

SSE-Engineer Latest Learning Material | SSE-Engineer Exam Topics

BTW, DOWNLOAD part of ValidExam SSE-Engineer dumps from Cloud Storage: https://drive.google.com/open?id=1JM3a_-wll7r2flP_bqO1yxJj_cOZX6pE

The purpose of our product is to let the clients master the SSE-Engineer quiz torrent and not for other illegal purposes. Our system is well designed and any person or any organization has no access to the information of the clients. So please believe that we not only provide the best SSE-Engineer test prep but also provide the best privacy protection. Take it easy. If you really intend to pass the SSE-Engineer Exam, our software will provide you the fast and convenient learning and you will get the best study materials and get a very good preparation for the exam. The content of the SSE-Engineer guide torrent is easy to be mastered and has simplified the important information.

Palo Alto Networks SSE-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	• Prisma Access Planning and Deployment: This section of the exam measures the skills of Network Security Engineers and covers foundational knowledge and deployment skills related to Prisma Access architecture. Candidates must understand key components such as security processing nodes, IP addressing, DNS, and compute locations. It evaluates routing mechanisms including routing preferences, backbone routing, and traffic steering. The section also focuses on deploying Prisma Access service infrastructure for mobile users using VPN clients or explicit proxy and configuring remote networks. Additional topics include enabling private application access using service connections, Colo-Connect, and ZTNA connectors, implementing identity authentication methods like SAML, Kerberos, and LDAP, and deploying Prisma Access Browser for secure user access.
Topic 2	• Prisma Access Administration and Operation: This section of the exam measures the skills of IT Operations Managers and focuses on managing Prisma Access using Panorama and Strata Cloud Manager. It tests knowledge of multitenancy, access control, configuration, and version management, and log reporting. Candidates should be familiar with releasing upgrades and leveraging SCM tools like Copilot. The section also evaluates the deployment of the Strata Logging Service and its integration with Panorama and SCM, log forwarding configurations, and best practice assessments to maintain security posture and compliance.
Topic 3	• Prisma Access Troubleshooting: This section of the exam measures the skills of Technical Support Engineers and covers the monitoring and troubleshooting of Prisma Access environments. It includes the use of Prisma Access Activity Insights, real-time alerting, and a Command Center for visibility. Candidates are expected to troubleshoot connectivity issues for mobile users, remote networks, service connections, and ZTNA connectors. It also focuses on resolving traffic enforcement problems including security policies, HIP enforcement, User-ID mismatches, and split tunneling performance issues.

Topic 4	• Prisma Access Services: This section of the exam measures the skills of Cloud Security Architects and covers advanced features within Prisma Access. Candidates are assessed on how to configure and implement enhancements like App Acceleration, traffic replication, IoT security, and privileged remote access. It also includes implementing SaaS security and setting up effective policies related to security, decryption, and QoS. The section further evaluates how to create and manage user-based policies using tools like the Cloud Identity Engine and User ID for proper identity mapping and authentication.

SSE-Engineer Exam Topics | SSE-Engineer Exam Material

We provide 3 versions of our Palo Alto Networks Security Service Edge Engineer exam torrent and they include PDF version, PC version, APP online version. Each version's functions and using method are different and you can choose the most convenient version which is suitable for your practical situation. For example, the PDF version is convenient for you to download and print our SSE-Engineer test torrent and is suitable for browsing learning. If you use the PDF version you can print our SSE-Engineer Guide Torrent on the papers and it is convenient for you to take notes. You learn our SSE-Engineer test torrent at any time and place. The PC version can stimulate the real exam's environment, is stalled on the Windows operating system and runs on the Java environment. You can use it at any time to test your own exam stimulation tests scores and whether you have mastered our SSE-Engineer guide torrent or not.

Palo Alto Networks Security Service Edge Engineer Sample Questions (Q12-Q17):

NEW QUESTION # 12

An engineer has configured a Web Security rule that restricts access to certain web applications for a specific user group. During testing, the rule does not take effect as expected, and the users can still access blocked web applications. What is a reason for this issue?

- A. The rule was created with improper threat management settings.
- **B. The rule was created at a lower level in the rule hierarchy, giving priority to a higher-level rule.**
- C. The rule was created at a higher level in the rule hierarchy, giving priority to a lower-level rule.
- D. The rule was created in the wrong scope, affecting only GlobalProtect users instead of all users.

Answer: B

Explanation:

Prisma Access applies security rules in a hierarchical order, where rules at higher levels take precedence over those at lower levels. If a more permissive rule is placed higher in the hierarchy, it may allow traffic before the restrictive Web Security rule is evaluated. To resolve this, the engineer should reorder the rules to ensure the restrictive Web Security rule is positioned higher in the hierarchy so it is applied before any broader or conflicting rules.

NEW QUESTION # 13

Which Cloud Identity Engine capability will create a Security policy that uses Entra ID attributes as the source identification?

- A. Entra ID Group Attribute
- B. Attribute Group Mapping
- **C. Cloud Dynamic User Group**
- D. Entra ID Cloud Group

Answer: C

Explanation:

The Cloud Dynamic User Group capability in Cloud Identity Engine enables the creation of Security policies that use Entra ID (formerly Azure AD) attributes for user identification. This allows Prisma Access to dynamically apply user-based security rules based on real-time Entra ID attributes, ensuring that access policies adapt to user changes such as group membership, device compliance, or role updates.

NEW QUESTION # 14

An engineer configures a Security policy for traffic originating at branch locations in the Remote Networks configuration scope. After committing the configuration and reviewing the logs, the branch traffic is not matching the Security policy. Which statement explains the branch traffic behavior?

- A. The source zone was configured as "Trust."
- B. The Security policy did not meet best practice standards and was automatically removed.
- **C. The traffic is matching a Security policy in the Prisma Access configuration scope.**
- D. The source address was configured with an address object including the branch location prefixes.

Answer: C

Explanation:

In Prisma Access, security policies are evaluated based on their configuration scope. If the engineer configured a Security policy under the Remote Networks scope, but traffic from the branch locations is instead matching a Security policy under the Prisma Access configuration scope, the intended policy will not take effect. This happens because Prisma Access evaluates security rules based on the highest-level applicable configuration first, which can override more specific Remote Networks policies.

NEW QUESTION # 15

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

How should Prisma Access be implemented to meet the customer requirements?

- A. Deploy two Prisma Access instances - the first with mobile users, remote networks, and private access for all internal connection types, and the second with remote networks and private application access for B2B connections - and use the Strata Multitenant Cloud Manager Prisma Access configuration scope to manage access.
- B. Deploy a Prisma Access instance with mobile users, remote networks, and private access for all connection types, and use the specific configuration scope for the connection type to manage access.
- **C. Deploy two Prisma Access instances - the first with mobile users, remote networks, and private access for all internal connection types, and the second with remote networks and private application access for B2B connections - and use the specific configuration scope for the connection type to manage access.**
- D. Deploy a Prisma Access instance with mobile users, remote networks, and private access for all connection types, and use the Prisma Access Configuration scope to manage all access.

Answer: C

Explanation:

To meet the customer's requirements, two separate Prisma Access instances should be deployed:

* Instance 1 should include mobile users, remote networks, and private access for internal connectivity.

This ensures that mobile users can access the internet, data centers, and remote branch locations while enforcing security policies.

* Instance 2 should be configured with remote networks and private application access for B2B connections. This instance will restrict access to only the required internally developed applications using non-standard ports, ensuring that partners cannot access other corporate resources.

By using specific configuration scopes for different connection types, the security team can manage access to mobile users and branch locations, while the network team can manage B2B partner connections. This ensures proper segmentation of management responsibilities while maintaining security and compliance.

NEW QUESTION # 16

An engineer has configured IPSec tunnels for two remote network locations; however, users are experiencing intermittent connectivity issues across the tunnels.

What action will allow the engineer to receive notifications when the IPSec tunnels are down or experiencing instability?

- A. Select the IPsec tunnel monitoring and notifications checkbox when configuring the remote network IPsec tunnels.
- B. Create a tunnel log notification rule to alert on specified remote network IPsec tunnel conditions.
- C. Set up the operational health dashboard to email alerts for remote Network IPsec tunnel issues.
- **D. Create a new notification profile specifying conditions for remote network IPsec tunnels.**

Answer: D

Explanation:

InPrisma Access, configuring a notification profile allows engineers to receive alerts when IPsec tunnels experience downtime or instability. By defining specific conditions for remote network IPsec tunnels, the notification profile ensures that the engineer is proactively informed about tunnel failures, flapping, or degraded performance. This approach enables timely troubleshooting and minimizes disruptions for users relying on the IPsec tunnels.

NEW QUESTION # 17

• • • • •

A good learning platform should not only have abundant learning resources, but the most intrinsic things are very important, and the most intuitive things to users are also indispensable. The SSE-Engineer test material is professional editorial team, each test product layout and content of proofreading are conducted by experienced professionals, so by the editor of fine typesetting and strict check, the latest SSE-Engineer Exam Torrent is presented to each user's page is refreshing, and ensures the accuracy of all kinds of SSE-Engineer learning materials is extremely high.
