Q53):

NEW QUESTION # 48

Which forwarder is recommended by Splunk to use in a production environment?

- A. Universal forwarder
- B. Lightweight forwarder
- C. Heavy forwarder
- D. SSL forwarder

Answer: A

Explanation:

Reference:

The forwarder that is recommended by Splunk to use in a production environment is the universal forwarder. The universal forwarder is a lightweight Splunk agent that forwards data to indexers or other forwarders. The universal forwarder has a small footprint and consumes minimal system resources. It also supports secure and reliable data forwarding with encryption and acknowledgement features. Therefore, option D is the correct answer. Reference: Splunk Enterprise Certified Admin | Splunk, [About forwarding and receiving data - Splunk Documentation]

NEW QUESTION # 49

What happens when there are conflicting settings within two or more configuration files?

- A. The setting is ignored until conflict is resolved.
- B. The setting with the lowest precedence is used.
- C. The setting with the highest precedence is used.
- D. The setting for both values will be used together.

Answer: C

Explanation:

When there are conflicting settings within two or more configuration files, the setting with the highest precedence is used. The precedence of configuration files is determined by a combination of the file type, the directory location, and the alphabetical order of the file names.

NEW QUESTION # 50
