- **B. A prefix of Splunk_TA_**
- C. A prefix of TECH_
- D. A suffix of .spl

Answer: B

Explanation:

Explanation

A prefix of Splunk_TA_ would allow an add-on to be automatically imported into Splunk Enterprise Security.

Splunk Enterprise Security uses a naming convention to identify and import add-ons that are compatible with the Common Information Model (CIM). Add-ons that start with Splunk_TA_ are automatically imported into Splunk Enterprise Security and mapped to the appropriate data models. Add-ons that do not follow this naming convention must be manually imported and configured in Splunk Enterprise Security¹. A prefix of CIM_ or TECH_ does not indicate an add-on that can be automatically imported. A suffix of .spl is the file extension for Splunk apps and add-ons, but it does not guarantee that they are compatible with Splunk Enterprise Security.
